Abstract	xxv
Zusammenfassung	xxvii
1 Introduction	1
1.1 Motivation	1
1.2 Research Goals	5
1.3 Positioning concerning the Philosophy of Sciences	5
1.4 Structure of the Work	8
2 Problem Description and Fundamentals	11
2.1 Real-Time Enterprise - Organizational Concept for Manufacturing Enterprises	11
2.1.1 Vision, Principles, and Definition	12
2.1.2 Research Scopes, Gaps, and Challenges	14
2.1.3 Emergent Enablers	16
2.1.4 Summary and Research Goals	17
2.2 Principles and Fundamentals of Event Processing	18
2.2.1 Events and their Processing as a Fundamental Requirement for Business	18
2.2.2 Definitions and Circumscriptions of Events	21
2.2.3 Event Clouds, Event Streams, and Complex Events	24
2.2.4 Historical Background pertaining to Processing of Events ..	30
2.2.5 Event-Driven Architecture	35
2.2.6 Complex Event Processing	39
3 Requirements Analysis	51
3.1 Description of Application Area	51
3.1.1 Manufacturing - Economic Relevance and Classification ...	52
3.1.2 Small and Medium Sized Enterprises - Structure, Traits, and Challenges	55

3.2	Management Perspective	57
3.3	Engineering Perspective	60
3.3.1	Principles of Feedback Control	60
3.3.2	Multiple Control Loops across a Manufacturing Enterprise ..	61
3.4	Computer Science Perspective	69
3.5	Discussion of Perspectives	72
4	Event-Driven Framework for Real-Time Enterprise	73
4.1	Literature Review	73
4.1.1	Architectural Styles for Manufacturing Control	73
4.1.2	Research on Intelligent and Decentralized Control Approaches	74
4.1.3	Service-Oriented for Manufacturing	79
4.1.4	Convergence of Control and Physical Systems	80
4.1.5	Event Processing in Manufacturing	80
4.1.6	Summary	81
4.2	Process Model toward the Realization of RTE	82
4.2.1	Analysis and (Re-) Design of Value Creation Processes ...	83
4.2.2	Enterprise Data Model and Data Flow Diagrams	84
4.2.3	Knowledge Identification	85
4.2.4	Knowledge-Based Monitoring and Control of Manufacturing Processes	87
4.3	Event-Driven Framework for Real-Time Monitoring and Control ...	89
4.3.1	Outline of Architectural Components	89
4.3.2	Real-Time Acquisition of Process Data from Manufacturing Resources	91
4.3.3	Aggregation of Process Data for Forward and Backward Traceability	94
4.3.4	Online Tracking of Enterprise Process Entities	102
4.3.5	Detection of (Critical) Process Situations using CEP	106
5	Implementation of Solution Approach and Evaluation in a Foundry .	117
5.1	Sand Casting	117
5.1.1	Principle of Sand Casting	118
5.1.2	Sand Casting Process	119
5.2	Analysis of Business and Manufacturing Processes	120
5.3	Design of an Enterprise Data Model	121
5.4	Implementation of the Framework	121
5.4.1	Process Coverage	123
5.4.2	Tracking of Process Entities	125
5.4.3	Process Analysis using Historical Process Data	126
5.4.4	Real-Time Control of Sand Casting Processes	135
5.5	Evaluation of Manufacturing Process Improvements	141
5.5.1	Non-Measurable Improvements	142
5.5.2	Measurable Improvements	143

5.5.3 Comparison with Requirements	144
6 Summary, Conclusions and Future Work	145
References	149

The Concept of a Real-Time Enterprise in Manufacturing
Design and Implementation of a Framework based on
EDA and CEP

Metz, D.

2014, XXVIII, 167 p. 74 illus., Softcover

ISBN: 978-3-658-03749-9
