

Contents

- 1 Introduction** 1
 - References 3
- 2 Review of Quantum Mechanics** 9
 - 2.1 Historical Background 9
 - 2.2 Postulates of Quantum Mechanics 11
 - 2.2.1 Quantum States 11
 - 2.2.2 Operators 16
 - 2.2.3 Measurements and Expectation Values 20
 - 2.2.4 Schrödinger Equation..... 23
 - 2.3 Spin 24
 - 2.3.1 Spinors and Pauli Equation..... 24
 - 2.3.2 Spin-Orbit Coupling 26
 - References 27
- 3 Many-Body Systems** 29
 - 3.1 First Quantization 29
 - 3.1.1 Indistinguishability 30
 - 3.1.2 Slater Determinants and Permanents 31
 - 3.1.3 Operators in the First Quantization Representation 34
 - 3.2 Second Quantization 37
 - 3.2.1 Creation and Annihilation Operators 38
 - 3.2.2 Operators in the Second Quantization Representation 40
 - 3.2.3 Basis Transformation 42
 - 3.2.4 Field Operators..... 43
 - 3.2.5 Quasi-particles and Collective Excitations 46
 - 3.2.6 Harmonic Oscillator 47
 - 3.2.7 Photons 49
 - 3.2.8 Interaction with Photons..... 52
 - References 53
