<b>1</b>	<b>Recent Earthquake and Tsunami Disasters Worldwide . . . . .</b>	<b>1</b>
1.1	Increase in the Number of Earthquake and Tsunami Disasters Worldwide . . . . .	1
1.2	Recent Earthquakes and Tsunamis Worldwide and Their Lessons . . . . .	6
1.2.1	1999 Kocaeli Earthquake, Turkey . . . . .	6
1.2.2	1999 Chi-Chi Earthquake, Taiwan . . . . .	10
1.2.3	2001 Gujarat-Kachchh Earthquake, India . . . . .	16
1.2.4	2003 Boumerdès Earthquake, Algeria . . . . .	20
1.2.5	2004 Sumatra Offshore Earthquake and Tsunami, Indonesia . . . . .	22
1.2.6	2005 Kashmir Earthquake, Pakistan . . . . .	27
1.2.7	2008 Wenchuan Earthquake, China . . . . .	29
1.3	Recent Earthquakes and Tsunamis in Japan and Their Lessons . . . . .	36
1.3.1	1993 Southwest Hokkaido Offshore Earthquake . . . . .	36
1.3.2	1993 Kushiro Offshore Earthquake . . . . .	39
1.3.3	1995 Kobe (Hyogo-ken Nambu) Earthquake . . . . .	41
1.3.4	2003 Tokachi Offshore Earthquake . . . . .	47
1.3.5	2004 Niigata-Chuetsu Earthquake . . . . .	50
1.3.6	2007 Noto Peninsula Earthquake . . . . .	56
1.3.7	2007 Niigata-Chuetsu Offshore Earthquake . . . . .	58
1.3.8	2008 Iwate Miyagi Inland Earthquake . . . . .	63
1.3.9	2011 Tohoku Earthquake (Great East Japan Earthquake and Tsunami Disaster) . . . . .	66
	References . . . . .	74
<b>2</b>	<b>Earthquake-Resistant Design and Reinforcement . . . . .</b>	<b>75</b>
2.1	Beginning of Earthquake-Resistant Design in Japan . . . . .	75
2.1.1	Earthquake Engineering and Seismology . . . . .	75

2.1.2	Beginning of Earthquake-Resistant Design: Seismic Coefficient Method . . . . .	77
2.1.3	Modified Seismic Coefficient Method . . . . .	79
2.1.4	Response Spectra . . . . .	81
2.2	Development of Earthquake-Resistant Design . . . . .	84
2.2.1	Earthquake-Resistant Design Against Soil Liquefaction . . . . .	84
2.2.2	Lifeline Earthquake Engineering . . . . .	86
2.2.3	Earthquake-Resistant Design Against Long-Period Ground Motion . . . . .	89
2.3	Performance-Based Earthquake-Resistant Design Against Two Levels of Earthquake Ground Motion . . . . .	90
2.3.1	JSCE Recommendation for Earthquake-Resistant Design and Reinforcement of Existing Structures . . . . .	90
2.3.2	Setting of the Two Levels of Ground Motion . . . . .	94
2.4	Dynamic Response of Ground . . . . .	97
2.4.1	Amplification of Earthquake Motion at Ground Surface and Dominant Periods . . . . .	97
2.4.2	Seismic Waves and Propagation . . . . .	97
2.4.3	Dynamic Analysis by the Mass-Spring-Damper Model . . . . .	104
2.5	Seismic Reinforcement . . . . .	110
2.5.1	Seismic Reinforcement of Concrete Piers . . . . .	110
2.5.2	Seismic Reinforcement of Earth Dams . . . . .	111
2.6	Measures Against Surface Earthquake Faults . . . . .	113
2.7	Earthquake-Resistant Design of Nuclear Power Plants . . . . .	116
2.7.1	Accident at the Fukushima Daiichi Nuclear Plant . . . . .	116
2.7.2	Flowchart of Earthquake-Resistant Design of Nuclear Power Plants and Surveys of Active Faults . . . . .	119
2.7.3	Earthquake-Resistant Design of Structures, Facilities and Foundation Ground . . . . .	120
2.7.4	Measures Against Tsunamis . . . . .	121
2.8	Countermeasures for Sewage Facilities Against Tsunamis . . . . .	122
	References . . . . .	123
<b>3</b>	<b>Soil Liquefaction and Countermeasures . . . . .</b>	<b>125</b>
3.1	Mechanism of Soil Liquefaction and Its Damage . . . . .	125
3.1.1	Mechanism of Soil Liquefaction . . . . .	125
3.1.2	Damage Caused by Liquefaction . . . . .	129
3.2	Estimation of Liquefaction Potential . . . . .	133
3.2.1	Estimation of Potential . . . . .	133
3.2.2	Liquefaction Hazard Map . . . . .	137
3.3	Countermeasures Against Soil Liquefaction . . . . .	138
3.3.1	Measures for Prevention of Soil Liquefaction . . . . .	138
3.3.2	Reinforcement of Foundations of Structures for Resisting Soil Liquefaction . . . . .	142

