

Table of Contents

I.	Setting the Stage	1
1.	The Dilemma of Distributed Organizing	3
2.	Distributed Organizing in Practice	9
2.1	<i>Politics</i>	9
2.2	<i>Research and Innovation</i>	10
2.3	<i>Product and Service Design</i>	11
2.4	<i>Work Organization</i>	13
3.	Framing Distributed Organizing Theoretically	15
4.	Structure of the Thesis	19
II.	From Organizations to Distributed Organizing: Concepts of Order Creation.....	25
1.	Overview.....	27
2.	Order Creation from an Institutional Perspective: Market, Bureaucracy, and Community	29
2.1	<i>Market: Price and the Invisible Hand</i>	30
2.2	<i>Bureaucracy: Authority and Planning & Control</i>	32
2.3	<i>Community: Trust and Discourse</i>	34
2.4	<i>Distributed Organizing: Disassembling and Reassembling Market, Bureaucracy, and Community</i>	36
3.	Order Creation from a Systemic Perspective: Information Flows and Complexity	39
3.1.	<i>Institutional Forms and Information Flows</i>	39
3.2.	<i>Complexity and Distributed Organizing: From Environment to Co-evolving Ecosystem</i>	44
3.3.	<i>Explaining Systemic Order Creation: Requisite Variety and Effective Complexity</i>	48
3.4.	<i>Distributed Organizing: Coping with Complexity through Codification and Abstraction</i>	53
4.	Order Creation from a Transactional Perspective: Creating Practices from Sensemaking Processes	57
4.1.	<i>Decision-making vs. Sensemaking</i>	57
4.2.	<i>Cognitive and Affective Elements of Sensemaking</i>	60
4.3.	<i>Practices: Enabling Embodied Sensemaking in Distributed Organizing</i>	64
4.4.	<i>Distributed Organizing: Coping with External Complexity by Creating and Invoking Practices</i>	67

5.	Challenges in Distributed Organizing: Ambiguity, Bounded Rationality, and Computer-Mediation.....	69
5.1.	<i>Ambiguity: Balancing Complexity and Ambiguity Reduction.....</i>	69
5.2.	<i>Bounded Rationality: Mental Models and Human Information Processing</i>	70
5.3.	<i>Computer-Mediation: ICT Enabled Communication.....</i>	71
III.	Information Systems for Distributed Organizing	73
1.	Overview.....	75
2.	Institutional Paradigms: Systemic Order Creation in Information Systems	77
2.1	<i>The Bureaucratic Paradigm: Achieving Systemic Order by Modeling Structures and Processes</i>	79
2.2	<i>The Market Paradigm: Achieving Systemic Order by Incentivizing Allocation of Products and Services.....</i>	84
2.3	<i>The Community Paradigm: Achieving Systemic Order by Hyperlinking Discourse.....</i>	86
2.4	<i>Distributed Organizing Support: Complex Adaptive Information Systems and the Differentiation of User and Designer</i>	90
3.	Ontologies and Cognitive Maps: Transactional Order Creation through Disambiguating Cognition...93	
3.1.	<i>External Representation of Conceptualizations: Cognitive Maps and Ontologies</i>	93
3.2.	<i>Ontology Creating Methods: Degree of Emergence vs. Number of Agents</i>	98
3.3.	<i>Meaning Creation in Cognitive Maps and Ontologies</i>	105
3.4.	<i>Distributed Organizing Support: Mitigating the Effects of the Semantic Gap and the Real-Virtual Divide</i>	107
4.	Facilitating Order Creation in Distributed Organizing: Triggering Practices to Answer External Complexity.....	109
4.1.	<i>Coping with Complexity through Codification: Semantic Information Systems.....</i>	109
4.2.	<i>Coping with Complexity through Abstraction: Recommender Systems and Automated Facilitation</i>	112
4.3.	<i>Distributed Organizing Support: Recommendation and Facilitation through Ontology-based Cognitive maps</i>	114

