## Part I Description of Ophiolite Suites and the Naga Hills Ophiolite

<b>1</b>	<b>Introduction</b> . . . . .	3
1.1	Oman Ophiolite . . . . .	4
1.2	Troodos Ophiolite. . . . .	5
	References . . . . .	6
<b>2</b>	<b>Ophiolite Around the Indian Plate Margin</b> . . . . .	9
2.1	The Western Margin of the Indian Plate . . . . .	9
2.1.1	Bela . . . . .	9
2.1.2	Muslim Bagh and Waziristan. . . . .	9
2.2	The Northern Margin of the Indian Plate. . . . .	10
2.2.1	The Indus Suture Zone . . . . .	10
2.2.2	The Yarlung-Tsangpo (Yarlung-Zangbo) Suture Zone. . . . .	13
2.3	The Eastern Margin of the Indian Plate. . . . .	16
2.3.1	Tuting Metavolcanics . . . . .	16
2.3.2	Tidding Serpentinite . . . . .	17
2.3.3	Mayodia Ophiolite . . . . .	17
2.3.4	Indo-Myanmar Range . . . . .	17
2.3.5	Andaman Ophiolite. . . . .	17
2.4	Summary of Petrographic Features . . . . .	18
2.4.1	Waziristan . . . . .	18
2.4.2	Sapat. . . . .	19
2.4.3	Spontang . . . . .	19
2.4.4	Nidar . . . . .	19
2.4.5	Yungbwa. . . . .	19
2.4.6	Xiugugabu. . . . .	20
2.4.7	Zhongba . . . . .	20
2.4.8	Saga and Sangsang . . . . .	20
2.4.9	Xigaze . . . . .	20
2.4.10	Luobusa . . . . .	20
2.4.11	Andaman. . . . .	21
	References . . . . .	21
<b>3</b>	<b>Geology of the Naga Hills Ophiolite</b> . . . . .	25
3.1	Introduction . . . . .	25
3.2	Age. . . . .	25
3.3	Geological Setting and Stratigraphy . . . . .	26
3.3.1	Nimi Formation . . . . .	26
3.3.2	The Ophiolite Suite . . . . .	27
3.3.3	Disang Formation (Flysch) . . . . .	31
3.3.4	Jopi/Phokphur Formation. . . . .	31

3.4	Ultramafic Rocks and Cumulate Complexes . . . . .	33
3.4.1	Peridotite Tectonite. . . . .	33
3.4.2	Spinel Peridotite. . . . .	33
3.4.3	Serpentine . . . . .	34
3.4.4	Rodingite. . . . .	34
3.4.5	Cumulate Complexes . . . . .	34
3.4.6	Mafic Dikes. . . . .	39
3.5	Mafic Volcanics and Volcaniclastics. . . . .	39
3.6	Metabasic Rocks . . . . .	41
3.7	Oceanic Sediments . . . . .	41
3.8	Economic Minerals. . . . .	44
3.8.1	Chromite . . . . .	44
3.8.2	Magnetite . . . . .	44
3.8.3	Sulphide Mineralisation. . . . .	44
3.8.4	Laterite . . . . .	45
3.9	Late Felsic Intrusives/Late Tertiary Granitoids. . . . .	46
	References . . . . .	46
<b>4</b>	<b>Structure and Tectonics of the Naga Hills . . . . .</b>	<b>49</b>
4.1	Introduction . . . . .	49
4.2	Indo-Myanmar Range . . . . .	49
4.3	Geophysical Signature. . . . .	50
4.4	Structure . . . . .	51
4.4.1	Folds. . . . .	51
4.4.2	Faults . . . . .	52
4.4.3	Contact Between Disang Flysch and Ophiolite. . . . .	53
4.4.4	Contact Between Nimi Formation/Naga Metamorphics and Ophiolite. . . . .	53
4.4.5	Relationship Between Intra-Ophiolite Litho-Units. . . . .	53
4.4.6	Ophiolite and Sedimentary Cover. . . . .	53
4.5	Eastern Indian Plate Margin. . . . .	53
	References . . . . .	54
<b>5</b>	<b>Petrography . . . . .</b>	<b>57</b>
5.1	Introduction . . . . .	57
5.2	Peridotite Tectonite/Meta-ultramafics . . . . .	57
5.2.1	Spinel Peridotite. . . . .	59
5.3	Serpentine . . . . .	64
5.4	Rodingite. . . . .	64
5.5	The Cumulate Complexes. . . . .	64
5.5.1	Ultramafics . . . . .	64
5.5.2	Pyroxenite . . . . .	64
5.5.3	Gabbroids . . . . .	65
5.5.4	Plagiogranite . . . . .	65
5.5.5	Anorthosite . . . . .	65
5.6	Dolerite Dikes . . . . .	65
5.7	Basalt and Andesite . . . . .	66
5.7.1	Types of Basalt . . . . .	66
5.7.2	Porphyritic Andesite . . . . .	69

5.8	Volcaniclastics . . . . .	69
5.8.1	Lithic Tuff. . . . .	70
5.8.2	Vitric Tuff. . . . .	70
5.8.3	Crystal-Vitric Tuff . . . . .	70
5.8.4	Ignimbrite . . . . .	70
5.9	Metamorphics . . . . .	70
5.9.1	Metabasics. . . . .	71
5.9.2	Grunerite-Bearing Metachert . . . . .	73
5.10	Oceanic Pelagic Sediments . . . . .	74
5.10.1	Tuffaceous Sediments . . . . .	74
5.10.2	Argillaceous Sediments . . . . .	74
5.10.3	Arenaceous Sediment . . . . .	74
5.10.4	Carbonates. . . . .	74
5.10.5	Chert. . . . .	77
5.11	Ophiolite-Derived Cover Sediments: The Jopi/Pokhpur Formation . . . . .	77
5.12	Late Tertiary Granites . . . . .	77
	References . . . . .	77
<b>6</b>	<b>Petrogenesis . . . . .</b>	<b>79</b>
6.1	Ultramafics . . . . .	79
6.2	Gabbros. . . . .	79
6.3	Basalt . . . . .	80
6.4	High-Pressure Metabasic Rocks . . . . .	80
6.5	Chromitites . . . . .	81
6.6	Evolution of the Naga Hills Ophiolite. . . . .	82
	References . . . . .	82

