

Contents

Part I Introduction

- 1 Biological Significance of Nascent Polypeptides That Stall the Ribosome** 3
Koreaki Ito and Shinobu Chiba

Part II The Ribosome and the Exit Tunnel

- 2 Recent Progress in Ribosome Structure Studies** 23
Marat Yusupov
- 3 Structures of Nascent Polypeptide Chain-Dependent-Stalled Ribosome Complexes** 45
Daniel N. Wilson and Roland Beckmann
- 4 Tunnel Vision: Insights from Biochemical and Biophysical Studies** 61
Carol Deutsch
- 5 Nascent Peptide-Induced Signaling from the Exit Tunnel to the Outside of the Ribosome** 87
Thomas Bornemann, Wolf Holtkamp, and Wolfgang Wintermeyer
- 6 Ribosome Stalling at Diprolyl Motifs Is Alleviated by Elongation Factor P** 99
Agata L. Starosta and Daniel N. Wilson

Part III Emerging Experimental Approaches

- 7 Ribosome Profiling Analysis of In Vivo Translation** 119
Nicholas Ingolia

- 8 Analyzing the Nascentome (Polypeptidyl-tRNAs),
the Dynamic Hub of Translation 135**
Koreaki Ito

Part IV Regulatory Nascent Chains Sensing Metabolites and Drugs

- 9 Instructing the Translating Ribosome to Sense
L-Tryptophan During Synthesis of the TnaC
Nascent Regulatory Peptide 151**
Luis R. Cruz-Vera and Charles Yanofsky
- 10 Triggering Peptide-Dependent Translation Arrest
by Small Molecules: Ribosome Stalling Modulated
by Antibiotics 165**
Nora Vázquez-Laslop and Alexander S. Mankin
- 11 Translation Elongation Arrest Induced by S-Adenosyl-
L-Methionine-Sensing Nascent Peptide in Plants 187**
Yui Yamashita, Noriyuki Onoue, Katsunori Murota,
Hitoshi Onouchi, and Satoshi Naito
- 12 Co-translational Polyamine Sensing by Nascent
ODC Antizyme 203**
R. Palanimurugan, Leo Kurian, Vishal Hegde,
Kay Hofmann, and R. Jürgen Dohmen

Part V Elongation-Arresting Nascent Chains and Translocation Sensing

- 13 Isolation of Ribosome Stalling Motifs from Random Libraries 225**
Christopher J. Woolstenhulme and Allen R. Buskirk
- 14 The Coupling of *SecA* Expression to Secretion
Efficiency by *SecM*-Mediated Translation Arrest 241**
Harris D. Bernstein
- 15 MifM, a Regulatory Nascent Chain That Monitors
Membrane Protein Integration 257**
Shinobu Chiba
- 16 Arrest Peptides as Force Sensors to Study Co-translational
Membrane Protein Biogenesis 279**
Nurzian Ismail, Rickard Hedman, Nina Schiller,
Florian Cymer, Ola Nilsson, and Gunnar von Heijne

**17 Nascent Chain-Mediated Localization of mRNA
on the Endoplasmic Reticulum as an Important Step
of Unfolded Protein Response 291**
Kota Yanagitani and Kenji Kohno

Index 311

Regulatory Nascent Polypeptides

Ito, K. (Ed.)

2014, IX, 315 p. 75 illus., 62 illus. in color., Hardcover

ISBN: 978-4-431-55051-8
