

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background and Motivation	1
1.2	Literature Review	2
1.2.1	Studies of Interactions Between Flexible Plates and Fluids.	2
1.2.2	Development of Soap Film Tunnels	6
1.3	Research Topics	9
1.4	Outline	10
	References	11
<b>2</b>	<b>Experimental Apparatuses and Measurements</b>	<b>13</b>
2.1	Soap Film Tunnels.	13
2.1.1	Vertical Soap Film Tunnel	13
2.1.2	Horizontal Soap Film Tunnel	16
2.2	Illumination Device	17
2.3	Physical Properties of Soap Film.	19
2.3.1	Viscosity	19
2.3.2	Surface Tension Coefficient	20
2.3.3	Flow Velocity.	24
2.4	Physical Properties of Filaments	26
2.4.1	Linear Density	26
2.4.2	Bending Stiffness	26
2.5	Summary	27
	References	27
<b>3</b>	<b>Flapping of a Single Plate in Uniform Flow</b>	<b>29</b>
3.1	Connection Methods	29
3.2	Flapping Characteristics	30
3.2.1	Vortex Structure in Wake	31
3.2.2	Types of Filament Flapping	32
3.3	Curve Fitting of Filaments in Flapping.	34
3.3.1	Filament Digitalization from Experimental Images	34
3.3.2	Curve Fitting for Filament's Locomotion.	36

3.4	Force and Energy Calculation . . . . .	40
3.4.1	Energy Equations . . . . .	40
3.4.2	Governing Equation . . . . .	42
3.4.3	Calculation Results . . . . .	44
3.5	Stability Analysis . . . . .	46
3.6	Summary . . . . .	51
	References . . . . .	52
<b>4</b>	<b>Interaction Between Two Parallel Plates in Flow . . . . .</b>	<b>53</b>
4.1	Common Interface Coupling Problems . . . . .	53
4.2	Theoretical Model and Linear Stability Analysis . . . . .	55
4.2.1	Theoretical Model . . . . .	55
4.2.2	Stability Analysis . . . . .	56
4.3	Interaction Between Two Identical Filaments . . . . .	59
4.3.1	Theoretical Analysis . . . . .	59
4.3.2	Experimental Study . . . . .	61
4.3.3	Comparison of the Theoretical Predictions and Experimental Results . . . . .	64
4.4	Interaction Between Two Filaments Having Different Lengths . . . . .	66
4.4.1	Theoretical Analysis . . . . .	66
4.4.2	Experimental Study . . . . .	67
4.5	Summary . . . . .	69
	References . . . . .	70
<b>5</b>	<b>Interaction Between Two Tandem Plates in Flow . . . . .</b>	<b>73</b>
5.1	Common Physical Problems with Tandem Flexible Plates . . . . .	73
5.2	Experiment Study of Two Tandem Filaments . . . . .	75
5.2.1	Experimental Study . . . . .	75
5.2.2	Locomotion of the Filament in the Wake . . . . .	76
5.3	Energy and Force Calculation . . . . .	79
5.3.1	Flapping Equations . . . . .	80
5.3.2	Result of Energy Calculation . . . . .	81
5.3.3	Result of Force Calculation . . . . .	84
5.4	Summary . . . . .	86
	References . . . . .	86
<b>6</b>	<b>Locomotion Modes of a Plate in the Wake of a Cylinder . . . . .</b>	<b>89</b>
6.1	Fluid Induce Vibration Problems and Studies . . . . .	89
6.2	Force Measurement Methods and Apparatus . . . . .	90
6.2.1	Static Force Measurement . . . . .	90
6.2.2	Dynamic Force Measurement . . . . .	92

Contents	xvii
6.3 Experimental Study . . . . .	93
6.4 Theoretical Analysis . . . . .	96
6.5 Summary . . . . .	99
References . . . . .	99
<b>7 Summary and Outlook. . . . .</b>	<b>101</b>
7.1 Summary and Conclusion . . . . .	101
7.2 Recommendations for Future Work . . . . .	102

The Interaction Between Flexible Plates and Fluid in  
Two-dimensional Flow

Jia, L.

2014, XVII, 103 p. 57 illus., 23 illus. in color., Hardcover

ISBN: 978-3-662-43674-5
