

Contents

1	Mixture Models and Mixture Designs:	
	Scope of the Monograph	1
1.1	Introduction	1
1.2	Mixture Models	2
1.3	Mixture Designs	3
1.3.1	Simplex Lattice Designs	4
1.3.2	Simplex Centroid Designs	4
1.3.3	Axial Designs	4
1.4	Exact Versus Approximate or Continuous Designs	5
1.5	Applications of Mixture Methodology	5
1.6	Chapter-Wise Coverage of Topics	6
	References	7
2	Optimal Regression Designs	9
2.1	Introduction	9
2.2	Optimality Criteria	11
2.3	One Dimensional Polynomial Regression	12
2.4	Multi-factor First Degree Polynomial Fit Models	16
2.5	Multi-factor Second Degree Polynomial Fit Models	18
	References	19
3	Parameter Estimation in Linear and Quadratic	
	Mixture Models	23
3.1	Introduction	23
3.2	Some Standard Mixture Designs and Estimation of Parameters in Homogeneous Linear Mixture Models	25
3.3	Generalizations of Axial Design and Their Comparison	27
3.3.1	Generalized Axial Design of Type I (D_1)	27
3.3.2	Generalized Axial Design of Type II (D_2)	28
3.3.3	Generalized Axial Design of Type III (D_3)	28
3.3.4	Comparison Between Generalized Axial Designs of Type II (D_2) and Type III (D_3)	30

3.4	Estimation of Parameters in Canonical Homogeneous Quadratic Mixture Model	31
3.5	Other Mixture Models.	36
3.5.1	Estimation of Parameters in Becker's Homogeneous Model of Degree One in the Presence of Only Two-Component Synergistic Effects	37
3.5.2	Another Competing Design	38
3.5.3	Design Description and Estimability	38
3.5.4	Estimation of Parameters in Draper–St. John's Model	40
3.6	Concluding Remarks	41
	References	42
4	Optimal Mixture Designs for Estimation of Natural Parameters in Scheffé's Models.	43
4.1	Introduction	43
4.2	Optimum Designs for First and Second Degree Models	44
4.2.1	D - and I -Optimum Designs	44
4.2.2	ϕ_p -Optimum Designs	47
4.2.3	Kiefer-Optimal Designs.	48
4.3	Polynomial Models of Degree Three and More	50
4.4	Mixture-Amount Model.	52
	References	60
5	Optimal Mixture Designs for Estimation of Natural Parameters in Scheffé's Model Under Constrained Factor Space	63
5.1	Introduction	63
5.2	Optimum Designs.	66
5.2.1	First-order designs	66
5.2.2	Second-order designs	70
	References	73
6	Optimal Mixture Designs for Estimation of Natural Parameters in Other Mixture Models	75
6.1	Introduction	75
6.2	Becker's Models.	75
6.3	Darroch–Waller Model	80
6.4	Log-Contrast Model	80
6.5	Models with Inverse Terms	84
	References	84

7	Optimal Designs for Estimation of Optimum Mixture in Scheffé's Quadratic Model	87
7.1	Introduction	87
7.2	Estimation of Optimum Mixing Proportions	88
7.3	Optimum Mixture Designs Under Trace-Optimality Criterion	91
7.3.1	Case of Two Mixing Components	91
7.3.2	Case of Three Mixing Components	92
7.4	Optimum Mixture Designs via Equivalence Theory	96
7.4.1	An Alternative Representation of Model	96
7.4.2	Case of Three Components	98
7.4.3	Case of Four Component Mixture	99
7.5	Optimum Mixture Designs with Unequal Apriori Moments	100
7.5.1	Case of Two Components	101
7.5.2	Case of Three Component Mixture	103
	References	108
8	More on Estimation of Optimum Mixture in Scheffé's Quadratic Model	111
8.1	Introduction	111
8.2	Optimum Mixture Designs Under Deficiency Criterion	112
8.2.1	Case of Two Mixing Components	113
8.2.2	Case of Three Components	113
8.3	Optimum Mixture Designs Under Minimax Criterion	116
	References	121
9	Optimal Designs for Estimation of Optimum Mixture in Scheffé's Quadratic Model Under Constrained Factor Space	123
9.1	Introduction	123
9.2	Optimum Mixture Designs Under Constraint on One Component	124
9.2.1	Case of Two Component Mixture Model	124
9.2.2	Case of Three Component Mixture Model	126
9.2.3	A Heuristic Search for Optimum Design	126
9.2.4	A Competitive Design	131
9.3	Optimum Designs Under Cost Constraint	132
9.3.1	Case of Two Components	133
9.3.2	Case of Three Components	133
	References	136

10	Optimal Designs for Estimation of Optimum Mixture Under Darroch–Waller and Log-Contrast Models	137
10.1	Introduction	137
10.2	Optimality Under Darroch–Waller Model	138
10.3	Optimality Under Log-Contrast Model	141
	References	146
11	Applications of Mixture Experiments	149
11.1	Introduction	149
11.2	Application in Replacement Series Intercropping Experiment	150
11.3	Preparation and Standardization of RTS Fruit Beverages.	151
11.4	Application in Pharmaceutical Experiments	152
11.4.1	Optimum Design for Parameter Estimation	154
11.4.2	Optimum Design for Estimation of the Optimum Composition of M_1	156
	References	159
12	Miscellaneous Topics: Robust Mixtures, Random Regression Coefficients, Multi-response Experiments, Mixture–Amount Models, Blocking in Mixture Designs	161
12.1	Robust Mixture Designs	161
12.1.1	Preliminaries	161
12.1.2	V-Optimum Design	164
12.1.3	Minimum Bias Design	165
12.2	Optimum Mixture Designs for Random Coefficients Mixture Models	166
12.2.1	Preliminaries	166
12.2.2	Characterization	168
12.2.3	Darroch–Waller Model	175
12.3	Optimum Designs for Optimum Mixture in Some Variants of Scheffé’s Quadratic Mixture Model	180
12.3.1	Preliminaries	180
12.3.2	Optimality in Mixture–Amount Model of Pal and Mandal	180
12.3.3	Optimality in Multi-response Mixture Model	184
12.3.4	Optimality in Multi-response Mixture–Amount Model	187
12.4	Mixture Designs in Blocks	189
12.4.1	Preliminaries	189
12.4.2	Orthogonal Mixture Designs Based on Symmetric Simplex Block Designs	192
12.4.3	Mixture Designs with Orthogonal Blocks Based on Mates of Latin Squares.	193

12.4.4	<i>D</i> -Optimal Minimum Support Mixture Designs	194
12.4.5	Model and Estimators	194
12.4.6	Construction of Optimum Designs	195
12.4.7	Comparison with Other Designs	197
	References	199
	Bibliography	201
	Author Index	203
	Subject Index	207

Optimal Mixture Experiments

Sinha, B.K.; Mandal, N.K.; Pal, M.; Das, P.

2014, XIX, 209 p. 2 illus., Softcover

ISBN: 978-81-322-1785-5