## **Part II Photomicrographs and Backscattered Electron Images**

<b>7</b>	<b>Peridotite Tectonite . . . . .</b>	<b>87</b>
7.1	Dunite. . . . .	87
7.2	Harzburgite . . . . .	89
7.3	Lherzolite . . . . .	90
7.4	Wehrlite . . . . .	90
<b>8</b>	<b>Spinel Peridotite. . . . .</b>	<b>91</b>
8.1	Spinel Harzburgite . . . . .	91
8.2	Spinel lherzolite . . . . .	94
8.3	Serpentinised Spinel Peridotite . . . . .	97
<b>9</b>	<b>Pyroxenite . . . . .</b>	<b>99</b>
9.1	Olivine Websterite . . . . .	99
9.2	Hornblende Websterite . . . . .	100
9.3	Olivine Clinopyroxenite . . . . .	101
9.4	Clinopyroxenite . . . . .	101
<b>10</b>	<b>Serpentine . . . . .</b>	<b>103</b>
<b>11</b>	<b>Rodingite . . . . .</b>	<b>105</b>
<b>12</b>	<b>Chromitite . . . . .</b>	<b>107</b>

<b>13 Peridotite Cumulate</b> . . . . .	111
13.1 Dunite . . . . .	111
13.2 Harzburgite . . . . .	112
13.3 Lherzolite . . . . .	113
13.4 Wehrlite . . . . .	114
<b>14 Gabbro</b> . . . . .	115
14.1 Olivine Gabbro . . . . .	115
14.2 Olivine-Hornblende Gabbro . . . . .	116
14.3 Norite . . . . .	117
14.4 Gabbronorite . . . . .	117
14.5 Hornblende Gabbro . . . . .	120
14.6 Brecciated Gabbro . . . . .	120
<b>15 Plagiogranite</b> . . . . .	121
<b>16 Anorthosite</b> . . . . .	125
<b>17 Dolerite</b> . . . . .	127
<b>18 Mafic Volcanics</b> . . . . .	129
18.1 Olivine Basalt . . . . .	129
18.2 Plagioclase-Phyric Basalt . . . . .	130
18.3 Pyroxene-Phyric Basalt . . . . .	131
18.4 Basalt with Plagioclase Megacryst . . . . .	133
18.5 Andesite . . . . .	137
18.6 Trachybasalt . . . . .	138
18.7 Crater Facies Lava . . . . .	141
18.8 Spilite . . . . .	143
<b>19 Basaltic Hyaloclastite</b> . . . . .	145
<b>20 Volcaniclastics</b> . . . . .	153
20.1 Vitric Tuff (Ash and Pumice) . . . . .	153
20.2 Crystal-Vitric Tuff (Welded Tuff) . . . . .	155
20.3 Crystal-Lithic Tuff . . . . .	156
20.4 Volcanic and Tectonic Breccia . . . . .	157
20.5 Ignimbrite . . . . .	158
<b>21 Very-Low Grade Metamorphics</b> . . . . .	161
21.1 Chlorite-Natrolite-Albite Association . . . . .	161
21.2 Chlorite-Prehnite Schist . . . . .	162
<b>22 Greenschist</b> . . . . .	165
<b>23 Glaucophane Schist</b> . . . . .	169
23.1 Epidote-Chlorite-Phengite-Glaucophane-Omphacite Schist . . . . .	169
23.2 Chlorite-Albite-Epidote-Actinolite-Glaucophane Gneiss/Schist . . . . .	171
23.3 Blue Amphibole-bearing Ferruginous Metachert and Arenite . . . . .	172
23.4 Epidote-Garnet-Glaucophane Schist . . . . .	173
23.5 Mylonitic Glaucophane Schist . . . . .	176
23.6 Ultra-Cataclastic Glaucophane Schist . . . . .	178

<b>24 Eclogite</b> . . . . .	183
<b>25 Oceanic Sediments</b> . . . . .	187
25.1 Tuffaceous Sediments . . . . .	187
25.2 Argillaceous Sediments . . . . .	188
25.3 Arenaceous Sediments. . . . .	190
25.4 Carbonates. . . . .	193
25.5 Radiolarian Chert . . . . .	194
<b>26 Cover Sediments (Jopi Formation)</b> . . . . .	199
26.1 Polymictic Tuff Breccia: Part 1 (Sample C21/79). . . . .	199
26.2 Polymictic Tuff Breccia: Part 2 (Other Samples) . . . . .	202
<b>27 Late Tertiary Granites</b> . . . . .	207
<b>28 Metamorphics of the Nimi Formation</b> . . . . .	209
<b>Appendices</b> . . . . .	211
<b>About the Authors.</b> . . . . .	217
<b>Glossary</b> . . . . .	219
<b>Subject Index</b> . . . . .	227
<b>Locality Index.</b> . . . . .	233

A Petrographic Atlas of Ophiolite

An example from the eastern India-Asia collision zone

Ghose, N.; Chatterjee, N.; Fareeduddin

2014, XVII, 234 p. 477 illus., 410 illus. in color.,

Hardcover

ISBN: 978-81-322-1568-4
