**Part I Theory, Compilation and Measurement of Human Green Development Index (HGDI)**

<b>1</b>	<b>Theoretical Rationale Behind HGDI.....</b>	<b>3</b>
	Xiaoxi Li	
	Reference .....	5
<b>2</b>	<b>HGDI Compilation Principles .....</b>	<b>7</b>
	Xiaoxi Li	
2.1	Effective but Limited .....	7
2.2	Combining Green and Development.....	8
2.3	Shared Responsibility and Equal Measurement .....	8
2.4	Inclusive and Equal Principle of Human Development .....	8
<b>3</b>	<b>Choosing HGDI Indicators and Constructing Indicator System .....</b>	<b>11</b>
	Xiaoxi Li and Yimeng Liu	
<b>4</b>	<b>Choose Countries for HGDI Measurement .....</b>	<b>15</b>
	Xiaoxi Li and Tao Song	
<b>5</b>	<b>Approaches to Measure HGDI .....</b>	<b>17</b>
	Xiaoxi Li, Ning Cai, and Yang Liu	
	References.....	20
<b>6</b>	<b>Results and Analysis of HGDI Measurements .....</b>	<b>21</b>
	Xiaoxi Li	

<b>7</b>	<b>Five Suggestions for SDGs—Inspirations from HGDI Measurement</b> .....	<b>27</b>
	Xiaoxi Li	
7.1	The Realization of the Global SDGs Requires Combining the Overall Planning and a Clear Focus .....	27
7.2	Combination of Equal Measurement Principle and Respective Implementation According to National Conditions .....	28
7.3	Joint Efforts by Governments, Societies and Citizens Are Required to Achieve the Global SDGs .....	28
7.4	Combining Responsibilities and Opportunities in the Delivery of the Global SDGs .....	29
7.5	Combining the Green Development Endeavours of Countries and the Establishment of New Inter-state Partnerships .....	30
 <b>Part II Human Green Development Index (HGDI) Indicators Interpretation</b>		
<b>8</b>	<b>Extreme Poverty Indicator: Proportion of Population Below Minimum Level of Dietary Energy Consumption</b> .....	<b>33</b>
	Qi Zhang and Fei Li	
8.1	Reasons for Using the Indicator “Proportion of Population Below Minimum Level of Dietary Energy Consumption” in HGDI .....	33
8.1.1	Meaning of the Indicator “Proportion of Population Below the Minimum Dietary Energy Consumption” .....	34
8.1.2	Poverty Indicators from Multi Perspectives .....	34
8.1.3	Advantage of “Proportion of Population Below Minimum Level of Dietary Energy Consumption” Compared with Other Indicators of the Kind .....	35
8.2	Statistical Features of “Proportion of Population Below Minimum Level of Dietary Energy Consumption” .....	44
8.2.1	Features of Data of Different Countries for 2010 .....	45
8.2.2	Trends in the “Proportion of Population Below the Minimum Level of Dietary Energy Consumption”, 1991–2010 .....	45
	References .....	48

<b>9</b>	<b>Income Indicator: Inequality-Adjusted Income Index.....</b>	<b>51</b>
	Shengling Zhang and Ning Cai	
9.1	Reasons for Using the “Inequality-Adjusted Income Index”.....	52
9.1.1	Meaning of the “Inequality-Adjusted Income Index”.....	52
9.1.2	Advantages Compared with Other Indicators of the Kind .....	52
9.1.3	International Influence of the Indicator “Inequality-Adjusted Income Index” .....	54
9.2	Statistical Features of “Inequality-Adjusted Income Index”.....	54
9.2.1	Statistical Features of the Index in 2010.....	54
9.2.2	Trends of the “Income Index” in the Traditional HDI Between 1990 and 2010.....	56
	References.....	58
<b>10</b>	<b>Health Indicator: Inequality-Adjusted Life Expectancy Index.....</b>	<b>59</b>
	Zhanjun Zhang and Ning Cai	
10.1	Reasons for Using the “Inequality-Adjusted Life Expectancy Index” .....	60
10.1.1	Meaning of the “Inequality-Adjusted Life Expectancy Index” .....	60
10.1.2	Advantages Compared with Other Indicators of the Kind .....	61
10.1.3	International Influence of the “Inequality-Adjusted Life Expectancy Index” .....	62
10.2	Statistical Features of “Inequality-Adjusted Life Expectancy Index”.....	63
10.2.1	Statistical Features of the Index in 2010.....	63
10.2.2	Trends of “Life Expectancy Index” in the Traditional HDI Between 1990 and 2010 .....	64
	References.....	66
<b>11</b>	<b>Educational Indicator: Inequality-Adjusted Education Index.....</b>	<b>69</b>
	Yuhong Du and Ning Cai	
11.1	Reasons for Selecting the “Inequality-Adjusted Education Index” .....	70
11.1.1	Meaning of the “Inequality-Adjusted Education Index” .....	70
11.1.2	Advantages Compared with Other Indicators of the Kind .....	70
11.1.3	International Influence of the “Inequality-Adjusted Education Index” .....	72

