Preface	V
List of Notations	XIII
List of Figures	XVII
List of Tables	XIX
1 Introduction	1
1.1 The fault diagnosis problem	2
1.2 Classification of fault diagnosis methods	2
1.3 Motivation and objective	5
1.4 Outlines	8
2 An overview of fault diagnosis techniques	11
2.1 Representation of the technical process	12
2.2 Model-based fault diagnosis techniques	14
2.2.1 Fault detection filter	14
2.2.2 Diagnostic observer	15
2.2.3 Parity space approach	16
2.2.4 Relationship between PS and DO	18
2.3 Statistical process monitoring	20
2.3.1 Principal component analysis	20
2.3.2 Partial least squares	24
2.4 Subspace-based design of FDD systems	27
2.5 Concluding remarks	30

3	Fault detection in multimode nonlinear systems	31
3.1	Preliminaries and problem formulation	33
3.2	Modified PLS approach	34
3.3	Multimode process monitoring	36
3.3.1	Estimation of model parameters	36
3.3.2	Design of monitoring scheme	41
3.4	An illustrative example	43
3.5	Concluding remarks	45
4	Fault detection in multimode nonlinear dynamic systems	47
4.1	Hybrid system identification	48
4.2	Preliminaries and problem formulation	50
4.3	Identification of PS-based residual generator for multimode systems	52
4.4	Fault Detection Scheme	58
4.5	An illustrative example	61
4.6	Concluding remarks	63
5	Fault diagnosis in multimode nonlinear processes	65
5.1	Preliminaries	66
5.2	Probabilistic fault diagnosis in multimode processes	68
5.3	An illustrative example	71
5.4	Concluding remarks	72
6	Bayesian approach for fault treatment	75
6.1	Preliminaries and problem formulation	76
6.2	Estimation of the fault probability	76
6.3	Decision support system	79
6.4	Probabilistic decision support system	80
6.5	An illustrative example	81
6.6	Concluding remarks	86

7	Application and benchmark study	87
7.1	Laboratory CSTH setup	87
7.2	Multimode fault diagnosis in CSTH testbed	90
7.3	Paper and board machine	92
7.3.1	Dryer section	95
7.3.2	Steam-filled cylinder model	96
7.4	Application of static FD method on dryer section . . .	99
7.5	Application of dynamic FD method on dryer section .	104
7.6	Concluding remarks	108
8	Summary	109
	Appendices	113
A	Expectation-maximization algorithm	115
A.1	Derivation of EM algorithm	115
A.1.1	Maximum likelihood estimation	115
A.1.2	Expectation-maximization	116
B	CSTH Simulink benchmark	119
	Bibliography	121

Data-Driven Design of Fault Diagnosis Systems

Nonlinear Multimode Processes

Haghani Abandan Sari, A.

2014, XIX, 136 p. 39 illus., Softcover

ISBN: 978-3-658-05806-7
