

Contents

- 1 Context and Overview of Environment and Development** 1
 - Economics** 1
 - 1.1 A Pluralist Approach 2
 - 1.2 Statistical Graphs of Key Indicators 3
 - 1.3 Gross Domestic Product per Capita 3
 - 1.4 Traditional and Modern Pollution 4
 - 1.5 Commons and Livelihoods 8
 - 1.6 Complex Ecology 11
 - 1.7 Global Public Goods 12
 - 1.8 Sustainable Development 15
 - References 16
- 2 Models and Frameworks** 19
 - 2.1 Constrained Optimization Models 20
 - 2.2 Game Theory Models 21
 - 2.3 Differential Equation Models 22
 - 2.4 Regression Models and Causality 24
 - 2.5 The Institutions and Development Framework 27
 - 2.6 Conclusions and Pointers: A Framework for Thinking
about Diverse Models—Both Theoretical and Statistical 28
 - 2.6.1 Theoretical Models 29
 - 2.6.2 Statistical Models 29
 - References 30
- 3 Traditional and Modern Pollution** 31
 - 3.1 Introduction 31
 - 3.2 Core Economic Model: Balancing Costs and Benefits
of Pollution Control 32
 - 3.3 Extension 1: Implementing a System of Market Signals
for Cost-Effective Pollution Control 33
 - 3.4 Extension 2: Causal Analysis for Pollution 34

3.5	Extension 3: Physical and Social Complexities Related to the Economic Framework for Understanding Air Pollution . . .	35
	Appendix	39
	References	39
4	Livelihoods and the Commons	41
4.1	Core Economic Model: Tragedy of the Commons	42
4.2	Extension 1: Ways of Overcoming the Prisoner's Dilemma	42
4.3	Extension 2: Evaluating the Effect of Management Regimes on Forest Stock	43
4.4	Extension 3: Role of Social Ecology in the Dependence on the Commons	43
	Appendix	46
	References	46
5	Complex Ecology	49
5.1	Core Economic Model: Logistic Fish Growth with Harvest	50
5.2	Extension 1: A Model for Wildlife in Ranthambhore National Park	51
5.3	Extension 2: Millenium Ecosystem Assessment Scenarios	53
5.4	Extension 3: Incorporating Ecological Dynamics while Valuing a National Park	55
5.5	Extension 4: Regime Shifts and Detecting them	56
5.6	Concluding Remarks on Complexity	58
	References	60
6	Global Public Goods	61
6.1	Core Economic Model: Game Theory Model of Public Goods	62
6.2	Extension 1: Distinguishing Between the Aggregation Technology of Different Public Goods	62
6.3	Extension 2: Interlinked Global Change with Climate Change and Biological Invasions	63
6.4	Extension 3: The Discount Rate in Climate Change and Equity	64
6.5	Extension 4: Livelihoods and Carbon Sequestration in Developing Countries	65
	6.5.1 Institutional Variables	66
	6.5.2 Causal Graphs	66
	Appendix	68
	References	71

7 Sustainable Development and Institutions	73
7.1 Core Economic Model: The Environment is a Gigantic Capital Stock	74
7.2 Extension One: ‘Adjusted Savings’ Estimates	74
7.3 Extension 2: Value Articulating Institutions in a Deliberative Democracy.	76
7.4 Extension 3: How Resources May Curse Democracy	77
7.5 Extension 4: Statistical Evaluation of Dams and Poverty	78
Appendix A.1	79
Appendix A.2	80
References	80
Index	83

The Environment in Economics and Development

Pluralist Extensions of Core Economic Models

Dayal, V.

2014, XI, 84 p. 54 illus., Softcover

ISBN: 978-81-322-1670-4
