Part I Introduction

1	Research Background	3
1.1	General Background	3
1.1.1	Mercury Pollution is One of China's Major Environmental Problems	3
1.1.2	SINOMER Project	4
1.2	Physical and Chemical Properties of Mercury and Selenium	5
1.2.1	Physical and Chemical Properties of Mercury	5
1.2.2	Physical and Chemical Properties of Selenium	7
1.3	Environmental Toxicology of Mercury and Selenium	7
1.3.1	Toxicity and Health Risks of Mercury Exposure	7
1.3.2	Toxicity and Health Benefits/Risks of Selenium Exposure	11
1.4	Evidence for Topic Selection	12
1.4.1	Selenium is a Natural Mercury Antagonist	12
1.4.2	Selenium Pollution in Hg Mining Areas must be Considered	12
	References	14
2	Advances in Research on the Mechanisms of Selenium–Mercury Interactions and Health Risk Assessment	17
2.1	Selenium–Mercury Interactions and Their Mechanisms in Aquatic Ecosystems	18
2.2	Selenium–Mercury Interactions and Their Mechanisms in Terrestrial Ecosystems	20
2.3	Mechanisms of Selenium–Mercury Interactions in Mammals (and Humans)	22
2.3.1	Protective Effects of Selenium Against Mercury Toxicity and the Mechanisms Thereof	22
2.3.2	Implications of the Physiological Significance and Metabolic Processes of Selenium for the Toxicity of Mercury Exposure	26

2.4	New Model for the Assessment of the Health Risks of Mercury and a Relevant Proposal	27
	References	30
3	Research Subject, Methods and Significance	35
3.1	Research Subject	35
3.2	Methods	35
3.2.1	Sample Collection and Preparation	35
3.2.2	Analytical Method	39
3.3	Significance of this Study	44
	References	44
4	Overview of the Study Area (Wanshan)	47
4.1	Study Area.	47
4.2	Overview of Mine Area.	47
4.3	Geomorphology and Climate	49
4.4	Water System in the Mine Area	50
4.5	Agriculture and Population in the Mine Area.	50
4.6	Geology of the Area	51
	References	51

Part II Biogeochemical Cycles of Mercury and Selenium and Their Interactions in River System

5	Biogeochemical Cycles of Mercury in River System.	55
5.1	Speciation, Tempo-Spatial Distribution and Migration of Total Mercury	55
5.1.1	Total Mercury	55
5.1.2	Particulate Mercury, Total Suspended Solid, SO_4^{2-} and Ca^{2+}	64
5.1.3	Dissolved Mercury	66
5.1.4	Reactive Mercury	67
5.2	Speciation, Tempo-Spatial Distribution and Migration of Methylmercury.	68
5.2.1	Unfiltered Methylmercury	68
5.2.2	Ratio of Methylmercury to Total Mercury (%MeHg)	75
5.2.3	Dissolved- and Particulate- Methylmercury	76
5.3	Chapter Summary.	79
5.3.1	Total Mercury	79
5.3.2	Methylmercury.	80
	References	80

6	Biogeochemical Cycles of Selenium in River System	83
6.1	Distribution, Source and Migration of Dissolved Total Selenium	84
6.1.1	The Regional Distribution in Surface Water	84
6.1.2	Potential Sources	84
6.1.3	The Local Background Concentrations	88
6.1.4	Comparison with Other Regions	88
6.1.5	Relationship with Sulfate, pH, and DOC	89
6.2	Distribution and Migration Characteristics of Selenium Speciation	90
6.2.1	Se(VI)	90
6.2.2	Se(IV)	92
6.2.3	Se(org)	93
6.3	Risk Consideration	93
6.3.1	River Water	93
6.3.2	Spring Water	94
6.4	Chapter Summary	95
	References	95
7	Interactions of Mercury and Selenium in River System	99
	References	101

Part III Biogeochemical Cycles of Mercury and Selenium and Their Interactions in Soil-Rice System

