

Contents

1	Introduction	1
1.1	Background	3
1.2	Research Objectives and Questions	7
1.3	Overview of the Book	9
1.4	Original Publications and Their Contributions	12
	References	13
2	Macroprudential Oversight	15
2.1	Financial Systems, Fragilities and Instabilities	16
2.1.1	Key Components of Financial Systems	16
2.1.2	Financial (in)stability	18
2.1.3	Fragility of Financial Systems	19
2.1.4	A Systemic Risk Cube	21
2.2	Theoretical and Empirical Underpinnings	23
2.2.1	Theoretical Models	23
2.2.2	Empirical Findings	27
2.3	Tools for Safeguarding Financial Stability	31
2.3.1	Early-Warning Indicators and Models	31
2.3.2	Macro Stress-Testing Models	33
2.3.3	Contagion and Spillover Models	35
2.3.4	Tools With Visual Capabilities	36
2.4	A Framework for Macroprudential Oversight	39
2.5	Concluding Discussion	42
	References	43
3	Macroprudential Data	51
3.1	Data: What are They?	52
3.2	Data for Macroprudential Oversight	53
3.2.1	Macroeconomic Data	54
3.2.2	Banking System Data	56
3.2.3	Market-Based Data	57
3.3	A Four-Dimensional Data Cube	58

3.4	Stylized Challenges in Macroprudential Data	60
3.4.1	Macroeconomic Data	61
3.4.2	Banking System Data	62
3.4.3	Market-Based Data	64
3.5	Concluding Discussion	64
	References	66
4	Data and Dimension Reduction	69
4.1	Some Key Concepts and Definitions	70
4.1.1	Knowledge Discovery and Data Mining	70
4.1.2	Information Visualization	75
4.1.3	Visual Analytics	82
4.2	Dimension Reduction	83
4.2.1	Aims of Dimension Reduction	84
4.2.2	An Overview of Methods	86
4.3	Data Reduction	88
4.3.1	Aims of Data Reduction	88
4.3.2	An Overview of Methods	89
4.4	The Self-Organizing Map (SOM)	92
4.4.1	Parametrizing the SOM	93
4.4.2	Supervision of the SOM	95
4.4.3	Qualities of the SOM	96
4.5	Concluding Summary	97
	References	97
5	Data-Dimension Reductions: A Comparison	101
5.1	The Optimal Method: A Literature Review	102
5.1.1	A Comparison of Dimension Reductions	102
5.1.2	A Comparison of Data Reductions	103
5.1.3	Why is the Literature so Divided?	103
5.2	DDR Combinations for the Task at Hand	104
5.2.1	Aims and Needs for the Task	104
5.2.2	Aims and Needs of DDR Combinations	105
5.3	A Qualitative Comparison	107
5.4	Illustrative Experiments	109
5.5	The SOM and Its Visualization Aids	112
5.6	Discussion	116
5.7	Concluding Summary	118
	References	119
6	Extending the SOM	123
6.1	Time in SOMs: A Brief Review	124

6.2	Extensions for Exploiting the SOM	126
6.2.1	Fuzzification of the SOM	126
6.2.2	Transition Probabilities on the SOM	130
6.2.3	Shock Propagation on the SOM	135
6.3	The Self-Organizing Time Map	137
6.3.1	SOTM Properties	140
6.3.2	Qualities and Properties of the SOTM.	141
6.3.3	Visualizations of the SOTM.	143
6.3.4	Some Illustrative Examples	144
6.4	Concluding Summary	154
	References	155
7	Self-Organizing Financial Stability Map	159
7.1	Data	160
7.1.1	Identifying Systemic Financial Crises	161
7.1.2	Macro-financial Indicators of Vulnerabilities and Risks.	163
7.2	Model Evaluation Framework	164
7.3	Model Training Framework	170
7.4	Training and Evaluation of the SOFSM	172
7.5	Performance and Robustness of the SOFSM	174
7.6	Concluding Summary	180
	References	181
8	Exploiting the SOFSM	183
8.1	The SOFSM: Its Output and Interpretation	185
8.2	Visualizing the State of Financial Stability on the SOFSM . . .	188
8.3	Fuzzification of the SOFSM	193
8.4	Transitions on the SOFSM.	194
8.5	Scenario Analysis on the SOFSM.	196
8.6	Shock propagation on the SOFSM	199
8.7	Outlier Analysis with the SOFSM	201
8.8	Combining the SOFSM with Predictive Methods	203
8.9	Concluding summary	208
	References	209
9	Decomposing Financial Crises with SOTMs.	211
9.1	A Decomposition of the Global Financial Crisis.	212
9.1.1	Parametrizing the SOTM.	212
9.1.2	A Univariate View of the Crisis	212
9.1.3	A Multivariate View of the Crisis	214

9.2	A Decomposition of Modern Financial Crises	217
9.2.1	Parametrizing the Time-to-Event SOTM	218
9.2.2	A Univariate View of Crises	219
9.2.3	A Multivariate View of Crises	220
9.3	Concluding Summary	221
	References	221
10	Conclusions, Limitations and the Future	223
10.1	Conclusions, Findings and Implications.	223
10.1.1	Implications for Dimension Reduction	227
10.1.2	Implications for Policy Use	228
10.2	Limitations	229
10.2.1	Limitations of Methods	229
10.2.2	Limitations of Applications	230
10.3	Future Research	231
10.3.1	Future Methods	231
10.3.2	Future Applications.	232
	References	233
