## Part I Preventive Viral-Vectored Vaccines

- 1 Reverse Genetics Approaches for Rational Design of Inactivated and Live Attenuated Influenza Vaccines . . . . .** 3  
Yoshihiro Kawaoka and Gabriele Neumann
- 2 Viral-Vectored Vaccines to Control Pathogenic Filoviruses . . . . .** 33  
Chad E. Mire and Thomas W. Geisbert
- 3 Alphavirus Replicon Vectors for Prophylactic Applications and Cancer Intervention . . . . .** 61  
Peter Pushko and Irina Tretyakova
- 4 Current Status and Future of Polio Vaccines and Vaccination . . . .** 87  
Konstantin Chumakov
- 5 Current Status of Hantavirus Vaccines Development . . . . .** 113  
Evgeniy A. Tkachenko, Tamara K. Dzagurova, and Peter E. Tkachenko
- 6 Experimental DNA-Launched Live-Attenuated Vaccines Against Infections Caused by Flavi- and Alphaviruses . . . . .** 153  
Peter Pushko, Peter P. Bredenbeek, and Igor S. Lukashevich
- 7 Sugar-Based Immune Adjuvants for Use in Recombinant, Viral Vector, DNA and Other Styles of Vaccines . . . . .** 179  
Nikolai Petrovsky

## Part II Viral-Vectored Therapeutic Cancer Vaccines

- 8 Adenovirus-Based Vectors for the Development of Prophylactic and Therapeutic Vaccines . . . . .** 203  
Anton V. Borovjagin, Jorge G. Gomez-Gutierrez, Haval Shirwan, and Qiana L. Matthews
