

# Contents

<b>1</b>	<b>The Epigenetic Regulatory Machinery . . . . .</b>	<b>1</b>
	Constanze Bonifer and Peter N. Cockerill	
<b>Part I Nonmammalian Hematopoiesis</b>		
<b>2</b>	<b>What Can We Learn from Flies: Epigenetic Mechanisms Regulating Blood Cell Development in <i>Drosophila</i> . . . . .</b>	<b>15</b>
	Paul Badenhorst	
<b>3</b>	<b>Epigenetic and Transcriptional Mechanisms Regulating Blood Cell Development in Zebrafish . . . . .</b>	<b>49</b>
	Xiaoying Bai	
<b>Part II Epigenetic Mechanisms Regulating Mammalian Hematopoietic Stem Cell Development and Function</b>		
<b>4</b>	<b>Epigenetic and Transcriptional Mechanisms Regulating the Development of the Haematopoietic System in Mammals . . . . .</b>	<b>67</b>
	Maud Fleury, Flor M. Perez-Campo, Guilherme Costa, Georges Lacaud, and Valerie Kouskoff	
<b>5</b>	<b>Polycomb Complexes: Chromatin Regulators Required for Cell Diversity and Tissue Homeostasis . . . . .</b>	<b>95</b>
	Miguel Vidal	
<b>6</b>	<b>The Role of Polycomb Group Proteins in Hematopoietic Stem Cell (HSC) Self-Renewal and Leukemogenesis . . . . .</b>	<b>141</b>
	Vincent van den Boom, Hein Schepers, Annet Z. Brouwers-Vos, and Jan Jacob Schuringa	
<b>7</b>	<b>Role of the Trithorax (MLL): HOX Axis in HSC Development, Function, and Leukemia . . . . .</b>	<b>175</b>
	Robert K. Slany	

<b>8</b>	<b>Role of DNA Methyltransferases and DNA Methylation in Cell Fate Decisions During Blood Cell Development and Leukemia . . . . .</b>	<b>205</b>
	Grant A. Challen and Jennifer J. Trowbridge	
<b>Part III Epigenetic and Transcriptional Mechanisms Regulating Cell Fate Decisions and Blood Cell Lineage Development</b>		
<b>9</b>	<b>Transcriptional and Epigenetic Regulation in the Development of Myeloid Cells: Normal and Diseased Myelopoiesis . . . . .</b>	<b>223</b>
	Peter Laslo and Tomas Stopka	
<b>10</b>	<b>The Molecular Basis of Normal Erythroid/Megakaryocyte Development and Mechanisms of Epigenetic/Transcriptional Deregulation Leading to Erythroleukemia and Thalassemia . . . . .</b>	<b>247</b>
	Douglas Vernimmen	
<b>11</b>	<b>The Molecular Basis of T Cell Development and How Epigenetic/Transcriptional Deregulation Leads to T-ALL . . . . .</b>	<b>267</b>
	Will Bailis and Warren S. Pear	
<b>12</b>	<b>Epigenetic Control of T-Cell Receptor Locus Rearrangements in Normal and Aberrant Conditions . . . . .</b>	<b>295</b>
	Beatriz del Blanco, Úrsula Angulo, and Cristina Hernández-Munain	
<b>13</b>	<b>The Molecular Basis of B Cell Development and the Role of Deregulated Transcription and Epigenetics in Leukaemia and Lymphoma . . . . .</b>	<b>331</b>
	Christopher M. Kirkham, James N. Scott, Joan Boyes, and Sarah Bevington	
<b>Part IV Epigenetic Control of Immune Cell Function</b>		
<b>14</b>	<b>Epigenetic Control of Immune T Cell Memory . . . . .</b>	<b>367</b>
	Atsushi Onodera, Damon J. Tumes, and Toshinori Nakayama	
<b>15</b>	<b>The Macrophage Epigenome and the Control of Inflammatory Gene Expression . . . . .</b>	<b>383</b>
	Sara Polletti, Alessia Curina, Gioacchino Natoli, and Serena Ghisletti	
	<b>Glossary . . . . .</b>	<b>399</b>
	<b>Index . . . . .</b>	<b>413</b>

Transcriptional and Epigenetic Mechanisms Regulating  
Normal and Aberrant Blood Cell Development

Bonifer, C.; Cockerill, P. (Eds.)

2014, XIII, 416 p. 49 illus. in color., Hardcover

ISBN: 978-3-642-45197-3
