

Contents

1	General Introduction	1
1.1	Shortage of Metal Resources.	1
1.2	Iron for Organic Synthesis	2
1.3	Iron-Catalyzed C–H Bond Activation.	2
1.4	Synthesis of Fused Aromatics via C–H Bond Activation	4
1.5	Thesis Outline.	5
	References	6
2	Iron-Catalyzed Naphthalene Synthesis from Alkyne and Grignard Reagent	11
2.1	Introduction	11
2.2	Initial Finding of Naphthalene Formation	11
2.3	Investigation of the Reaction Conditions	13
2.4	Scope and Limitations	17
2.5	Summary	18
2.6	Experimental Part	19
	References	21
3	Iron-Catalyzed Phenanthrene Synthesis from Alkyne and Grignard Reagent	23
3.1	Introduction	23
3.2	Iron-Catalyzed Phenanthrene Synthesis	23
3.3	Investigation of the Reaction Conditions	25
3.4	Scope and Limitations	27
3.5	Mechanistic Considerations.	28
3.6	Summary	32
3.7	Experimental Part	33
	References	64
4	Iron-Catalyzed Phenanthrene Synthesis from Alkyne and Aryl Bromide Mediated by Metallic Magnesium.	65
4.1	Introduction	65
4.2	Chelation Assisted C–H Bond Arylation with Aryl Bromide and Magnesium	65

4.3	Phenanthrene Synthesis from Aryl Bromide and Metallic Magnesium	66
4.4	Scope and Limitations	67
4.5	Summary	69
4.6	Experimental Part	69
	References	71
5	Summary and Perspectives.	73
5.1	Introduction	73

Iron-Catalyzed Synthesis of Fused Aromatic Compounds
via C-H Bond Activation

Matsumoto, A.

2014, XIII, 74 p. 105 illus., Hardcover

ISBN: 978-4-431-54927-7
