

Contents

1	“Diffusive Demand” and “Creative Demand—Overcoming Product Saturation with Demand for Innovation”	1
	The True Character of the Demand Shortage in Advanced Nations.....	1
	Demand for Man-Made Artifacts Will Necessarily Saturate.....	2
	How Long Will China’s High Growth Last?	4
	Automobiles Will Also Reach Saturation in the Next 7–10 Years	7
	Accompanying Overproduction, Keen Competition Will Intensify	8
	The “Clouds Above the Hill” Are No Longer There or “Lost in the Fog”	9
	References.....	12
2	The Twenty-First Century Paradigm and the Role of Information Technology	13
	Exploding Knowledge, Limited Earth, and Aging Society	13
	Negative Legacy of Intellectual Activities	15
	The Relation Between Knowledge and Value Is Difficult to Understand.....	16
	Importance of “Knowledge Structuring”	18
	Sustainability Science	19
	Speed Has Surpassed the “Invisible Hand”	21
	Information Technology Is a Common Foundation for Innovation	23
	References.....	25
3	“Vision 2050” to the Rescue of a “Limited Earth”	27
	Vision 2050	27
	Even If the Number of Automobiles Quadruples, Energy Consumption Can Still Be Reduced	28
	Energy Conservation Can Be Realized Economically	31
	The Reason Why Recycling Is More Energy-Efficient	33
	“Urban Mines” Are Not an Urban Myth.....	35

Three Points for Building a “Material Circulating Society”	35
At Present 80 % of Our Energy Relies on Fossil Fuels	36
Nuclear Power as a Transitional Energy Source	37
Producing Biomass in the Desert	38
Reducing the World’s Carbon Dioxide Emissions by 25 %	39
A Vision on Which Advanced Countries and Developing Countries Can Agree	40
Japan as a Resource Self-Sustaining Nation	42
References	45
4 Finding a Way Out Through Creative Demand, I	47
<i>Monozukuri</i> (Making Things) and Daily Life	47
Structure of Energy Consumption in Households	50
Appropriate Regulation Encourages Innovation	52
Air-Conditioning Energy Consumption Can Be Reduced to One Twelfth	54
Room for Innovation Lies in the Difference Between “Theory” and “Reality”	55
Why Did Japan Fail in Diffusive Demand?	56
Two-Manufacturer System for Major Appliances	58
The Anxious Future of Solar Cells	60
World-Leading “Eco-Cute” and “ENE-FARM”	62
Eco-Cute and ENE-FARM Will Create a 30 Trillion Yen Market	65
Reducing Costs by Taking Advantage of the Huge Domestic Market	66
Japan’s Strength Lies Precisely in “ <i>Monozukuri</i> from Scratch”	68
References	69
5 Finding a Way Out Through Creative Demand, II	71
Japan—A Country with Challenges and the Power for Manufacturing from Scratch	71
Five Conditions for Happy Aging	72
Involve Senior Citizens and Working People in School Education	74
School Education Is Losing Diversity	75
Agriculture Competing by Safety and Taste	77
Don’t Be Frightened by the Threat of Globalization	79
An Aging Society Is a Golden Opportunity for Japan to Take Advantage of Its Technical Capabilities	80
References	82
6 Toward the Realization of a “Platinum Society”	85
Shooting Through the “Clouds Above the Hill”	85
Pursuing the “Platinum Society” Through Three Innovations	88
Local Governments Have Begun Moving	90
Platinum Vision Handbook for Structuring and Sharing Knowledge	95

Platinum Vision Awards and the Dissemination
of the Platinum Society Model 97

Platinum Vision School and a Network of Networks 99
