

Contents

Reliability-Centric Studies in Smart Grids: Adequacy and Vulnerability Considerations	1
Vijay Venu Vadlamudi, Rajesh Karki, Gerd H. Kjølle and Kjell Sand	
Security of Supply in Active Distribution Networks with PHEV-Based Strategic Microgrids	17
Dilan Jayaweera and Syed Islam	
Operational Characteristics of Microgrids with Electric Vehicles	33
Clara Sofia Gouveia, Paulo Ribeiro, Carlos L. Moreira and João Peças Lopes	
An Optimized Adaptive Protection Scheme for Distribution Systems Penetrated with Distributed Generators	51
Ahmed H. Osman, Mohamed S. Hassan and Mohamad Sulaiman	
Protection System Reliability Assessment Considering Smart Grid Technologies	67
Ahmed Saleh Alabdulwahab and Roy Billinton	
Smart Charging of Plug-in Electric Vehicles Under Driving Behavior Uncertainty	85
Marina González Vayá and Göran Andersson	
Multivariate Stochastic Modeling of Plug-in Electric Vehicles Demand Profile Within Domestic Grid	101
Ehsan Pashajavid and Masoud Aliakbar Golkar	
Probabilistic Home Load Controlling Considering Plug-in Hybrid Electric Vehicle Uncertainties	117
Mahmud Fotuhi-Firuzabad, Mohammad Rastegar, Amir Safdarian and Farrokh Aminifar	

A Load Management Perspective of the Smart Grid: Simple and Effective Tools to Enhance Reliability 133
Amir Moshari and Akbar Ebrahimi

Evaluating the Performance of Small Autonomous Power Systems Using Reliability Worth Analysis 147
Marios N. Moschakis, Yiannis A. Katsigiannis and Pavlos S. Georgilakis

Condition Monitoring Benefit for Operation Support of Offshore Wind Turbines 169
Sebastian Thöns and David McMillan

Towards Reliability Centred Maintenance of Wind Turbines 183
David McMillan and Graham W. Ault

Cable Segment Replacement Optimization 195
Patrik Hilber

Reliability Modeling and Analysis of Smart Power
Systems

Karki, R.; Billinton, R.; Verma, A.K. (Eds.)

2014, XIV, 202 p. 89 illus., Hardcover

ISBN: 978-81-322-1797-8