5.	Ontology-based Distributed Organizing: Answering the Challenges of Distributed Organizing	117
5.1.	<i>Ontology-based Distributed Organizing: Supporting the Search for Adaptive Responses to Complexity in Sensemaking Processes</i>	119
5.2.	<i>Emergent Ontologies: Creating and Structuring Ontology-based Cognitive Maps</i>	120
5.3.	<i>Adaptive Filters: Recommending Similar and Dissimilar Cognitive Maps</i>	123
5.4.	<i>Facilitated Interaction: Supporting Sensemaking Processes in Distributed Organizing</i>	124
IV.	Empirical Study: Themes of Interaction in Distributed Organizing	127
1.	Overview	129
2.	Method and Data: Research Question, Field of Research, Data Collec- tion & Analysis	131
2.1.	<i>Research Question</i>	131
2.2.	<i>Field of Research: A German Research Network</i>	132
2.3.	<i>Data Collection and Data Analysis</i>	134
3.	Findings: Themes of Interaction in a Network of Researchers	139
3.1.	<i>Themes of Interaction and their Variants</i>	139
3.2.	<i>Interrelating Themes of Interaction</i>	150
4.	Discussion: Creating Transactional Order using Levers of Ambiguity in Sensemaking Processes	153
4.1.	<i>Answering Complexity through Themes of Interaction</i>	153
4.2.	<i>Form and Content as Levers of Ambiguity</i>	155
4.3.	<i>Increasing and Decreasing Ambiguity in Distributed Organizing</i>	156
5.	Creating Systemic Order: Deriving Challenges for Information Sys- tems Design	159
5.1.	<i>Planning vs. Enacting: Codifying Configurations of Levers of Ambiguity in the Enactment Phase</i>	161
5.2.	<i>Opposing vs. Concurring Narratives: Refining Configurations of Levers of Ambiguity in the Selection Phase</i>	161
5.3.	<i>Conservative vs. Progressive Narratives: Saving and Sharing Configurations of Levers of Ambiguity in the Retention Phase</i>	163

V.	Ensembler Suite: A Support System for Ontology-based Distributed Organizing.....	165
1.	Overview.....	167
2.	From Organizing a Network of Researchers to a Support System for Ontology-based Distributed Organizing.....	169
2.1.	<i>Design Science: Creating Theories and Artifacts in Information Systems Research.....</i>	169
2.2.	<i>An Initial Idea of Distributed Organizing Support for a Network of Researchers.....</i>	172
3.	Requirements for a Technical Support System for Ontology-based Distributed Organizing	181
3.1.	<i>General Requirements</i>	181
3.2.	<i>Specific Requirements.....</i>	184
4.	System Concept: A Support System for Collaboratively Coping with Complexity.....	191
4.1.	<i>The ENSEMBLER SUITE: Enacter, Selector, and Retainer</i>	192
4.2.	<i>System Architecture and Technical Components</i>	197
5.	System Implementation: A Proof-of-Concept Implementation of the ENSEMBLER SUITE.....	199
5.1.	<i>Proof-of-Concept Implementation of Enacter</i>	200
5.2.	<i>Proof-of-Concept Implementation of Selector</i>	204
5.3.	<i>Proof-of-Concept Implementation of the Retainer.....</i>	205
5.4.	<i>Evaluation of System Conceptualization and Proof-of-Concept Implementation.....</i>	207
VI.	Discussion and Conclusion.....	211
1.	Overview.....	213
2.	Final Summary and Contributions of the Dissertation	215
3.	Reflection: Pattern Prototypes in Different Scenarios.....	221
3.1.	<i>Scenarios for Applying Ontology-based Distributed Organizing and the ENSEMBLER SUITE</i>	221
3.2.	<i>Results from Applying Ontology-based Distributed Organizing: Pattern Prototypes for Distributed Organizing</i>	223
4.	Managerial Implications.....	225
4.1.	<i>Structuring Interaction in Distributed Organizing</i>	225
4.2.	<i>The Role of the Manager in Distributed Organizing.....</i>	227
5.	Limitations and Directions for Future Research	229
5.1.	<i>Limitations</i>	
5.2.	<i>Directions for Future Research in Organization Science.....</i>	229
5.3.	<i>Directions for Future Research in Information Systems.....</i>	232
