1	Introduction	1
1.1	Geo-disasters and Analysis	1
1.2	Mesh-free Methods	3
1.3	SPH Applications in Geo-disaster Modeling	7
1.3.1	Dam-Breaks and Coastal Engineering	7
1.3.2	Slope Failure and Landslides	9
1.3.3	Liquefaction	12
1.3.4	Seepage	12
1.3.5	Dynamic Erosion	13
1.3.6	Underground Explosions	14
1.3.7	Rock Breakage	15
1.4	Monograph Outline	16
	References	17
2	SPH Models for Geo-disasters	23
2.1	Basic Concept of SPH	23
2.2	SPH Approximation	24
2.2.1	Kernel Approximation	25
2.2.2	Particle Approximation	27
2.3	SPH Model for Hydrodynamics	28
2.3.1	Governing Equations	28
2.3.2	SPH Formulation for Governing Equations	29
2.3.3	Newton Fluid Constitutive Model	30
2.3.4	SPH Formulation for Poisson's Equation	30
2.4	SPH Model for Solid Mechanics	33
2.4.1	Governing Equations	33
2.4.2	Elasto-Plastic Constitutive Model	35
2.5	Numerical Aspects of the SPH Model	40
2.5.1	Initial Settings	40
2.5.2	Neighboring Particle Searching Algorithm	41
2.5.3	Kernel Function	43

2.5.4	Free-Surface Boundary Treatment	44
2.5.5	Averaging the Velocity Field	45
2.5.6	Solid Boundary Treatment	45
2.5.7	Acceleration Calculation	46
2.5.8	Integration Schemes	47
2.5.9	Outputs of Calculation	47
2.6	Summary	47
	References	48
3	Computer Procedure and Visualization Software	51
3.1	Flowchart of the SPH Procedure	51
3.1.1	Hydrodynamics SPH Program	52
3.1.2	Elasto-Plastic SPH Program	57
3.2	Visualization Software Development	59
3.2.1	Programming Language	62
3.2.2	Program Description	62
3.2.3	Application of the Software	68
3.3	Summary	70
	References	70
4	Validation of the SPH Models	71
4.1	Dam-Break Model Test	71
4.1.1	SPH Simulation of Dam-Break Model Test	71
4.1.2	Verification of Dam-Break Numerical Model	72
4.2	Soil Flow Model Test	79
4.2.1	Bingham Fluid Constitutive Model	79
4.2.2	SPH Simulation of the Soil Flow Model Test	83
4.3	Slump Test for Viscous Material	85
4.4	Simple Shear Test for Perfectly Elastic Solid	88
4.5	Undrained Simple Shear Test for Soil	100
4.5.1	Cambridge and Modified Cambridge Models	101
4.5.2	Numerical Simulation Results	104
4.6	Summary	113
	References	114
5	SPH Modeling for Flow Slides in Landfills	115
5.1	Introduction	115
5.2	Flow Slide in Sarajevo Landfill	117
5.3	Flow Slide in Bandung Landfill	122
5.4	Flow Slide in Payatas Landfill	126
5.5	Analysis of Simulation Results	127
5.6	Summary	130
	References	130

6	SPH Modeling for Flow Behavior of Liquefied Soils	133
6.1	Introduction	133
6.1.1	Liquefaction Hazards	133
6.1.2	Definition and Mechanism of Liquefaction	134
6.1.3	Current Research on Liquefaction	135
6.1.4	Soil–Water-Coupling Arithmetic	136
6.2	Physical Model Test of Liquefied Soil Flow	138
6.2.1	Model Test Device	138
6.2.2	SPH Simulation of Model Test.	139
6.2.3	Coupled SPH Simulation of the Model Test	142
6.3	Shaking Table Test of Liquefied Soil Flow	146
6.3.1	Shaking Table Test Device and Results	146
6.3.2	SPH Simulation of Shaking Table Test	146
6.4	Flow Behavior Analysis of a Liquefied Embankment	150
6.4.1	Situation of Embankment Failure.	150
6.4.2	Coupled SPH Simulation of Embankment Failure.	151
6.5	Summary	153
	References	153
7	SPH Modeling for Propagation of Flow-like Landslides	155
7.1	Introduction	156
7.1.1	Earthquake-triggered Flow-Like Landslides	156
7.1.2	Current Research	160
7.2	Donghekou Landslide.	163
7.2.1	Site Investigation	165
7.2.2	Experiments	166
7.2.3	SPH Simulations	169
7.3	Tangjiashan Landslide	175
7.4	Wangjiayan Landslide	181
7.5	Summary	187
	References	188

Geo-disaster Modeling and Analysis: An SPH-based
Approach

Huang, Y.; Dai, Z.; Zhang, W.

2014, XXIV, 189 p. 130 illus., 8 illus. in color., Hardcover

ISBN: 978-3-662-44210-4
