Contents	IX
List of Tables	XIII
List of Figures	XV
List of Abbreviations	XXI
List of Symbols	XXV
1 Introduction	1
1.1 Logistics	1
1.2 Wireless Sensor Networks in Logistics	1
1.3 Logistical Requirements of Wireless Sensor Networks	3
1.4 Services in Wireless Sensor Networks	4
1.5 Objective	5
1.6 Application Scenarios	8
1.7 Contributions of this Thesis	9
1.8 Overview	10
2 State of the Art	13
2.1 Wireless Sensor Networks	13
2.1.1 Organisations and Standardisation Bodies	14
2.1.2 Marketing Alliances	24
2.1.3 Research Community	24
2.1.4 Commercial Companies	25
2.2 Service Discovery	26
2.2.1 Service discovery protocols in Internet Protocol networks	26
2.2.2 Service frameworks in WSN	27
2.3 Trickle Algorithm	33
2.3.1 Trickle Variables	33
2.3.2 Trickle Constants	34
2.3.3 Trickle Rules	34

2.3.4	Trickle Applicability	35
3	Service Distribution Algorithms	37
3.1	Requirements of a Service Distribution Algorithm	37
3.2	Flooding	37
3.3	Fixed Interval Pushing	38
3.4	Fixed Interval Pushing with Vanish Support	38
3.5	Trickle	39
3.6	Trickle with Vanish Support	39
3.7	Algorithm Comparison	40
4	Wireless Sensor Services Network Framework	43
4.1	Service Layer Software Components	45
4.2	Service Frame Format	47
4.3	Service Forwarding in the Wireless Sensor Network	49
4.4	Internet Host Service Application	50
5	Evaluation Metrics and Scenarios	51
5.1	Evaluation Metrics	51
5.1.1	Number of Packets Sent	51
5.1.2	Energy Spent	52
5.1.3	Time to Consistency	52
5.1.4	Scalability with the Number of Nodes	52
5.1.5	Scalability with the Number of Services	52
5.2	Scenarios	52
5.2.1	Line Scenario	53
5.2.1.1	Only Direct Neighbours	53
5.2.1.2	Neighbours According to Propagation Model	53
5.2.2	Grid Scenario	53
5.2.3	Random Scenario	53
5.2.4	Container Scenario	54
6	Simulation of Service Discovery	59
6.1	Simulation Environment	59
6.2	Simulation Evaluation	60
6.3	Simulation Results	60
6.3.1	Statistical Significance	60
6.3.2	Uniform Spatial Distribution of Sent Packets	63
6.3.3	Results for Grid and Random Scenarios	64

6.3.4	Trickle Parameter Analysis	64
6.3.5	95 Percentiles and Application Requirement Optimisation	66
6.3.6	Trickle and Push Comparison	67
6.3.7	Service Vanish Comparison	69
6.3.8	Routing Protocol Simulation Results	70
7	Analytical Modelling of Service Discovery	75
7.1	Models for the Service Distribution	75
7.1.1	Analytical Model for the Time to Consistency	75
7.1.1.1	Base Distributions $f_{h,c,a}(t)$	77
7.1.1.2	Relative Frequency $p_{h,c,a}(t)$	86
7.1.2	Analytical Model for the Number of Packets Sent	87
8	Measurements of Service Discovery in Wireless Sensor Networks	93
8.1	Measurement Setup	93
8.1.1	Link Assessment Measurements	94
8.2	Measurement Results	100
9	Evaluation	101
9.1	Comparison of Analytical Model and Simulation Results	101
9.1.1	Distribution Delay	102
9.1.2	Mean Number of Sent Packets	118
9.1.2.1	Mean Number of Packets: Varying K, N=4, Line	118
9.1.2.2	Mean Number of Packets: Varying K, N=64, Line	122
9.1.2.3	Mean Number of Packets: Varying N, K=1, Line	124
9.1.2.4	Mean Number of Packets: Varying N, K=3, Line	126
9.1.2.5	Mean Number of Packets: Line/Grid, N=4, K=3	128
9.1.2.6	Mean Number of Packets: Line/Grid, N=64, K=3	131
9.1.2.7	Mean Number of Packets: Line/Grid, N=225, K=3	133
9.1.3	Runtime behaviour	135
9.2	Comparison of Measurement Results with Simulations and Analytical Model	135
9.2.1	Delay	136
9.2.2	Mean Number of Sent Packets	140
10	Conclusions and Outlook	141
10.1	Conclusions	141
10.2	Outlook	143
A	Other contributions to communication networks research	145

B	The Minimum of Several Random Variables	147
C	The Kaplan-Meier Estimator	149
D	Simulated PRR Topologies (Line-CPM)	151
E	Simulated PRR Topologies (Grid-CPM)	155
F	Radio Models	159
F.1	Signal Attenuation Model	159
F.2	Packet Reception Ratio Model	159
G	Approximating Step-Wise Linear Model	161
G.1	Approximating Linear Model for Line Scenarios	161
G.2	Approximating Linear Model for Grid Scenarios	161
	Bibliography	163

Services in Wireless Sensor Networks
Modelling and Optimisation for the Efficient Discovery of
Services

Becker, M.

2014, XXVII, 179 p. 99 illus., 7 illus. in color., Softcover

ISBN: 978-3-658-05401-4
