4	Major Phytonematodes Associated with Horticultural Crops and Their Diagnostic Keys.....	55
4.1	Potato Rot Nematode (<i>Ditylenchus destructor</i>)	55
4.1.1	Scientific Classification.....	55
4.2	Stem and Bulb Nematode (<i>Ditylenchus dipsaci</i>)	56
4.2.1	Scientific Classification.....	56
4.3	Awl Nematode (<i>Dolichodorus</i> spp.)	57
4.3.1	Scientific Classification.....	57
4.4	Golden Cyst Nematode of Potato (<i>Globodera rostochiensis</i>).....	58
4.4.1	Scientific Classification.....	58
4.5	Pale Cyst Nematode of Potato (<i>Globodera pallida</i>)	60
4.5.1	Scientific Classification.....	60
4.6	Spiral Nematode (<i>Helicotylenchus</i> spp.).....	63
4.6.1	Scientific Classification.....	63
4.7	Sheath Nematode (<i>Hemicycliophora thienemanni</i>)	63
4.7.1	Scientific Classification.....	63
4.8	Sugar Beet Cyst Nematode (<i>Heterodera schachtii</i>)	64
4.8.1	Scientific Classification.....	64
4.9	Lance Nematode (<i>Hoplolaimus gaelatus</i>)	65
4.9.1	Scientific Classification.....	65
4.10	Needle Nematode (<i>Longidorus</i> spp.)	66
4.10.1	Scientific Classification.....	66
4.11	Southern Root-Knot Nematode (<i>Meloidogyne incognita</i>).....	67
4.11.1	Scientific Classification.....	67
4.12	Javanese Root-Knot Nematode (<i>Meloidogyne javanica</i>)	68
4.12.1	Scientific Classification.....	68
4.13	Peanut Root-Knot Nematode (<i>Meloidogyne arenaria</i>)	69
4.13.1	Scientific Classification.....	69
4.14	Northern Root-Knot Nematode (<i>Meloidogyne hapla</i>).....	70
4.14.1	Scientific Classification.....	71
4.15	False Root-Knot Nematode (<i>Nacobbus</i> spp.)	71
4.15.1	Scientific Classification.....	71
4.16	Stubby-Root Nematode (<i>Trichodorus</i> spp.).....	72
4.16.1	Scientific Classification.....	72

4.17	Pin Nematode (<i>Paratylenchus</i> spp.).....	73
4.17.1	Scientific Classification.....	73
4.18	Lesion Nematode (<i>Pratylenchus coffeae</i>).....	74
4.18.1	Scientific Classification.....	74
4.19	Burrowing Nematode (<i>Radopholus similis</i>).....	75
4.19.1	Scientific Classification.....	75
4.20	Reniform Nematode (<i>Rotylenchulus reniformis</i>).....	75
4.20.1	Scientific Classification.....	76
4.21	Yam Nematode (<i>Scutellonema</i> spp.).....	76
4.21.1	Scientific Classification.....	76
4.22	Stunt Nematode (<i>Tylenchorhynchus</i> spp.).....	77
4.22.1	Scientific Classification.....	77
4.23	Dagger Nematode (<i>Xiphinema americanum</i>).....	78
4.23.1	Scientific Classification.....	78
4.24	Strawberry Foliar Nematode (<i>Aphelenchoides fragariae</i>).....	78
4.24.1	Scientific Classification.....	78
4.25	Chrysanthemum Foliar Nematode (<i>Aphelenchoides ritzemabosi</i>).....	79
4.25.1	Scientific Classification.....	79
4.26	Mushroom Nematode (<i>Aphelenchoides composticola</i>).....	80
4.26.1	Scientific Classification.....	80
4.27	Mushroom Spawn Nematode (<i>Ditylenchus myceliophagus</i>).....	80
4.27.1	Scientific Classification.....	80
4.28	Bent Grass Nematode/Purple Nematode (<i>Anguina agrostis</i>).....	81
4.28.1	Scientific Classification.....	81
4.29	Sting Nematode (<i>Belonolaimus longicaudatus</i>).....	82
4.29.1	Scientific Classification.....	82
4.30	Coconut Red Ring Nematode or Palm Nematode (<i>Rhadinaphelenchus/Bursaphelenchus cocophilus</i>).....	82
4.30.1	Scientific Classification.....	83
4.31	Ring Nematode (<i>Criconema</i> spp.).....	84
4.31.1	Scientific Classification.....	84
4.32	Ring Nematode (<i>Criconemoides</i> spp.).....	85
4.32.1	Scientific Classification.....	85
4.33	A Summarized Diagnostic Key to Major Genera of Phytonematodes.....	86
	References.....	88

