Ensure Swift Flow of Information

Timely delivery of the right information
to the right place at the right time effectively
connects disaster managers with victims
and the outside world.

A Golden Rule in
Disaster Management is that
there is no Golden Rule

Successful disaster managers were never the slaves of premeditated plans and of the standard operating procedures but responded swiftly and adequately

Disaster Management is Like Mounting a Tiger

Successful disaster managers
neither underestimate ferocity
of a disaster nor overestimate
their capacities to ride over

Disasters Often Come in a Row

A disaster often becomes a bigger disaster
when problems begin to pileup

Uphold the Core Principles of Emergency Response

Once the rescue and the relief distribution phases of the response are over, focus must shift to rehabilitation, reconstruction, and development

Disaster Risk Reduction Initiative is Only as Good as the Teamwork

Disaster management demands both horizontal and vertical integration of interrelated institutions, capacities and resources

Disasters are Opportunities

Disasters offer open-ended opportunities to build back better

Community-Centric Disaster Management System is the Best Assurance for Disaster Risk Reduction

Prepared communities can reduce the catastrophic impact of crisis situations

A Danger Foreseen is the Danger Avoided

The best way to manage a disaster is to anticipate it and prevent it

Prioritize Between Vital, Essential, and Desirable

A quick and decisive view on vital,
essential, and desirable actions
is essential
