Abstract VII
Kurzfassung IX
List of Abbreviations XV
List of Symbols XVII

Chapter 1 Introduction 1

1.1 Motivation 1
1.2 Objective and Contribution of this Thesis 3
1.3 Outline of this Thesis 6

Chapter 2 The Research Domain of this Thesis and its State of the Art 7

2.1 Advanced Driver Assistance Systems 7
2.1.1 Advanced Driver Assistance Functions 7
2.1.2 Sensors for Driver Assistance 8
2.1.3 Actors for Driver Assistance 11
2.2 Traffic Situation Description and Analysis as a Key Enabler for ADAS 11
2.2.1 Situation Awareness and Comprehension 11
2.2.2 Situation Description in the Driving Control Loop 13
2.2.3 Aspects of Situation Description Relevant to This Thesis 14
2.2.4 Situation Feature Relevance 18
2.2.5 Traffic Situation Description and Interpretation Approaches 19
2.2.6 Knowledge-Based Traffic Situation Description and Understanding 21
2.3 Delimitation of this Thesis 25

Chapter 3 Theoretical Foundations Relevant to this Thesis 27

3.1 Mutual Information Feature Selection 28
3.1.1 Feature Selection 28
3.1.2 Information Theory, Entropy and Mutual Information 29
3.1.3 Mutual Information Feature Selection Methods 30
3.1.4 Random Forests, a Machine Learning Algorithm 33
3.2 Knowledge Representation 34
3.2.1 Methods for Knowledge Representation 34
3.2.2 Ontologies 35
3.2.3 Description Logics 36
3.2.4 Logic Reasoning 37
3.2.5 Probabilistic Logic Reasoning: State of the Art 39
3.3 Summary 43

Chapter 4 Situation Feature Relevance on Measurement Data 45

4.1 Relevance of Situation Features for Driver Assistance Functions 46
4.1.1 Selection of Relevant Situation Features 46
4.1.2 Evaluating Generated Features 46
4.1.3 Finding Causes for Salient Effects 47
4.1.4 Feature Selection for Automated Machine Learning 47
4.2 Adaptions to Improve Accuracy 47
4.2.1 Related Methodical Errors 48
4.2.2 Improved Criterion: Minimum Class Redundancy Maximum Relevance Ranking (MCRMR) 48
4.2.3 Error Calculations 49
4.2.4 Variation by Weighting to Reduce Numerical Effects 51
4.2.5 Experimental Results 52
4.3 Application on Measurement Data from Endurance Runs 56
4.3.1 The Process of Data Preparation and Ranking Creation 57
4.3.2 Data Description 58
4.3.3 Definition of the Driver Intention to be Estimated 58
4.3.4 Feature Ranking Results 59
4.3.5 Results of Driver Intention Recognition with the Random-Forest-Classifier 62
4.3.6 Comparison of Time Consumption to Build Rankings 64
4.4 Multi Feature Rankings 65
4.4.1 Maximum Relevance for Multiple Features 65
4.4.2 Reducing Redundancy among Pairs of Features 68
4.5 Relevance of Historical Measurement Values 69
4.5.1 Preparation of Feature Time Series 71
4.5.2 Determination of Historical Relevance with Mutual Information 73
4.5.3 Simulation Results on Historical Relevance of Features 81
4.6 Summary 90

Chapter 5 Knowledge-Based Traffic Situation Description 93

5.1 An Ontology for the Description of Complex Intersection Situations 93
5.1.1 Simple Intersection Description 93
5.1.2 Complex Intersection and Road Network Ontology 94
5.1.3 Reasoning Results of an Intersection Example 101
5.1.4 Expansions for Partial Knowledge Modeling 104
5.1.5 Time Consumption for Reasoning and Implementation Issues for DAS 106
5.2 Asynchronous Real-Time Framework for Knowledge-Based DAS 108
5.2.1 Simulation of Knowledge-Based Driver Assistance Systems 108
5.2.2 Asynchronous Real-Time Framework 108
5.2.3 Multilevel-Structure of Ontology Functionality for Online Traffic Situation Description 110
5.2.4 Intersection Simulation 113

5.3 Knowledge-Based Driver Assistance Functions ... 115
5.3.1 Application Scenarios and Functions ... 115
5.3.2 Exemplary IDAF-Realizations of TISDO-based Driver Assistance Systems ... 118
5.3.3 Benefit of Knowledge-Based Situation Description ... 122
5.4 Uncertainty Handling ... 124
5.4.1 Sensor Uncertainty ... 124
5.4.2 Certainty and Uncertainty of Ontology Axioms and Rules ... 129
5.4.3 Handling Prior Probabilities with Ontologies ... 129
5.4.4 Ghost-Objects for Unknown Information ... 136
5.5 Summary ... 137

Chapter 6 Relevance by Mutual Information on Ontology Features ... 139

6.1 Selecting Important Ontology Features ... 139
6.1.1 Features for Ontology Elements ... 140
6.1.2 Combining Ontology Elements as Element Chain Features ... 143
6.2 Application Scenarios ... 146
6.3 Sample Application of an Ontology Feature Ranking ... 147
6.3.1 Data and Labeling Description ... 147
6.3.2 Ontology Feature Ranking Results on Labeled Data ... 148
6.4 Summary ... 150

Chapter 7 Conclusion ... 153

7.1 Contributions ... 153
7.2 Outlook ... 156

Appendix A Full Ranking Tables ... 161

A.1 Maximum Relevance Ranking of two Joint Features ... 161
A.2 Maximum Relevance Ranking of Semantic Features ... 164
References ... 167