3.3.3	Countermeasures of Manholes Against Soil Liquefaction . . . . .	147
3.3.4	Restoring Inclined and Subsided Houses . . . . .	147
3.3.5	Measures Against Soil Liquefaction for Embankments and Levees . . . . .	149
	References . . . . .	152
<b>4</b>	<b>Liquefaction-Induced Ground Displacements: Damage and Countermeasures . . . . .</b>	<b>153</b>
4.1	Case Studies on Liquefaction-Induced Ground Displacements and Resulting Damage . . . . .	153
4.1.1	Initiation of Research on Liquefaction-Induced Ground Displacements . . . . .	153
4.1.2	1983 Central Japan Sea Earthquake . . . . .	156
4.1.3	1964 Niigata Earthquake . . . . .	163
4.1.4	1995 Kobe Earthquake . . . . .	176
4.1.5	1948 Fukui Earthquake . . . . .	183
4.1.6	1993 Southwest Hokkaido Offshore Earthquake . . . . .	187
4.1.7	1923 Great Kanto Earthquake . . . . .	190
4.1.8	1971 San Fernando Earthquake . . . . .	191
4.1.9	1990 Luzon Island Earthquake . . . . .	193
4.1.10	1999 Kocaeli Earthquake, Turkey . . . . .	196
4.1.11	2010 Darfield Earthquake, New Zealand . . . . .	198
4.1.12	Joint U.S.–Japan Research on Liquefaction-Induced Ground Displacement and Resulting Damage . . . . .	200
4.2	Mechanism of Liquefaction-Induced Large Ground Displacement . . . . .	202
4.2.1	Mechanism of Liquefaction Ground Flow . . . . .	202
4.2.2	Assessment of Type 1 Ground Displacement (on Sloped Ground Surface) . . . . .	203
4.2.3	Assessment of Type 2 Ground Displacement (Caused by Quay Wall Movement) . . . . .	206
4.2.4	Fluid Properties of Liquefied Soil . . . . .	208
4.3	Earthquake-Resistant Design of Buried Pipes and Foundations Against Liquefaction-Induced Ground Displacement . . . . .	214
4.3.1	Ground Strain and Damage to Buried Pipes . . . . .	214
4.3.2	Earthquake-Resistant Design of Buried Pipes . . . . .	218
4.3.3	Earthquake-Resistant Design of Foundations . . . . .	220
4.4	Countermeasures Against Liquefaction-Induced Ground Flow . . . . .	222
4.4.1	Countermeasures for Quay Walls . . . . .	222
4.4.2	Countermeasures for Foundations of Existing Structures . . . . .	224

**5 Dynamic Behaviors of Underground Structures During Earthquakes and Earthquake-Resistant Design . . . . . 229**

5.1 Analysis with Interaction Model of Ground and Underground Structures . . . . . 229

5.2 Behavior of Underground Tanks During Earthquakes . . . . . 232

5.2.1 Earthquake Observation of Underground Tanks and Surrounding Ground . . . . . 232

5.2.2 Dynamic Behavior of Underground Tanks During Earthquakes . . . . . 233

5.3 Discussion of Underground Tank Deformation . . . . . 239

5.4 Observation of the Dynamic Behavior of Submerged Tunnels . . . . . 246

5.4.1 Structures of Submerged Tunnels and the Ground Condition . . . . . 246

5.4.2 Deformation Behavior of Submerged Tunnels During Earthquakes . . . . . 248

5.5 Dynamic Behavior and Analysis of Rock Caverns . . . . . 251

5.5.1 Earthquake Resistance of Rock Caverns . . . . . 251

5.5.2 Behavior of Mountain Tunnels During Earthquakes . . . . . 252

5.5.3 Deformation Characteristics of Mountain Tunnels During Earthquakes . . . . . 254

5.6 Response Displacement Method . . . . . 259

5.6.1 Concept of the Response Displacement Method . . . . . 259

5.6.2 Deformation of Buried Pipes with Joints . . . . . 263

5.6.3 Verification of the Analytical Model by Earthquake Observation in Submerged Tunnels . . . . . 265

5.6.4 Deformation of Buried Pipes by Ground Fissures and Ground Differential Settlement . . . . . 266

5.6.5 Earthquake-Resistant Design of Underground Structures by the Response Displacement Method . . . . . 269

5.6.6 Input Ground Displacement . . . . . 271

References . . . . . 272

**6 Mitigation Measures Against Future Natural Disasters . . . . . 275**

6.1 Predicted Damaging Earthquakes . . . . . 275

6.1.1 Failed Earthquake and Tsunami Predictions and Subsequent Confusion . . . . . 275

6.1.2 Tokyo Area Earthquakes . . . . . 279

6.2 Measures Against Earthquakes Beneath the Tokyo Area . . . . . 282

6.2.1 Damage Prediction and Related Issues . . . . . 282

6.2.2 Safety of Industrial Complexes Around Tokyo Bay . . . . . 284

6.2.3 Improving Earthquake Resistance of Hilly Land Developed for Residential Use . . . . . 290

6.3 Earthquake Resistance of Abandoned Lignite Mines . . . . . 292

- 6.4 Natural Disaster Mitigation . . . . . 298
  - 6.4.1 Global Increase of Natural Disasters . . . . . 298
  - 6.4.2 Development of Anti-Tsunami Science and Engineering Plus Promotion of Tsunami Measures . . . . . 301
  - 6.4.3 Japanese Disaster Prevention Systems and Organizations . . . . . 302
  - 6.4.4 Earthquake Disaster Mitigation Strategies of the National Government . . . . . 304
  - 6.4.5 Recommendations from the Science Council of Japan for Natural Disaster Mitigation . . . . . 305
  - 6.4.6 Multidisciplinary Cooperation for Natural Disaster Mitigation . . . . . 308
- 6.5 International Cooperation in Disaster Prevention . . . . . 311
  - 6.5.1 Support for Disaster Prevention, Recovery and Restoration . . . . . 311
  - 6.5.2 Engineers Without Borders, Japan . . . . . 318
  - 6.5.3 Recommendations from the Science Council of Japan . . . . . 321
- References . . . . . 322
- Index . . . . . 323**
