
Contents

1	Cell Biology for Immune Evasion: Organizing Antigenic Variation, Surfaces, Trafficking, and Cellular Structures in <i>Trypanosoma brucei</i>	1
	Ka Fai Leung, Paul T. Manna, Cordula Boehm, Luke Maishman, and Mark C. Field	
2	The Biology of Tsetse–Trypanosome Interactions	41
	Guy Caljon, Linda De Vooght, and Jan Van Den Abbeele	
3	Withstanding the Challenges of Host Immunity: Antigenic Variation and the Trypanosome Surface Coat	61
	James Peter John Hall and Lindsey Plenderleith	
4	Bridging Innate and Adaptive Immunity in African Trypanosomiasis	89
	John M. Mansfield, Donna M. Paulnock, and Gina M. Hedberg	
5	Adaptive Immunity and Trypanosomiasis-Driven B-Cell Destruction	115
	Stefan Magez and Magdalena Radwanska	
6	Normal Human Serum Lysis of Non-human Trypanosomes and Resistance of <i>T. b. rhodesiense</i> and <i>T. b. gambiense</i>	139
	Paul Capewell, Caroline Clucas, William Weir, Nicola Veitch, and Annette MacLeod	
7	Proteomics and African Trypanosomes: Shedding New Light on Host–Vector–Parasite Interactions and Impact on Control Methods	161
	Philippe Holzmüller, Pascal Grébaut, and Anne Geiger	
8	Diagnosis of African Trypanosomiasis	189
	Philippe Büscher	
9	Progress Towards New Treatments for Human African Trypanosomiasis	217
	Jose A. Garcia-Salcedo, Jane C. Munday, Juan D. Unciti-Broceta, and Harry P. de Koning	

10	Animal African Trypanosomosis in Sub-Saharan Africa and Beyond African Borders	239
	Boniface Namangala and Steven Odongo	
11	<i>Trypanosoma (Duttonella) vivax</i> and Typanosomosis in Latin America: Secadera/Huequera/Cacho Hueco	261
	Mary Isabel Gonzatti, Bernardo González-Baradat, Pedro M. Aso, and Armando Reyna-Bello	
	Index	287

Trypanosomes and Trypanosomiasis

Magez, S.; Radwanska, M. (Eds.)

2014, X, 294 p. 27 illus., 20 illus. in color.,

ISBN: 978-3-7091-1556-5
