

Contents

List of Figures	XI
List of Tables	XIII
List of Abbreviations	XV
List of Symbols	XIX
1 Introduction	1
2 Classification of wind power technologies	3
2.1 Requirements of critical natural resources	3
2.2 Main generator types	6
2.3 Particularities of offshore turbines	11
2.4 Recapitulation	15
3 Market analysis of rare earth elements	17
3.1 The supply side	18
3.1.1 Reserves and resources	19
3.1.2 Mining, processing, international trade, and market failure	23
3.2 The demand side	30
3.2.1 Determinants of demand	30
3.2.2 Main applications of rare earth elements	31
3.3 Price trends	35
3.4 Mitigation options for market imbalance	39
3.4.1 Recycling	40
3.4.2 Substitution	42
3.5 Consequences for future market development	44
4 Estimates for future rare earth requirements from wind power deployment	49
4.1 Methodology and assumptions	49
4.1.1 The choice of an appropriate indicator	50
4.1.2 A pathway for wind power deployment	50
4.1.3 Technological progress expectations for wind turbines	54
4.2 Results	59

5	Application to ReMIND-R	63
5.1	The structure of ReMIND-R	63
5.1.1	The macroeconomic module	64
5.1.2	The energy system module	67
5.1.3	The climate module	68
5.2	Ways of implementing rare earth requirements of the wind power industry in ReMIND-R	69
5.2.1	Fixed demand coefficients	69
5.2.2	Modelling the REE market	70
5.2.3	Evaluation of the two approaches	73
6	Conclusion	77
	Bibliography	81

Wind Energy Deployment and the Relevance of Rare
Earths

An Economic Analysis

Brumme, A.

2014, XIX, 87 p. 21 illus., Softcover

ISBN: 978-3-658-04912-6
