

2 History of the diesel engine	92 Unit injector system (UIS) and unit pump system (UPS)
3 Rudolf Diesel	94 System diagram of UIS for passenger cars
4 Mixture formation in the first diesel engines	96 System diagram of UIS/UPS for commercial vehicles
5 Use of the first vehicle diesel engines	
8 Bosch diesel fuel injection	
12 Areas of use for diesel engines	98 Unit injector system (UIS)
12 Suitability criteria	98 Installation and drive
12 Applications	99 Design
15 Engine characteristic data	102 Method of operation of UI for passenger cars
16 Basic principles of the diesel engine	105 Method of operation of UI for commercial vehicles
16 Method of operation	107 High-pressure solenoid valve
19 Torque and power output	
20 Engine efficiency	110 Unit pump system (UPS)
23 Operating statuses	110 Installation and drive
27 Operating conditions	110 Design
29 Fuel-injection system	112 Current-controlled rate shaping (CCRS)
30 Combustion chambers	
34 Fuels	114 Overview of common-rail systems
34 Diesel fuel	114 Areas of application
41 Alternative fuels for diesel engines	115 Design
46 Cylinder-charge control systems	116 Operating concept
46 Overview	120 Common-rail system for passenger cars
47 Turbochargers and superchargers	125 Common-rail system for commercial vehicles
56 Swirl flaps	
57 Intake air filters	128 High-pressure components of common-rail system
60 Basic principles of diesel fuel injection	128 Overview
60 Mixture distribution	130 Injector
62 Fuel-injection parameters	142 High-pressure pumps
71 Nozzle and nozzle holder designs	148 Fuel rail (high-pressure accumulator)
72 Overview of diesel fuel-injection systems	149 High-pressure sensors
72 Designs	150 Pressure-control valve
78 Fuel supply system to the low-pressure stage	151 Pressure-relief valve
78 Overview	152 Injection nozzles
80 Fuel filter	154 Pintle nozzles
82 Fuel-supply pump	156 Hole-type nozzles
86 Miscellaneous components	160 Future development of the nozzle
88 Supplementary valves for in-line fuel-injection pumps	162 Nozzle holders
90 Overview of discrete cylinder systems	164 Standard nozzle holders
90 Type PF discrete injection pumps	165 Stepped nozzle holders
	166 Two-spring nozzle holders
	167 Nozzle holders with needle-motion sensors

168 High-pressure lines

- 168 High-pressure connection fittings
- 169 High-pressure delivery lines

172 Start-assist systems

- 172 Overview
- 173 Preheating systems

178 Minimizing emissions inside of the engine

- 179 Combustion process
- 181 Other impacts on pollutant emissions
- 183 Development of homogeneous combustion processes
- 184 Diesel fuel injection
- 196 Exhaust-gas recirculation
- 199 Positive crankcase ventilation

200 Exhaust-gas treatment

- 201 NO_x storage catalyst
- 204 Selective catalytic reduction of nitrogen oxides
- 210 Diesel Particulate Filter (DPF)
- 218 Diesel oxidation catalyst

220 Electronic Diesel Control (EDC)

- 220 System overview
- 223 In-line fuel-injection pumps
- 224 Helix and port-controlled axial-piston distributor pumps
- 225 Solenoid-valve-controlled axial-piston and radial-piston distributor pumps
- 226 Unit Injector System (UIS) for passenger cars
- 227 Unit Injector System (UIS) and Unit Pump System (UPS) for commercial vehicles
- 228 Common Rail System (CRS) for passenger cars
- 229 Common Rail System (CRS) for commercial vehicles
- 230 Data processing
- 232 Fuel-injection control
- 243 Further special adaptations
- 244 Lambda closed-loop control for passenger-car diesel engines
- 249 Torque-controlled EDC systems
- 252 Control and triggering of the remaining actuators
- 253 Substitute functions
- 254 Data exchange with other systems

- 255 Serial data transmission (CAN)

- 260 Application-related adaptation ¹⁾ of car engines

- 264 Application-related adaptation ¹⁾ of commercial vehicle engines

- 269 Calibration tools

272 Electronic Control Unit (ECU)

- 272 Operating conditions
- 272 Design and construction
- 272 Data processing

278 Sensors

- 278 Automotive applications
- 278 Temperature sensors
- 280 Micromechanical pressure sensors
- 283 High-pressure sensors
- 284 Inductive engine-speed sensors
- 285 Rotational-speed (rpm) sensors and incremental angle-of-rotation sensors
- 286 Hall-effect phase sensors
- 288 Accelerator-pedal sensors
- 290 Hot-film air-mass meter HFM5
- 292 LSU4 planar broad-band Lambda oxygen sensor
- 294 Half-differential short-circuiting-ring sensors
- 295 Fuel-level sensor

296 Fault diagnostics

- 296 Monitoring during vehicle operation (on-board diagnosis)
- 299 On-board diagnosis system for passenger cars and light-duty trucks
- 306 On-board diagnosis system for heavy-duty trucks

308 Service technology

- 308 Workshop business
- 312 Diagnostics in the workshop
- 314 Testing equipment
- 316 Fuel-injection pump test benches
- 318 Testing in-line fuel-injection pumps
- 322 Testing helix and portcontrolled distributor injection pumps
- 326 Nozzle tests

328 Exhaust-gas emissions

- 328 Overview

328	Major components	349	European test cycle for passenger cars and LDTs
330	Combustion byproducts	349	Japanese test cycle for passenger cars and LDTs
332	Emission-control legislation	350	Test cycles for heavy-duty trucks
332	Overview	352	Exhaust-gas measuring techniques
334	CARB legislation (passenger cars/LDT)	352	Exhaust-gas test for type approval
338	EPA legislation (passenger cars/LDT)	355	Exhaust-gas measuring devices
340	EU legislation (passenger cars/LDT)	357	Exhaust-gas measurement in engine development
342	Japanese legislation (passenger cars/LDTs)	359	Emissions testing (opacity measurement)
343	U.S. legislation (heavy-duty trucks)		
344	EU legislation (heavy-duty trucks)		
346	Japanese legislation (heavy-duty trucks)		
347	U.S. test cycles for passenger cars and LDTs		

Diesel Engine Management

Systems and Components
