Part I Online Communities and Social Media

1	Stock BBS Factor Model Using Principal Component Score	3
	Hirohiko Suwa, Eiichi Umehara, and Toshizumi Ohta	
1.1	Introduction	3
1.2	Previous Research	4
1.3	Method of Analysis	6
1.3.1	Collection of Messages on Yahoo! BBS	6
1.3.2	Morphological Analyzer	7
1.3.3	TF*IDF Calculation	7
1.3.4	Principal Component Analysis	8
1.3.5	Correlation Between Principal Component Scores, Stock Return, and Bullishness	8
1.3.6	Construction of the Portfolio	9
1.3.7	Test of Abnormal Returns	9
1.3.8	Evaluation of Factors Using PCs	10
1.4	Results	11
1.5	Discussion	13
1.5.1	Candidate Factors	13
1.5.2	Developing a New Factor	13
1.5.3	Principal Component Analysis	14
1.6	Conclusion	14
	References	15
2	How Consumer-Generated Advertising Works: An Empirical Agent-Based Simulation	17
	Makoto Mizuno	
2.1	Introduction	17
2.2	Empirical Study	19
2.3	Model	20
2.3.1	Affiliate Bloggers' Behavior	20

2.3.2	Readers' Behavior	21
2.3.3	Assignment of Agents	23
2.4	Simulation	23
2.5	Results	24
2.6	Discussion	27
	References.....	29
3	Understanding Citizens' Channel Choice of Public Service Delivery: An Agent-Based Simulation Approach	31
	Shuang Chang, Manabu Ichikawa, and Hiroshi Deguchi	
3.1	Introduction.....	31
3.1.1	Hong Kong E-Government.....	32
3.1.2	Methodology.....	33
3.2	Modeling.....	33
3.2.1	Overview	33
3.2.2	Formal Modeling of Agents.....	34
3.3	Simulation Model	37
3.3.1	Simulation and Parameter Setting	38
3.3.2	Scenarios	38
3.4	Conclusion.....	45
	References.....	45
4	Cyclical Pattern of the Rise and Fall of an Online Community Due to a Troll	47
	Yutaka Nakai	
4.1	A Troll in an Online Community	48
4.2	Anti-community, Pro-community, and De-community Strategies	49
4.3	Evolutionary Simulation of a Troll	52
4.4	Cyclical Pattern of Dominant Strategy	53
4.5	Completely Ignoring the Troll and the Unintentional Troll	56
4.6	Discussion	57
	References.....	58
Part II Economic and Social Networks		
5	On the Indeterminacy of the Clearing Payment Vectors in Numerical Simulations on Financial Networks	61
	Mario Eboli	
5.1	Introduction.....	62
5.2	The Indeterminacy of the Clearing Payment Vector in Financial Networks.....	62
5.3	Necessary and Sufficient Conditions for the Uniqueness of a Payment Vector	64

