1 Pulsed Field Gradient—NMR Sequences	1
1.1 The Pulsed Field Gradient (PFG) Diffusion Experiment	3
1.2 The Ordinary PFGSE Sequence	6
1.3 The Ordinary PFGSTE Sequence	9
1.4 The 11 Interval Bipolar PFGSE	12
1.5 The 13 Interval Bipolar PFGSTE	15
1.6 The Convection Compensated PFG NMR Sequences	18
1.7 The Spoiler Recover Pulse Sequence	20
1.8 Combined Two Dimensional Diffusion, T_1 and/or T_2 Pulse Sequences	22
References	34
2 Observation Time Dependent Diffusion Measurements in Heterogeneous Media by PFG NMR	37
2.1 Solving Fick's Law for a Homogeneous System	39
2.1.1 The Gaussian Solution	39
2.2 Restricted Diffusion at Short Observation Times	41
2.2.1 A Dimensional Perspective	42
2.2.2 Solving the Diffusion Equation at Short Observation Times	43
2.2.3 Second Order Corrections	46
2.2.4 On the Use of the Short Time Expansion of the Diffusion Propagator	47
2.3 Diffusion in Heterogeneous Media at Longer Observation Times	48
2.3.1 Tortuosity and Micro Connectivity	49
2.3.2 Diffusion Within Closed Spherical Geometries at Longer Observation Times	52
2.4 The Impact of Surface Relaxivity on the Restricted Diffusion Measurements by PFG-NMR	55
References	60