11.2	Statistical Feature of the “Inequality-Adjusted Education Index” .....	72
11.2.1	Statistical Features of the Index in 2010 .....	73
11.2.2	Trends of the “Education Index” in the Traditional HDI During 1990 and 2010 .....	73
	References .....	76
<b>12</b>	<b>Sanitation Indicator: “Proportion of Population Using an Improved Sanitation Facility” .....</b>	<b>77</b>
	Nuo Wang and Tao Song	
12.1	Reasons for Using “Proportion of Population Using an Improved Sanitation Facility” in HGDI .....	77
12.1.1	Meaning of Sanitation Indicator .....	77
12.1.2	Meaning of the Indicator “Proportion of Population Using an Improved Sanitation Facility” .....	78
12.1.3	International Influence of the Indicator .....	79
12.2	Methods for Selecting “Proportion of Population Using an Improved Sanitation Facility” .....	80
12.2.1	Comprehensive Data Collection .....	80
12.2.2	Comparison and Selection of Sanitation Indicators .....	80
12.2.3	Introduction and Explanation of the Auxiliary Indicator .....	89
12.3	Statistic Features of “Proportion of Population Using an Improved Sanitation Facility” .....	89
12.3.1	Statistical Features of the Indicator in 2010 .....	90
12.3.2	Dynamic Changes of the Indicator During 1990 and 2010 .....	90
<b>13</b>	<b>Energy Indicator: Primary Energy Intensity .....</b>	<b>95</b>
	Weibin Lin and Yingzi Li	
13.1	Reasons for Using “Primary Energy Intensity” in HGDI .....	95
13.1.1	Energy Intensity Is an Important Indicator to Measure Energy Efficiency .....	96
13.1.2	“Primary Energy Intensity” Is Commonly Used by International Research Institutes and World-Famous Indexes .....	96
13.2	Methods for Selecting “Primary Energy Intensity” .....	99
13.2.1	Comprehensive Data Collection .....	99
13.2.2	Indicator Comparison and Selection .....	108
13.2.3	Data Acquisition and Indicator Sorting and Compilation .....	109
13.2.4	Proportion of Non-fossil Fuels in Primary Energy Consumption Is Included in the Evaluation System as an Auxiliary Additional Indicator .....	110

13.3	Statistic Features of “Primary Energy Intensity” .....	110
13.3.1	Rankings and Features of the Indicator in 2010 .....	110
13.3.2	Changes of Different Countries in Primary Energy Intensity, 1990–2010 .....	112
<b>14</b>	<b>Climate Change Indicator: CO<sub>2</sub> Emissions Per Capita</b> .....	<b>117</b>
	Yimeng Liu and Hezhong Tian	
14.1	Reasons for Using “CO <sub>2</sub> Emissions Per Capita” .....	117
14.1.1	Anthropogenic Emission of GHGs Has Caused Global Warming and Seriously Influenced Human Activities.....	118
14.1.2	CO <sub>2</sub> Emissions Are the Largest Source of Anthropogenic GHGs .....	118
14.1.3	“CO <sub>2</sub> Emissions” Is a Major Indicator for Monitoring Global Climate Change.....	119
14.2	Methods for Selecting “CO <sub>2</sub> Emissions Per Capita” .....	119
14.2.1	Major Climate Change Indicators and Their Releasing Agencies .....	120
14.2.2	Indicator Selection and Data Source .....	120
14.3	Status and Evolution of “CO <sub>2</sub> Emissions Per Capita” by Country .....	128
14.3.1	Statistical Features of “CO <sub>2</sub> Emissions Per Capita” in Different Countries in 2010.....	128
14.3.2	Dynamic Changes of “CO <sub>2</sub> Emissions Per Capita” by Country, 1990–2010 .....	128
<b>15</b>	<b>Air Pollution Indicator: PM<sub>10</sub></b> .....	<b>133</b>
	Hezhong Tian and Yimeng Liu	
15.1	Reasons for Using the Air Pollution Indicator “PM <sub>10</sub> ” in HGDI .....	133
15.1.1	Major Air Pollutants Have Adverse Influences on Environment and Human Health.....	134
15.1.2	Impacts of Particulate Pollutants on Human Health Are Especially Serious .....	134
15.1.3	PM <sub>10</sub> Is a Representative, Mature and Widely-Used Indicator for Monitoring Air Pollution .....	135
15.2	Methods for Selecting “PM <sub>10</sub> ” .....	137
15.2.1	Major Air Pollution Indicators and Their Releasing Agencies.....	137
15.2.2	Indicator Selection and Data Source .....	137
15.3	Status and Evolution of “PM <sub>10</sub> ” in Different Countries.....	147
15.3.1	Statistic Features of “PM <sub>10</sub> ” by Country in 2010.....	147
15.3.2	Dynamic Changes of the PM <sub>10</sub> Level in Different Countries, 1990–2010 .....	149
	Reference .....	153

