1	Introduction	1
	References	5
2	Reviews of Uncertainty Relations	7
2.1	Heisenberg's Gamma-Ray Microscope	7
2.2	Von Neumann's Doppler Speed Meter	9
2.3	Kennard-Robertson's Inequality and Schrödinger's Inequality	11
2.4	Arthurs-Goodman's Inequality	12
2.5	Ozawa's Inequality	14
	References	17
3	Classical Estimation Theory	19
3.1	Parameter Estimation of Probability Distributions	19
3.2	Cramér-Rao Inequality and Fisher Information	23
3.3	Monotonicity of the Fisher Information and Čencov's Theorem	28
3.4	Maximum Likelihood Estimator	30
	References	36
4	Quantum Estimation Theory	37
4.1	Parameter Estimation of Quantum States	37
4.2	Monotonicity of the Fisher Information in Quantum Measurement	38
4.3	Quantum Cramér-Rao Inequality and Quantum Fisher Information	39
4.4	Adaptive Measurement	42
	References	44
5	Expansion of Linear Operators by Generators of Lie Algebra $\mathfrak{su}(d)$	45
5.1	Generators of Lie Algebra $\mathfrak{su}(d)$	45

5.2	Quantum State and Bloch Space	47
5.3	Observable	51
5.4	Quantum Measurement	53
5.4.1	Positive Operator-Valued Measure (POVM) Measurement	53
5.4.2	Projection-Valued Measure (PVM) Measurement and Spectral Decomposition	54
5.5	Quantum Operation	56
5.5.1	Unitary Evolution	58
5.5.2	Interaction with an Environment	59
5.5.3	Measurement Processes	61
	References	70
6	Lie Algebraic Approach to the Fisher Information Contents	71
6.1	Classical Fisher Information	71
6.1.1	Positive State Model	73
6.1.2	Block Diagonal State Model	76
6.1.3	Decohered State Model	79
6.2	SLD Fisher Information	80
6.2.1	Positive State Model	81
6.2.2	Block Diagonal State Model	82
6.2.3	Decohered State Model	84
6.3	RLD Fisher Information	84
6.3.1	Positive State Model	85
6.3.2	Block Diagonal State Model	86
6.3.3	Decohered State Model	87
	Reference	88
7	Error and Disturbance in Quantum Measurements	89
7.1	Error in Quantum Measurement	89
7.1.1	Comparison with the Error Defined by Arthurs and Goodman	94
7.1.2	Comparison with the Error Defined by Ozawa	95
7.2	Disturbance in Quantum Measurement	96
	References	100
8	Uncertainty Relations Between Measurement Errors of Two Observables	101
8.1	Setup	101
8.2	Heisenberg-Type Uncertainty Relation	103
8.3	Attainable Bound of the Product of the Measurement Errors . . .	104
	References	113

- 9 Uncertainty Relations Between Error and Disturbance
 in Quantum Measurements.** 115
 - 9.1 Heisenberg’s Uncertainty Relation in Terms of Fisher