8	Biogeochemical Cycles of Mercury in Soil-Rice System	105
8.1	Mercury in Paddy Soil	105
8.2	Mercury in Rice Grain	106
8.3	Relationship Between Mercury in Rice and in Soil	107
8.4	Mercury Distribution in Different Parts of Rice	113
8.5	Chapter Summary	114
	References	115
9	Biogeochemical Cycles of Selenium in Soil-Rice System	117
9.1	Selenium in Soil	118
9.2	Selenium in Rice Grain	122
9.3	Relationship Between Selenium in Rice and in Soil	123
9.4	Selenium Distribution in Different Parts of Rice	125
9.5	Fractionation of the Selenium in Soil	125
9.5.1	Water-Soluble Selenium	125
9.5.2	Ligand-Exchangeable Selenium	127

9.5.3	Organic-Bound Selenium.	128
9.5.4	Fe/Mn/Al Oxide-, Amorphous Material-, Hydrate- and Carbonate-Bound Selenium	129
9.5.5	Sulfide-Bound Selenium	129
9.5.6	Residual-Bound Selenium	130
9.6	Chapter Summary.	130
	References	131
10	Interactions of Mercury and Selenium in Soil-Rice System	135
10.1	Selenium Levels Versus Mercury Levels in Grains.	135
10.2	Selenium Levels Versus Mercury Levels in Soil.	137
10.3	Selenium Translocation Versus Mercury Translocation in Soil-Rice System	137
10.4	Distribution Pattern of Selenium Versus that of Mercury in Different Parts of Rice	137
10.5	Possible Mechanisms of Formation of Hg-Se Complex in Rhizosphere/Root	140
10.6	Suppression Effect of Selenium on Uptake and Translocation of Mercury in Rice.	141
10.7	Impacts of Mercury on the Bioavailability of Selenium in Paddy Soil	145
10.8	Chapter Summary.	146
	References	147
 Part IV Health Risk Assessment for Human Exposure to Mercury and Selenium		
11	Health Risk Assessment for Human Exposure to Mercury.	153
11.1	Calculation of Probable Daily Intake.	153
11.2	Mercury Levels in Different Exposure Media.	155
11.3	Probable Daily Intake Levels	155
11.4	Contributions to Mercury Exposure form Different Media.	156
11.5	Risk Considerations	156
11.6	General Characteristics of Mercury Exposure.	158
11.7	Food Consumption Advisories	160
11.8	Percentage of Total Population Under Potential Health Risk	161
11.9	Comments on Criteria of Mercury Risk Assessment	161
11.10	Chapter Summary.	162
	References	163

12	Health Risk Assessment for Human Exposure to Selenium.	167
12.1	Calculation of Probable Daily Intake.	168
12.2	Selenium Levels in Different Exposure Media	169
12.3	Probable Daily Intake Levels	169
12.4	Contributions to Selenium Exposure form Different Media	169
12.5	Risk Considerations	170
12.6	Chapter Summary	171
	References	171
13	Health Risk Assessment for Human Exposure of Mercury and Selenium Considering Selenium–Mercury Interactions	173
13.1	Proposal for a New Criterion	176
13.2	Comparison of Different Criteria	177
13.2.1	Scenario I, Criteria Considering Only Mercury	177
13.2.2	Scenario II, Criteria Considering Only Selenium . . .	179
13.2.3	Scenario III, Criteria Considering Mercury and Selenium Independently	181
13.2.4	Scenario IV, Criteria Considering Selenium–Mercury Interactions	182
13.3	Implications	183
13.4	Chapter Summary	184
	References	185
 Part V Conclusions and Prospect		
14	Conclusions	189
14.1	River System	190
14.2	Rice-Soil System	190
14.3	Risk Considerations	191
15	Research Needs and Future Outlook	193

Impacts of Selenium on the Biogeochemical Cycles of
Mercury in Terrestrial Ecosystems in Mercury Mining
Areas

Zhang, H.

2014, XXII, 193 p. 54 illus., 16 illus. in color., Hardcover
