

Acknowledgments

I submitted this mathematical doctoral thesis in August 2011 to the faculty of natural sciences and mathematics of Heidelberg University and successfully passed its disputation on December 19, 2011.

I acknowledge the support by Deutsche Forschungsgemeinschaft (DFG) within the Internationales Graduiertenkolleg 710 *Complex processes: Modeling, Simulation and Optimization*, under grant BO864/12-1 within the Schwerpunktprogramm 1253 *Optimization with Partial Differential Equations*, and within the *Heidelberg Graduate School for Mathematical and Computational Methods in the Sciences (HGS)*. I am also grateful for support by Bundesministerium für Bildung und Forschung (BMBF) under grant 03BONCHD. Furthermore I would like to acknowledge support by the European Commission within the project *Embedded Optimization for Resource Constrained Platforms (EMBOCON)*.

I would especially like to thank: my advisers Hans Georg Bock and Rolf Rannacher; my mentors Sebastian Sager and Johannes Schlöder; my collaborators Jan Van Impe, Sebastian Engell, Moritz Diehl, Stefan Körkel, Ekaterina Kostina, Achim Küpper, and Filip Logist; my research stay hosts Moritz Diehl, Andreas Griewank, Matthias Heinkenschloss, Nick Trefethen, and Fredi Tröltzsch; my colleagues Jan Albersmeyer, Dörte Beigel, Kathrin Hatz, Christian Hoffmann, Christian Kirches, Simon Lenz, Andreas Sommer, Andreas Schmidt, and Leo Wirsching; my rocking friends Tommy Binford, Eddie Castillo, Rick Castillo, Roger Fletcher, Sean Hardesty, Denis Ridzal; my very close friends Tom Kraus, Anita and Micha Strauß, Evelyn and Tobias Stuwe; my siblings Susanne and Manuel; and my parents Maria and Michael.

I am indebted to Falk Hante, Christian Kirches, Mario Mommer, Sebastian Sager, and Johannes Schlöder for valuable comments on a first draft of this thesis.
