List of Figures	xiii
List of Tables	xv
List of Abbreviations	xvii
List of Symbols	xix
1. Introduction	1
1.1. Motivating Case Study	5
1.2. The Demand Fulfillment Problem in Multi-Stage Customer Hierarchies . . .	8
1.2.1. Heterogeneous Customer Segments	8
1.2.2. Multi-Stage Customer Hierarchies	10
1.2.3. Iterative Disaggregation and Allocation in Customer Hierarchies . .	11
1.3. Problem Focus and Research Questions	13
1.4. Overview of Approach	17
2. Supply Chain Planning and Demand Fulfillment	21
2.1. Supply Chain Planning	21
2.1.1. Supply Chain Management	22
2.1.2. Hierarchical Planning	25
2.1.3. Interrelations between Planning Tasks	33
2.1.4. The Position of the Customer Order Decoupling Point	37
2.1.5. Advanced Planning Systems	42
2.2. Demand Planning	46
2.2.1. Objectives and Planning Tasks	47
2.2.2. Demand Planning Structures and Forecasting Hierarchies	50
2.2.3. Demand Planning Processes and Forecasting Procedures	51
2.2.4. Demand Planning Controlling and Forecast Error Measures	58
2.2.5. Hierarchical Forecasting	63
2.3. Master Planning	77
2.3.1. Objectives and Planning Tasks	77
2.3.2. Basic Master Planning Model	79
2.4. Demand Fulfillment	81
2.4.1. Objectives and Planning Tasks	81
2.4.2. Types of Demand Fulfillment Systems	86
2.4.3. Basic Models for Demand Fulfillment	89
2.4.4. State of the Art: Demand Fulfillment in MTS Environments	98
2.5. Conclusions: Allocation Problems in Supply Chain Planning	105

3. Multi-Stage Customer Hierarchies	109
3.1. Formal Hierarchies	109
3.1.1. Trees and Hierarchies	110
3.1.2. Aggregation and Disaggregation	112
3.2. Decision-Making in Hierarchies	117
3.3. Customer Hierarchies and Hierarchical Sales Organizations	125
3.3.1. Customer Segmentation and Customer Profitability	125
3.3.2. A Formal Model of Customer Hierarchies	128
3.3.3. Hierarchical Sales Organizations	132
3.3.4. Customer Hierarchies in the Context of the Schneeweiß Framework	134
3.4. Forecast Misrepresentation in Customer Hierarchies	136
3.4.1. Sales Forecasting and Agency Problems	137
3.4.2. Compensation Schemes for Demand-Constrained Supply Chains	141
3.4.3. Compensation Schemes for Supply-Constrained Supply Chains	149
3.4.4. Forecast Misrepresentations: Empirical and Experimental Evidence	158
3.4.5. Application to Customer Hierarchies	162
3.5. Measures of Heterogeneity in Customer Hierarchies	171
3.5.1. Inequality and Heterogeneity Measurement	171
3.5.2. Standard Heterogeneity Measures	176
3.5.3. Generalized Entropy Inequality Measures and Theil's Index	181
3.5.4. Comparison of Heterogeneity Measures	190
4. Allocation Planning and Disaggregation in Customer Hierarchies	195
4.1. Notation and Formal Model	196
4.2. Existing Quantity-Based Allocation Schemes	202
4.2.1. Type 1: Based on Demand, Pro Rata	205
4.2.2. Type 2: Based on Another Key Figure, Pro Rata	205
4.2.3. Type 3: Based on Demand, Disproportionally	207
4.2.4. Type 4: Based on Another Key Figure, Disproportionally	208
4.2.5. Stochastic or Unknown Supply Quantities	209
4.3. Basic Profit-Based Allocation Schemes	211
4.3.1. Optimal Central Allocation (OCA)	215
4.3.2. Optimal Decentral Allocation (ODA)	215
4.3.3. Intuitive Decentral Allocation (IDA)	218
4.4. A Novel Allocation Scheme for Decentral Planners (ADA)	220
4.4.1. Basic Idea of the New Scheme	220
4.4.2. Approximation of Total Profit in a Subtree	222
4.4.3. Parameterization of the Total Profit Approximation	224
4.4.4. Basic Solution Approach	227
4.4.5. Alternative Solution Approach	234
4.5. Numerical Experiments	246
4.5.1. Simulation Environment	246
4.5.2. Base Case	250
4.5.3. Different Levels of Scarcity	252
4.5.4. Different Hierarchy Sizes	252
4.5.5. Different Levels of Customer Heterogeneity	253

4.5.6. Different Allocation Schemes at Different Hierarchy Levels	255
4.5.7. Summary and Discussion	261
5. Model Extensions: Forecast Errors and Enhanced Consumption Planning	263
5.1. Forecast Errors	264
5.1.1. Forecast Error Model	265
5.1.2. Numerical Experiments	268
5.2. Enhanced Quota Consumption Rules	279
5.2.1. Enhanced Consumption Rules in Customer Hierarchies	281
5.2.2. Numerical Experiments	288
5.3. Quota Retention and Virtual Safety Stocks	299
5.3.1. Stock Retention in Multi-Echelon Inventory Systems	300
5.3.2. Virtual Safety Stocks in Multi-Stage Customer Hierarchies	303
5.3.3. Numerical Experiments	305
6. Summary and Conclusions	315
6.1. Summary	315
6.2. Managerial Implications	322
6.3. Directions for Further Research	324
A. Appendix	329
A.1. The Theil Index at Aggregate Levels in Multi-Stage Customer Hierarchies	329
A.2. The Relationship Between Theil's Index and the Lorenz Curve	331
A.3. Proof of Lemma 6	338
A.4. Proofs of Lemmas 9 and 10	340
A.4.1. Existence of a Unique Solution	340
A.4.2. Closed-Form Solution Based on Cramer's Rule	343
A.5. Comparative Statics of the ADA-Based Allocation	352
Bibliography	355

Demand Fulfillment in Multi-Stage Customer Hierarchies

Vogel, S.

2014, XX, 377 p. 70 illus., Softcover

ISBN: 978-3-658-02863-3