5.4 Controlling for Indeterminacies of the Value Function
in Numerical Simulations on Networks 71

5.5 Conclusion 71

References 72

**6 Three-State Opinion Formation Model on Adaptive
Networks and Time to Consensus 73**

Degang Wu and Kwok Yip Szeto

6.1 Introduction 74

6.2 Model 75

6.3 Simulation Results 76

6.4 Discussion 82

References 84

7 Achieving Consensus with Segregation in Multiple Social Contexts.. 85

Daive Nunes and Luis Antunes

7.1 Introduction 85

7.2 Context Segregation Model 86

7.2.1 Modelling Social Contexts with Social Networks 87

7.2.2 Context Switching Model and Consensus 87

7.2.3 Context Switching with Segregation..... 89

7.3 Model of the Experiments 89

7.4 Discussion and Experimental Results 90

7.4.1 Homogeneous Social Contexts
with Scale-Free Networks 90

7.4.2 Homogeneous Social Contexts with Regular Networks .. 93

7.4.3 Heterogeneous Social Contexts 96

7.4.4 The Influence of Multiple Social Contexts 100

7.5 Conclusion and Future Work 102

References 102

Part III Behavioral Finance and Macroeconomics

**8 How Does Overconfidence Affect Asset Pricing, Volatility,
and Volume? 107**

Chia-Hsuan Yeh and Chun-Yi Yang

8.1 Introduction 108

8.2 The Model 112

8.2.1 Market Structure 112

8.2.2 Traders’ Learning Behavior 113

8.2.3 Market Mechanism 115

8.3 Simulation Design 116

8.4 Results 117

8.5 Conclusion 120

References 121

9 Analyzing the Validity of Passive Investment Strategies Under Financial Constraints 123
Hiroshi Takahashi

9.1 Introduction 123

9.2 Model 125

 9.2.1 Negotiable Assets in the Market 125

 9.2.2 Modeling Investor Behavior 125

 9.2.3 Determination of Transaction Prices 127

 9.2.4 Natural Selection in the Market 127

9.3 Results 128

 9.3.1 The Validity of a Passive Investment Strategy and the Influence of Financial Constraints 128

 9.3.2 Influence of Financial Constraints on Passive Investors .. 132

 9.3.3 Discussion 134

9.4 Summary 136

References 137

10 Macroeconomic Forecasting with Agent-Based Models: Prediction and Simulation of the Impact of Public Policies on SMEs 139
Federico Pablo-Marti, Antonio Garcia-Tabuenca, Juan Luis Santos, Maria Teresa Gallo, Maria Teresa del Val, and Tomas Mancha

10.1 Introduction 139

10.2 Overview of the MOSIPS Model: An Agent-Based Model Able to Forecast Macroeconomic Behavior with Real Microfoundations 141

10.3 Small Business Act and MOSIPS Policy Domains 144

10.4 Policy Design in the MOSIPS Model 147

10.5 Conclusions 151

References 155

11 Influence of the Corporation Tax Rate on GDP in an Agent-Based Artificial Economic System 157
Shigeaki Ogibayashi and Kousei Takashima

11.1 Introduction 157

11.2 Simulation Model 159

 11.2.1 Outline of Model 159

 11.2.2 Sequence of Actions 159

 11.2.3 Outline of Agents’ Decision-Making Rules 160

11.3 Simulation Conditions 163

11.4 Simulation Results 165

 11.4.1 Influence of Executive Compensation Rule 165

 11.4.2 Influence of Internal Funds Rule 166

- 11.4.3 Influence of Increased Upper Limit Rule
for the Number of Investments 167
- 11.4.4 Influence of Labor Market Rule 167
- 11.5 Discussion 168
 - 11.5.1 Comparison of the Calculated Result and the
Real System 168
 - 11.5.2 Mechanism of the Influence of the Three
Rules on the Relationship Between
Corporation Tax Rate and GDP 169
- 11.6 Conclusion 172
- References 173

**Part IV Demographics, Health Care, Linguistics,
and Sociology**

- 12 Semi-Artificial Models of Populations: Connecting
Demography with Agent-Based Modelling 177**
Eric Silverman, Jakub Bijak, Jason Noble, Viet Cao,
and Jason Hilton
 - 12.1 Motivations: Bringing Together the Statistical
and the Simulated Individual 177
 - 12.2 From the Wedding Ring to the Wedding Doughnut 180
 - 12.2.1 Wedding Ring: Background 180
 - 12.2.2 Extending the Model: The Wedding Doughnut 181
 - 12.2.3 Extending the Model: Demographic Elements 181
 - 12.2.4 Extending the Model: Health Status 182
 - 12.2.5 The Wedding Doughnut: Flow of the Simulation 183
 - 12.3 Results 184
 - 12.4 Discussion 187
 - References 188
- 13 An Agent-Based Approach for Patient Satisfaction
and Collateral Health Effects 191**
Masatoshi Murakami and Noriyuki Tanida
 - 13.1 Introduction 191
 - 13.2 General Form of Our Simulation Model 192
 - 13.2.1 Basic Characteristics of the Model 192
 - 13.2.2 Patient Satisfaction Scale 193
 - 13.3 Simulation Settings 196
 - 13.4 Simulation Results 197
 - 13.4.1 Basic Simulation 197
 - 13.4.2 Additional Simulation 198
 - 13.5 Conclusion and Future Work 201
 - References 202

14	Complex Evolutionary Pathways in Interacting Linguistic Communities	205
	Ioannis Vagias and Elpida Tzafestas	
14.1	Introduction	205
14.2	Expanded and Revised Model of Language Change	207
14.2.1	The Artificial Language	208
14.2.2	Social Activities and Agent Interaction	208
14.2.3	Learning Mechanisms	210
14.3	Simulation Setup	210
14.4	Experiments	212
14.4.1	Linguistic Convergence and Dominance	212
14.4.2	Linguistic Split and Stabilization	216
14.4.3	Linguistic Innovation	217
14.4.4	Linguistic Split and Convergence Controlled by Socio-Cognitive Factors	218
14.4.5	Cultural Transmission of Language Between Generations	219
14.5	Conclusion and Further Work	220
	References	223
15	Socio-Cognitive Influences on Social Stratification	225
	Elpida Tzafestas	
15.1	Introduction	225
15.2	Cognitive Model Dimensions	228
15.2.1	Strength-Only Versus Socially Modulated Fight	228
15.2.2	Neutrality	230
15.2.3	Boundedness	231
15.2.4	Socially Dependent Fight Outcomes	232
15.2.5	Perception of Opponent	232
15.2.6	Cognitive Adaptation	233
15.3	Social Conflict Resolution	235
15.4	Conflictual Contexts	238
15.4.1	Resource Sharing Contexts	239
15.4.2	Attractive and Not-So-Attractive Tasks	240
15.5	Discussion	241

