Part I Control

Lyapunov Matrix Equations for the Stability Analysis of Linear Time-Invariant Descriptor Systems	3
Peter C. Müller	
1 Introduction	4
2 General Reflections on the Generalized Lyapunov Matrix Equations	5
2.1 Relation Between Solutions of the Lyapunov Matrix Equations	5
2.2 Examples	6
3 Asymptotic Stability	8
3.1 Weierstrass Canonical Form	8
3.2 First Approach	9
3.3 Second Approach	10
4 Mechanical Descriptor Systems	14
4.1 First Approach	15
4.2 Second Approach	17
5 Comparisation of the Two Approaches.....	19
Conclusions	19
References	20
Zero Dynamics and Stabilization for Linear DAEs	21
Thomas Berger	
1 Introduction	23
2 Some Control Theoretic Concepts.....	24
3 Stable Zero Dynamics.....	28
4 Stabilization	33
References	44
Design of Causal Observers for Nonlinear Descriptor Systems	47
Daniel Labisch and Ulrich Konigorski	
1 Introduction	47
2 Properties of Descriptor Systems	49

3	Coupled State-Space Representation	50
4	Causal Observability and Observer Design	57
5	Examples	62
5.1	Three-Mass Oscillator	62
5.2	Academic Nonlinear Example	65
	Conclusion	68
	References	68

Part II Simulation

Monitoring Singularities While Integrating DAEs		73
Diana Estévez Schwarz and René Lamour		
1	Introduction	73
2	Tractability	74
3	Index-3 Decoupling	75
4	Automatic Differentiation (AD)	77
5	Consistent Initialization and Integration with AD	77
5.1	Index Determination	78
5.2	Consistent Initialisation	78
5.3	Integrating IVPs	80
5.4	Nonlinear DAEs	81
6	Diagnosis of Singular Points	82
7	Examples	83
7.1	Linear DAEs	83
7.2	Nonlinear Examples	91
8	Outlook	94
	References	95

Modular Time Integration of Block-Structured Coupled Systems Without Algebraic Loops		97
Martin Arnold		
1	Co-simulation and Modular Time Integration	97
2	Block-Structured Coupled Systems	98
3	Local Error Analysis	100
4	Convergence Analysis	101
5	Summary	104
	References	105

Error Analysis and Error Estimates for Co-simulation in FMI for Model Exchange and Co-Simulation v2.0		107
Martin Arnold, Christoph Clauß, and Tom Schierz		
1	Introduction	108
2	Block Representation of Coupled Systems	109
3	Convergence Analysis	113
4	Local Error Estimates	116
5	Numerical Test: Benchmark Quarter Car	121

Conclusions	123
References	124
A Unified (P)DAE Modeling Approach for Flow Networks	127
Lennart Jansen and Caren Tischendorf	
1 Modeling of Flow Networks	127
1.1 Network Topology Describing Equations	129
1.2 Network Element Modeling	131
2 Model Classes for Flow Networks	143
2.1 Static Networks with Lumped Element Models	143
2.2 Static Networks with Switching Element Models	144
2.3 Dynamic Networks with Lumped Element Models	145
2.4 Dynamic Networks with Switching Element Models	147
2.5 Dynamic Networks with Distributed Element Models	148
Conclusions	149
References	149

Part III Model Order Reduction

Index-Aware Model Order Reduction for Higher Index DAEs	155
Nicodemus Banagaaya and Wil H.A. Schilders	
1 Introduction	156
2 Limitation of Conventional MOR Methods	157
3 Decoupling of Index-3 DAEs	160
3.1 Index-3 Systems with a Differential Part	161
4 Generalized Index Aware Model Order Reduction Method	165
4.1 GIMOR Method for DAE Systems with Differential Part	166
4.2 GIMOR Method for Purely Algebraic DAE Systems	171
5 Numerical Experiments	173
5.1 Simple Examples	173
5.2 Large Examples	179
Conclusion	181
References	182

Model Order Reduction of Differential Algebraic Equations

Arising from the Simulation of Gas Transport Networks	183
Sara Grundel, Lennart Jansen, Nils Hornung, Tanja Clees, Caren Tischendorf, and Peter Benner	
1 Introduction	183
2 Gas Transport in Pipeline Networks	184
3 Tractability Index	188
4 Index Analysis and Reduction	189
5 Model Order Reduction: POD	194
5.1 Proper Orthogonal Decomposition	195
5.2 POD for Gas Transport Simulation	197

6	Numerical Examples	198
6.1	Simple Example	198
6.2	Medium Size Model	201
7	Discussion	204
	References	205
	Index	207
