Abstract.....XIX

PART I

Need for research & theoretical framework

1. Practical relevance.....	2
1.1. Background and relevance from a managerial perspective	2
1.2. Research objectives and practical contribution of the research project.....	11
1.3. Thesis outline	13
2. Theoretical relevance.....	17
2.1. Relevant research fields	17
2.2. State of research and research gaps.....	20
2.3. Research questions and scientific contribution of the research project	24
3. Research framework and research subjects	27
3.1. Constituent attributes of buyer-supplier relationships	27
3.2. Buyer-supplier relationships in the context of supply chains	29
3.3. Perspectives in buyer-supplier relationships.....	33
3.4. Performance of buyer-supplier relationships	34
3.5. Summary and development of an integrated framework for research.....	37
3.6. Research subjects	39
4. Research design and positioning of research	43
4.1. Theoretical fundamentals – The three levels of scientific research.....	43
4.2. Theoretical level.....	46
4.3. Methodological level.....	51
4.4. Meta-methodological level	55
4.5. Summary and positioning of research within scientific theory	60

PART II

Theory building & empirical analysis

5. Performance-control in buyer-supplier relationships: Development of a contingency-based framework for analysis	64
5.1. Current situation and challenges	64
5.2. Theory development	67
5.2.1. Performance control in buyer-supplier relationships.....	67
5.2.2. Formal management control systems	73
5.2.3. Identification of research gaps.....	76
5.3. Research methodology	77
5.4. The contingency-based framework for analysis	80
5.4.1. Classification scheme for relational firm-performance variables.....	87
5.4.2. Classification scheme for interface-performance variables.....	88
5.4.3. Classification scheme for capability variables	89
5.4.4. Classification scheme for contingency variables.....	92
5.5. First empirical examination of propositions	94
5.6. Summary 1 st phase of analysis	97
6. Analysis of environmental influences on comparability of reliability, flexibility and inventory efficiency	100
6.1. Current situation and challenges	100
6.2. Theory development	103
6.3. Research methodology	109
6.4. Model development.....	114
6.4.1. Interface-performance in buyer-supplier relationships.....	114
6.4.2. Types of buyer-supplier relationships	117
6.4.3. Market- and production-specific contingencies.....	124

6.5. Survey development and sample description.....	128
6.6. Results and discussion of empirical analysis.....	131
6.6.1. Mean comparison.....	131
6.6.2. Analysis of covariance.....	133
6.7. Summary 2 nd phase of analysis	137
7. Analysis of dyadic control activities' mediating role in delivery reliability and flexibility.....	140
7.1. Current situation and challenges.....	140
7.2. Theory development	143
7.2.1. Elements of the research framework	144
7.2.2. Development of the hypothesized model	150
7.3. Research methodology.....	154
7.3.1. Development of the survey instrument.....	155
7.3.2. Sample description.....	157
7.3.3. Data quality.....	160
7.3.4. Relativization of performance values	162
7.4. Results of measurement and structural equation model	166
7.4.1. Measurement model.....	166
7.4.2. Structural equation model.....	170
7.5. Summary 3 rd phase of analysis.....	174

PART III
Critical appraisal & future research

8. Conclusions, limitations and implications for future research..... 180

8.1. Basic research results and key findings 180

8.2. Contributions to practice and managerial implications 183

8.3. Contributions to research and scientific implications 184

8.4. Limitations 186

8.5. Recommendations for future research 188

References..... 190

References (structured literature review)..... 206

Appendix..... 215

Performance Control in Buyer-Supplier Relationships
The Design and Use of Formal Management Control
Systems

Gebert, K.

2014, XIX, 224 p. 29 illus., Softcover

ISBN: 978-3-658-01892-4
