Part I Full Digital I&C and HMIT Systems

1 Mitsubishi's Computerized HSI and Digital I&C System for PWR Plants	3
Koji Ito, Satoshi Hanada, and Kenji Mashio	
2 Design of an Integrated Operator Support System for Advanced NPP MCRs: Issues and Perspectives	11
Seung Jun Lee and Poong Hyun Seong	
3 Concept of Advanced Back-up Control Panel Design of Digital Main Control Room	27
Ke Tan, Yongbin Sun, and Weihua Chen	
4 U.S. Department of Energy Instrumentation and Controls Technology Research for Advanced Small Modular Reactors	33
Richard Thomas Wood	
5 Application of FPGA to Nuclear Power Plant I&C Systems	41
Toshifumi Hayashi, Atsushi Kojima, Tadashi Miyazaki, Naotaka Oda, Kiyotaka Wakita, and Takayoshi Furusawa	
6 Prejob Briefing Using Process Data and Tagout/Line-up Data on 2D Drawings	49
François Dionis, Alain Ribiere, and Renaud Aubin	
7 Study on Modeling of an Integrated Control and Condition Monitoring System for Nuclear Power Plants	57
Zhi Chen, Ren Yu, Ying Zhang, and Long-tao Liao	
8 A Toolkit for Computerized Operating Procedure of Complex Industrial Systems with IVI-COM Technology	69
Yangping Zhou, Yujie Dong, Xiaojing Huang, and Hidekazu Yoshikawa	
9 Development and Design Guideline for Computerized Human–Machine Interface in the Main Control Rooms of Nuclear Power Plants	75
Takaki Mishima, Hiroaki Nishi, Yoshiaki Tamura, and Yasushi Nakagawa	

Part II Risk Monitor Methods for Large and Complex Plants

10 Overview of System Reliability Analyses for PSA	83
Takeshi Matsuoka	
11 A Systematic Fault Tree Analysis Based on Multi-level Flow Modeling	97
Akio Gofuku and Ai Ohara	

12 Reliability Graph with General Gates: A Novel Method for Reliability Analysis.....	105
Poong Hyun Seong and Seung-Ki Shin	
13 Design of Risk Monitor for Nuclear Reactor Plants.....	125
Hidekazu Yoshikawa, Ming Yang, Muhammad Hashim, Morten Lind, and Zhijian Zhang	
14 Review of Practicing Level-2 Probabilistic Safety Analysis for Chinese Nuclear Power Plants.....	137
Changhong Peng, Ning Zhang, and Yinghao Yang	
15 Risk Monitoring for Nuclear Power Plant Applications Using Probabilistic Risk Assessment.....	145
Takahiro Kuramoto	

Part III Condition Monitors for Plant Components

16 Condition Monitoring for Maintenance Support.....	155
William Beere, Øivind Berg, Emil Wingstedt, Samuli Savolainen, and Tero Lahti	
17 Online Condition Monitoring to Enable Extended Operation of Nuclear Power Plants.....	161
Ryan Michael Meyer, Leonard John Bond, and Pradeep Ramuhalli	
18 Using Condition-Based Maintenance and Reliability-Centered Maintenance to Improve Maintenance in Nuclear Power Plants.....	177
Li-jun Huang, Hong Jiang, Yu Chen, and Shi-jun Chen	
19 Advanced Management of Pipe Wall Thinning Based on Prediction-Monitor Fusion.....	187
Fumio Kojima and Shunsuke Uchida	
20 Non-destructive Evaluation of Material State by Acoustic, Electromagnetic and Thermal Techniques.....	195
Eiji Matsumoto and Masataka Abe	
21 Non-contact Acoustic Emission Measurement for Condition Monitoring of Bearings in Rotating Machines Using Laser Interferometry.....	205
Yasufumi Ohta, Koichi Saruta, and Masashi Ueda	
22 Crack Growth Monitoring by Strain Measurements.....	215
Masayuki Kamaya	
23 Acoustic Monitoring of Rotating Machine by Advanced Signal Processing Technology.....	225
Shigeru Kanemoto	
24 The Wireless Diagnostic System for Motor Operated Valves.....	235
Haruo Ito, Michiaki Akiyama, and Syunichi Suzuki	

Part IV Virtual and Augmented Reality for Nuclear Power Plants

25 Virtual and Augmented Reality in the Nuclear Plant Lifecycle Perspective.....	243
Terje Johnsen and Niels-Kristian Mark	
26 A Feasibility Study on Worksite Visualization System Using Augmented Reality for Fugen NPP.....	257
Masanori Izumi, Hiroshi Shimoda, and Hirotake Ishii	

27 Augmented Reality for Improved Communication of Construction and Maintenance Plans in Nuclear Power Plants	269
Søren S. Sørensen	
28 3D Representation of Radioisotopic Dose Rates Within Nuclear Plants for Improved Radioprotection and Plant Safety	275
Rune Vabø, Leon Piotrowski, and Grete Rindahl	
29 Wide Area Tracking Method for Augmented Reality Supporting Nuclear Power Plant Maintenance Work	283
Hirotake Ishii, Weida Yan, Shou-feng Yang, Hiroshi Shimoda, and Masanori Izumi	
 Part V Software Reliability V&V for Nuclear Power Plants	
30 Research on Software Systems Dependability at the OECD Halden Reactor Project	293
Terje Sivertsen and Fridtjov Øwre	
31 High Level Issues in Reliability Quantification of Safety-Critical Software	301
Man Cheol Kim	
32 Software Reliability Analysis in Probabilistic Risk Analysis	307
Jan-Erik Holmberg	
About the Editors	317
Author Index	319
Subject Index	321

Progress of Nuclear Safety for Symbiosis and
Sustainability

Advanced Digital Instrumentation, Control and
Information Systems for Nuclear Power Plants

Yoshikawa, H.; Zhang, Z. (Eds.)

2014, XVII, 322 p. 223 illus., 158 illus. in color.,
Hardcover

ISBN: 978-4-431-54609-2