<b>16</b>	<b>Land Indicator: Terrestrial Protected Areas of Total Land Area</b> .....	155
	Zhengwang Zhang and Yang Liu	
16.1	Reasons for Using “Terrestrial Protected Areas of Total Land Area” in HGDI .....	155
16.1.1	Meaning of the Land Indicator .....	156
16.1.2	Meaning of the Indicator “Terrestrial Protected Areas of Total Land Area” .....	156
16.1.3	International Influence of the Indicator “Terrestrial Protected Areas of Total Land Area” .....	158
16.2	Methods for Selecting “Terrestrial Protected Areas of Total Land Area” .....	159
16.2.1	Comprehensive Data Collection .....	159
16.2.2	Indicator Comparison and Selection .....	159
16.3	Statistical Features of “Terrestrial Protected Areas of Total Land Area” .....	165
16.3.1	Features of the Data for 2010 .....	165
16.3.2	Trends in All Countries, 1990–2010 .....	166
	References .....	169
<b>17</b>	<b>Forest Indicator: Forest Area (% of Land Area)</b> .....	171
	Tianming Wang and Fei Li	
17.1	Reasons for Using “Forest Area (% of Land Area)” in HGDI .....	172
17.1.1	Forest Is the Basis for Human Green Development.....	172
17.1.2	“Forest Area (% of Land Area)” Is an Important Indicator of the Quantity of Forest Resource.....	174
17.2	Methods for Selecting “Forest Area (% of Land Area)” .....	176
17.3	Selection of “Other Wooded Land % of Land Area” as the Auxiliary Indicator .....	176
17.4	Statistic Features of “Forest Area (% of Land Area)” .....	183
17.4.1	Features of “Forest Area (% of Land Area)” for Various Countries, 2010 .....	183
17.4.2	Trends in “Forest Area (% of Land Area)”, 1990–2010.....	184
	References .....	187
<b>18</b>	<b>Water Indicator: Proportion of Population Using an Improved Drinking-Water Source</b> .....	189
	Hongrui Wang and Tao Song	
18.1	Reasons for Using “Proportion of Population Using an Improved Drinking-Water Source” in HGDI.....	189

18.1.1	Meaning of the Water Indicator .....	190
18.1.2	Meaning of the Indicator “Proportion of Population Using an Improved Drinking-Water Source” .....	190
18.1.3	International Influence of the Indicator “Proportion of Population Using an Improved Drinking-Water Source” .....	191
18.2	Methods for Selecting “Proportion of Population Using an Improved Drinking-Water Source” .....	192
18.2.1	Comprehensive Data Collection .....	192
18.2.2	Indicator Selection .....	192
18.3	Statistic Features of “Proportion of Population Using an Improved Drinking-Water Source” .....	201
18.3.1	Statistical Feature of the Indicator in 2010 .....	201
18.3.2	Dynamic Changes of the Indicator During 1990 and 2010 .....	201
<b>19</b>	<b>Ecological Indicator: Percentage of Threatened Animal Species in Total Number of Species .....</b>	<b>207</b>
	Ruixue Bai and Zhengwang Zhang	
19.1	Reasons for Selecting the Indicator “Percentage of Threatened Animal Species in Total Number of Species” .....	208
19.1.1	Meaning of the Biodiversity Indicator .....	208
19.1.2	Meaning of the Biodiversity Indicator .....	209
19.1.3	International Influence of the Indicator “Percentage of Threatened Animal Species in Total Number of Species” .....	210
19.2	Methods for Selecting the Indicator “Percentage of Threatened Animal Species in Total Number of Species” .....	211
19.2.1	Comprehensive Search .....	211
19.2.2	Indicator Comparison .....	220
19.3	Statistical Features of the Indicator .....	221
19.3.1	Statistical Features of the Indicator in 2010 .....	221
19.3.2	Trends of the Indicator During 1990–2000 .....	222
19.4	Selection of the Auxiliary Indicator .....	223
19.4.1	Reasons for Selecting “Percentage of Threatened Animal Species in Total Number Species” as the Auxiliary Indicator .....	223
19.4.2	Data of Various Countries for the Auxiliary Indicator .....	224

**Appendix and Attached Tables**

**Appendix: Comparison Between HGDI and IHDI Rankings..... 229**
