

Contents

1	Introduction	1
1.1	Fabrication of Silicon Nanostructures	2
1.2	Biosensor	3
1.3	Bioimaging	7
1.4	Cancer Therapy	10
1.5	Biosafety Assessment	12
	References	12
2	Silicon Nanostructures	19
2.1	Fluorescent Silicon Nanoparticles	20
2.2	Silicon Nanowires	24
2.2.1	Chemical Vapor Deposition	26
2.2.2	Oxide-Assisted Growth	28
2.2.3	Metal-Catalyzed Electroless Etching	28
2.3	Silicon Nanohybrid	29
2.4	Conclusions	33
	References	33
3	Silicon-Based Platform for Biosensing Applications	39
3.1	SiNWs-Based Electrochemical Biosensor	40
3.1.1	SiNWs-Based Field-Effect Transistor	40
3.1.2	Amperometric-Based Biosensors	48
3.2	Silicon-Based Optical Biosensor	50
3.2.1	Surface-Enhanced Raman Scattering-Based Biosensors	50
3.2.2	Fluorescence-Based Biosensors	51
3.3	Conclusions and Prospects	53
	References	54
4	Silicon-Based Nanoprobes for Bioimaging Applications	61
4.1	In Vitro Imaging	63
4.2	In Vivo Imaging	67
4.3	Conclusions and Prospects	70
	References	71

5	Silicon-Based Nanoagents for Cancer Therapy	75
5.1	Chemotherapy	76
5.1.1	Drug Delivery	76
5.1.2	Protein and Gene Delivery	80
5.2	Silicon-Based Nanoagents for Phototherapy	83
5.2.1	Photodynamic Therapy	84
5.2.2	Photothermal Therapy	85
5.3	Conclusions and Perspectives	87
	References	87
6	Biosafety Assessment of Silicon Nanomaterials	93
6.1	SiNPs-Related Biosafety Assessment	94
6.2	Silicon Nanowires-Related Biosafety Assessment	99
6.3	Conclusions	101
	References	101
7	Outlook	105
7.1	Conclusion	105
7.2	Challenges and Perspectives	107

Silicon Nano-biotechnology

He, Y.; Su, Y.

2014, VIII, 109 p. 47 illus., 26 illus. in color., Softcover

ISBN: 978-3-642-54667-9
