

Contents

1	Introduction to Carbon Metabolism in Yeast.	1
	Concetta Compagno, Sofia Dashko and Jure Piškur	
2	Glucose Sensing and Signal Transduction in <i>Saccharomyces cerevisiae</i>.	21
	Ken Peeters and Johan M. Thevelein	
3	Anaerobic Carbon Metabolism of <i>Saccharomyces cerevisiae</i>	57
	Paula Jouhten and Merja Penttilä	
4	Systems Biology: Developments and Applications	83
	Rahul Kumar, Petri-Jaan Lahtvee and Jens Nielsen	
5	Comparative Genomics and Evolutionary Genetics of Yeast Carbon Metabolism	97
	Zhenguo Lin and Wen-Hsiung Li	
6	Similarities and Differences Between Cancer and Yeast Carbohydrate Metabolism	121
	Matic Legiša	
7	Carbon Metabolism in Pathogenic Yeasts (Especially <i>Candida</i>): The Role of Cell Wall Metabolism in Virulence.	141
	Keunsook K. Lee and Carol A. Munro	
8	Molecular Mechanisms in Yeast Carbon Metabolism: Lipid Metabolism and Lipidomics.	169
	Birgit Ploier, Günther Daum and Uroš Petrovič	
9	Molecular Mechanisms in Yeast Carbon Metabolism: Bioethanol and Other Biofuels	217
	Volkmar Passoth	

10	Wine, Beer and Cider: Unravelling the Aroma Profile	261
	Amparo Gamero, Vicente Ferreira, Isak S. Pretorius and Amparo Querol	
11	Production of Metabolites and Heterologous Proteins	299
	Michael Sauer, Paola Branduardi, Hannes Rußmayer, Hans Marx, Danilo Porro and Diethard Mattanovich	

Molecular Mechanisms in Yeast Carbon Metabolism

Piskur, J.; Compagno, C. (Eds.)

2014, VIII, 326 p. 42 illus., 28 illus. in color., Hardcover

ISBN: 978-3-642-55012-6