 Part V Participatory Modeling		
16	A Computational Study of Rule Learning in “Do-It-Yourself Lottery” with Aggregate Information	247
	Takashi Yamada and Takao Terano	
16.1	Introduction	248
16.2	Do-It-Yourself Lottery	249
16.2.1	Game Design	249
16.2.2	Related Games	250

16.3	Computational Experiments	251
16.3.1	Setup	251
16.3.2	Results	253
16.4	Concluding Remarks	260
	References.....	262
17	Agent-Based Social Simulation as an Aid to Communication Between Stakeholders	265
	Kotaro Ohori, Shohei Yamane, Noriyuki Kobayashi, Akihiko Obata, and Shingo Takahashi	
17.1	Introduction.....	265
17.2	Two Business Problems	266
17.2.1	Service-Oriented Organization.....	266
17.2.2	Supermarket Checkout Area	267
17.3	Models and Simulations for the Two Business Problems	268
17.3.1	Service-Oriented Organization.....	268
17.3.2	Supermarket Checkout Area	270
17.4	Discussion with Stakeholders to Support Decision Making	272
17.4.1	Discussion with Managers and Workers in the Service-Oriented Organization	272
17.4.2	Discussion with Designers About Supermarket Checkout Area	272
17.5	Contribution of ABSS.....	274
17.6	Conclusion and Discussion	275
	References.....	276
18	Hybrid Approach of Agent-Based and Gaming Simulations for Stakeholder Accreditation	279
	Yusuke Goto, Yosuke Takizawa, and Shingo Takahashi	
18.1	Introduction.....	279
18.2	Hybrid Approach of ABS and GS for Stakeholder Accreditation .	281
18.2.1	Core Concept	281
18.2.2	Outline of Our Approach.....	282
18.3	Transformation-Modeling Protocol and Its Application.....	285
18.3.1	ABM to be Transformed	285
18.3.2	Abstraction Step from the ABM	286
18.3.3	Intermediate Step	287
18.3.4	Abstraction Step into GS	288
18.3.5	Generation of the Game	288
18.4	Preliminary Test of Our Approach	290
18.4.1	Experimental Design	290
18.4.2	Experimental Results	291
18.5	Summary and Future Studies	292
	References.....	293

Part VI Methodology

19 When Does Simulated Data Match Real Data? 297
Forrest Stonedahl and William Rand

19.1 Motivation 298

19.2 Related Work 299

19.3 News Consumption 300

 19.3.1 The Data 300

 19.3.2 Model Implementation 301

19.4 Calibration 304

 19.4.1 Calibration Measures 304

 19.4.2 Calibration Method 306

19.5 Results and Discussion 306

 19.5.1 Toy Problem 306

 19.5.2 Real-World Problem 308

19.6 Conclusion 311

References 312

**20 Towards Validating a Model of Households and Societies
in East Africa** 315
William G. Kennedy, Chenna Reddy Cotla, Tim Gulden,
Mark Coletti, and Claudio Cioffi-Revilla

20.1 Introduction 315

20.2 RiftLand Model Overview 316

 20.2.1 Reference Data for Validation 317

 20.2.2 Modeling the Environment 317

 20.2.3 Modeling Vegetation Growth 318

 20.2.4 Modeling Herds 319

20.3 Household Modeling 319

 20.3.1 Farming Activity 319

 20.3.2 Herding Activity 320

 20.3.3 Labor Activity 321

 20.3.4 Displaced Persons 321

 20.3.5 Household Decision Making 321

20.4 Modeling Household Behavior: Preliminary Results 322

 20.4.1 Survival in Semi-Arid Regions of Northeast
Kenya (Region 1) 323

 20.4.2 Survival in a Relatively Wet Area, Southwest
Uganda (Region 2) 324

 20.4.3 Survival in Burundi (Region 3) 325

20.5 Progress in RiftLand Model Validation 326

20.6 Conclusion and Future Work 326
