## Part I Size Effects in Semiconductor Nanostructures for Optoelectronic and Photoelectric Applications

<b>1 ZnS and ZnO Semiconductor Nanoparticles Doped with Mn<sup>2+</sup> Ions. Size Effects Investigated by EPR Spectroscopy . . .</b>	<b>3</b>
M. Stefan, S.V. Nistor and D. Ghica	
1.1 Introduction . . . . .	3
1.2 EPR Spectroscopy of Mn <sup>2+</sup> Ions in (Nano)Crystalline ZnS and ZnO . . . . .	5
1.2.1 Multifrequency Lineshape Simulation Procedure for the Determination of the Mn <sup>2+</sup> SH Parameters in Nanocrystals . . . . .	12
1.2.2 Localization of the Mn <sup>2+</sup> Ions in Colloidal cZnS Nanoparticles. . . . .	13
1.2.3 Localization of the Mn <sup>2+</sup> Ions in Colloidal ZnO Nanoparticles. . . . .	16
1.3 Probing Structural/Chemical Transformations in (Nano)Crystalline Materials with EPR of Low Concentration Levels of Mn <sup>2+</sup> Impurities . . . . .	19
1.3.1 Thermal Decomposition of Zn Based Compounds into Nanostructured ZnO Probed with EPR . . . . .	19
1.3.2 The Mechanism of ZnO Nanocrystallization Determined by EPR . . . . .	22
1.3.3 The Thermal Decomposition of the ε-Zn(OH) <sub>2</sub> Shell of cZnS NPs with a Core-Shell Structure . . . . .	24
1.4 Conclusions . . . . .	24
References . . . . .	25

<b>2 Self-organization and Size Effects in Amorphous Silicon. . . . .</b>	<b>29</b>
M. Popescu, F. Sava and A. Velea	
2.1 Introduction . . . . .	29
2.2 Modelling of Nanometer Scale Self-Organization in Amorphous Silicon. . . . .	31
2.3 Interstitial Spherical Voids in Simulated Amorphous Networks of Silicon . . . . .	38
2.4 Discussion . . . . .	41
2.5 Conclusions . . . . .	43
References . . . . .	43
<b>3 GeSiO Based Nanostructures: Electrical Behaviour Related to Morphology and Preparation Method . . . . .</b>	<b>47</b>
M.L. Ciurea, V.S. Teodorescu, I. Stavarache and A.M. Lepadatu	
3.1 Introduction . . . . .	47
3.2 The Size-Effect on the Energy Structure of Nanocrystals . . . . .	48
3.3 Preparation of Nanostructures Formed of Ge Nanoparticles in SiO <sub>2</sub> . . . . .	50
3.4 Electrical and Photoconductive Properties of Ge Nanoparticles Embedded in Amorphous SiO <sub>2</sub> : Applications . . . . .	52
3.5 Charge Transport Mechanisms Related to the Structure in SiO <sub>2</sub> Films with Embedded Ge Nanoparticles . . . . .	59
3.6 Concluding Remarks . . . . .	69
References . . . . .	71

## **Part II Size Effects in Functional Materials for Various Applications**

<b>4 Oxide Thin Films and Nano-heterostructures for Microelectronics (MOS Structures, Ferroelectric Materials and Multiferroic Heterostructures) . . . . .</b>	<b>77</b>
I. Pintilie, L. Pintilie, L.D. Filip, L.C. Nistor and C. Ghica	
4.1 Introduction . . . . .	78
4.2 Interface Related Effects in MOS-Like Structures. . . . .	78
4.2.1 4H-SiC/SiO <sub>2</sub> Interface . . . . .	79
4.2.2 Pb(Zr,Ti)O <sub>3</sub> /ZnO Interface . . . . .	90
4.3 Role of Interfaces in Ferroelectric-Based Thin Films and Nano-heterostructures. . . . .	93
4.3.1 The Effect of the Electrode Interface on the Macroscopic Properties of the Epitaxial Ferroelectric Thin Films . . . . .	95
4.3.2 Size Effects in Ferroelectric Layers and Multilayers . . . . .	99
4.3.3 Assembling Artificial Multiferroic Structures. . . . .	103
References . . . . .	106

<b>5 Zinc Oxide and Polysaccharides: Promising Candidates for Functional Nanomaterials</b>	109
N. Preda, M. Enculescu, I. Zgura, M. Socol, C. Florica, A. Evangelidis, E. Matei and I. Enculescu	
5.1 Introduction	110
5.2 Polysaccharides-Mediated Crystallization of ZnO Nanostructures	111
5.3 Functionalization by Electroless Deposition of Cellulose—Based Natural Fabrics with ZnO Nanostructures	122
5.4 Conclusions	132
References	133
<b>6 Metallic Nanowires and Nanotubes Prepared by Template Replication</b>	137
E. Matei, M. Enculescu, N. Preda, C. Florica, A. Costas, C. Busuioc, M.E. Toimil Molares, V. Kuncser and I. Enculescu	
6.1 Introduction	138
6.2 Template Fabrication	139
6.3 Metallic Nanowires	143
6.4 Metallic Nanotubes	158
6.5 Conclusions	162
References	163

