

Contents

1	General Introduction	1
1.1	Metal Complexes Bearing π -Conjugated Ligands	1
1.1.1	Photophysics of Metal Complexes Bearing π -Conjugated Chelating Ligands	1
1.1.2	Molecular Switches Based on Metal Complexes Bearing π -Conjugated Ligands	4
1.2	Copper Complexes Bearing Two Bidentate Ligands Including Diimines	6
1.3	Metal Complexes Bearing Pyridylpyrimidine Derivatives	10
1.4	Pyrimidine Ring Rotation in Copper Complexes	11
1.4.1	The Aim of Our Previous Work	11
1.4.2	Essential Points of this System	11
1.4.3	Details of this System	13
1.5	The Aim of this Work	17
	References	19
2	Details of Molecular Bistability Based on Pyrimidine Ring Rotation in Copper(I) Complexes	25
2.1	Introduction	25
2.1.1	Ion Paring in Metal Complexes	25
2.1.2	The Aim of this Study	26
2.1.3	Molecular Design	26
2.1.4	Contents of this Chapter	26
2.2	Experimental Section	27
2.3	Synthesis and Characterization of Rotational Equilibrium in Solution	32
2.4	Characterization for Intramolecular Process	36
2.5	Crystallography	41
2.6	Thermodynamics of Rotation in Solution	45
2.6.1	Results	45
2.6.2	Discussion	51
2.6.3	Notes About the Model	56
2.7	Rate for the Isomerization in a Solution State	57

2.8	Conclusion	59
	References	60
3	Dual Emission Caused by Ring Rotational Isomerization of a Copper(I) Complex	63
3.1	Introduction.	63
3.1.1	The Aim of this Study	63
3.1.2	Molecular Design	64
3.1.3	Contents of this Chapter	64
3.2	Experimental Section	65
3.3	Rotational equilibrium	65
3.4	Absorption Spectra and Steady-State Emission Spectra.	67
3.5	Time-Resolved Emission Spectra	68
3.6	Temperature Dependence of Time-Resolved Emission Spectra	69
3.7	Energy Diagram.	69
3.8	Other Physical Properties	71
3.9	Conclusion	76
	References	77
4	Repeatable Copper(II)/(I) Redox Potential Switching Driven Visible Light-Induced Coordinated Ring Rotation	79
4.1	Introduction.	79
4.1.1	The Aim of this Study	79
4.1.2	Molecular Design	80
4.1.3	Contents of this Chapter	80
4.2	Experimental Section	81
4.3	Synthesis and Characterization.	85
4.4	Electrochemistry	88
4.5	Thermodynamics and Kinetics for the Rotation	92
4.6	Photophysical Properties	94
4.7	Photodriven and Heat-Driven Rotation with Redox Mediator	102
4.7.1	Results	102
4.7.2	Mechanism	105
4.8	Photodriven and Heat-Driven Rotation Under Partial Oxidation	111
4.9	Factors Dominating Photorotation Rate.	118
4.10	Conclusion	118
	References	119
5	Concluding Remarks	121
	About the Author	123

Photofunctionalization of Molecular Switch Based on
Pyrimidine Ring Rotation in Copper Complexes

Nishikawa, M.

2014, XII, 123 p. 105 illus., 23 illus. in color., Hardcover

ISBN: 978-4-431-54624-5