### Part III Size Effects and Magnetic Behavior

<b>7 Engineering Magnetic Properties of Nanostructures via Size Effects and Interphase Interactions</b>	169
V. Kuncser, P. Palade, A. Kuncser, S. Greculeasa and G. Schinteie	
7.1 Finite Size Effects and Interfacial Interactions in Nanosized Magnetic Systems	169
7.2 Some Introductory Concepts in Magnetism and Their Relation to Size Effects	172
7.2.1 Magnetic Moments and Magnetic Interactions	172
7.2.2 Magnetic Anisotropy and Size Effects	180
7.2.3 Magnetic Domains and Size Effects	186
7.2.4 Magnetization Reversal and Size Effects	190
7.2.5 Magnetic Relaxation and Size Effects	196
7.3 Preparation Methods of Magnetic Nanostructures	201
7.4 Magnetic Nanostructures and Characterization Tools	206
7.4.1 Morpho-Structural Characterization	206
7.4.2 Magnetic Characterization	207
7.4.3 Mössbauer Spectroscopy Techniques	215

7.5	Applications . . . . .	218
7.5.1	Magnetic Fluids and Related Applications. . . . .	219
7.5.2	Size Effects in Supported Metallic Nanoparticles for Catalytic Applications . . . . .	224
7.5.3	Size and Interface Effects in Bidimensional Magnetic Structures for Sensor Applications . . . . .	226
	References . . . . .	234
<b>8</b>	<b>Surface Reactivity and Magnetism at Metal-Semiconductor Interfaces. . . . .</b>	<b>239</b>
	N.G. Apostol and C.M. Teodorescu	
8.1	Introduction . . . . .	240
8.2	Experimental Techniques . . . . .	243
8.2.1	Ultrahigh Vacuum (UHV) and Contamination . . . . .	243
8.2.2	Molecular Beam Epitaxy (MBE) . . . . .	244
8.2.3	Low Energy Electron Diffraction (LEED) . . . . .	247
8.2.4	Reflection High Energy Electron Diffraction (RHEED) . . . . .	249
8.2.5	X-Ray Photoelectron Spectroscopy (XPS) . . . . .	250
8.2.6	Auger Electron Spectroscopy (AES) . . . . .	253
8.2.7	X-Ray Photoelectron Diffraction (XPD) . . . . .	255
8.2.8	X-Ray Absorption Fine Structure (XAS) . . . . .	256
8.2.9	X-Ray Magnetic Circular Dichroism (XMCD) . . . . .	258
8.2.10	Magneto-Optical Kerr Effect (MOKE) . . . . .	262
8.3	Interfaces Between Magnetic Metals and Silicon . . . . .	263
8.3.1	Silicon Surfaces: Si(111) $7 \times 7$ and Si(001) ( $2 \times 1$ ) - ( $1 \times 2$ ) . . . . .	263
8.3.2	Fe Films Grown on Silicon: Si(111) and Si(001). Structural Aspects . . . . .	265
8.3.3	Fe Films Grown on Si(001). Magnetic Properties . . . . .	268
8.3.4	Sm Films Grown on Si(001). Structure and Intermixing . . . . .	271
8.3.5	Sm Films Grown on Si(001). Electronic Configuration and Magnetism . . . . .	274
8.4	Interfaces Between Magnetic Metals and III-V Semiconductors . . . . .	276
8.4.1	Interface Reaction in Fe/GaAs(001) and Fe/InAs(001) . . . . .	276
8.4.2	Spin and Orbital Magnetism of Fe/GaAs(001) and Fe/InAs(001) . . . . .	276
8.4.3	Stabilization of <i>bcc</i> Co/Sb/GaAs(011) . . . . .	282
8.5	Conclusions . . . . .	288
	References . . . . .	289

<b>9 Magnetization Relaxation in Superconducting <math>\text{YBa}_2\text{Cu}_3\text{O}_7</math> Films with Embedded Nanorods and Nanoparticles.</b>	<b>293</b>
L. Miu, P. Mele, I. Ivan, A.M. Ionescu, A. Crisan, P. Badica and D. Miu	
9.1 Introduction	294
9.2 $\text{YBa}_2\text{Cu}_3\text{O}_7$ Films with Embedded Nanorods and Added Nanoparticles. Experimental Details	297
9.3 Critical Current Density	298
9.4 DC Magnetization Relaxation at Long Time Scales	299
9.5 AC Susceptibility Measurements. Relaxation at Short Time Scales.	309
9.6 Conclusions	314
References	315