5 Symptoms Caused by Phytonematodes

	and Disease Diagnosis.....	89
5.1	Damage.....	89
5.2	General Aboveground Symptoms.....	91
5.3	Abnormalities Resulting from Injury to Buds, Growing Points, and Flower Primordia.....	92
5.3.1	Dead or Devitalized Buds.....	92
5.3.2	Crinkled and Distorted Stems and Foliage/“Crimp”.....	92
5.3.3	Seed Galls.....	92

5.4	Abnormalities Resulting from Internal Injury to Stems and Foliage	93
5.4.1	Necrosis and Discoloration	93
5.4.2	Leaf Spots and Lesions	94
5.4.3	Leaf Galls	94
5.4.4	Twisting of Leaves and Stem	94
5.4.5	Crinkled and Distorted Stem and Foliage	94
5.5	Symptoms Due to Belowground Feeders	94
5.5.1	Symptoms on Aboveground Plant Parts	94
5.6	Symptoms on Belowground Plant Parts	95
5.6.1	Root Galls/Root Knots	96
5.6.2	<i>Rhizobium</i> Nodules/Nematode Galls	96
5.6.3	Other Root Swellings	96
5.6.4	Rotting of Fleshy Parts	97
5.6.5	Surface Necrosis	97
5.6.6	Lesions	98
5.6.7	Excessive Root Branching	98
5.6.8	Injured/Reduced/Devitalized Root Tips	98
5.6.9	Abbreviated Root Systems	99

11.11.8	Techniques to Test the Efficacy of Nematicides	351
11.12	Crop Loss Assessment Due to Nematodes.....	354
11.12.1	Strategies for Loss Assessment.....	355
11.12.2	Quantification of Nematode/Disease	356
11.12.3	Collection of Data to Measure the Disease–Loss Relationship	356
11.12.4	Mathematical Models for Crop Damage Assessment.....	358
11.12.5	Types of Models.....	358
11.12.6	Modeling of the Disease–Loss Relationship	361
11.12.7	Model Validation and Prediction.....	362
11.12.8	Parameter Measurement and Estimation.....	363
11.12.9	Development and Use of Regional Crop Loss Databases.....	364
11.12.10	Nematode Damage Models.....	364
11.12.11	Approaches of Estimating Yield Losses.....	365
	References.....	366
12	Nematodes of Quarantine Importance.....	369
12.1	Biosecurity Implications	371
12.2	Nematodes Under Quarantine Act	372
12.2.1	Potato Cyst Nematodes	372
12.2.2	Golden Cyst Nematode of Potato (<i>Globodera rostochiensis</i>).....	373
12.2.3	Pale/White Cyst Nematode of Potato (<i>Globodera pallida</i>)	373
12.2.4	Stem and Bulb Nematode (<i>Ditylenchus dipsaci</i>)	376
12.2.5	Potato Rot Nematode (<i>Ditylenchus destructor</i>)	378
12.2.6	The Burrowing Nematode (<i>Radopholus similis</i> /R. <i>citrophilus</i>) on Citrus	379
12.2.7	Procedure for Quarantine Inspection for Nematodes.....	381
12.2.8	Molecular Aids to Nematode Diagnosis	382
12.2.9	Avoiding Infiltration of Nematodes/Restricting the Spread.....	383
12.2.10	Some Requirements and Solutions	384
12.2.11	Future Thrusts	384
	References.....	384
13	Novel Methods of Nematode Management.....	387
13.1	Plant Nematode Resistance Genes.....	388
13.2	Manipulation of Natural Resistance Genes.....	390
13.3	Application of Recombinant DNA Technology.....	390
13.3.1	Broad Classes of Transgenic Nematode Control Strategies	391
13.3.2	Targets for Novel Transgenic Resistance	391

13.3.3	Targeting Feeding Cells Required by Nematodes.....	392
13.3.4	Targeting the Nematode Directly	392
13.3.5	Molecules for Transgenic Expression.....	393
13.3.6	Plantibodies.....	393
13.3.7	Proteinase Inhibitors	394
13.3.8	Promoters	396
13.4	Nematode Ecdysteroids	397
13.5	Inhibition of Sterol Metabolism.....	399
13.6	Phytoecdysteroid.....	400
13.7	Juvenile Hormone (JH) in Nematode Management.....	401
13.8	Vertebrate Steroid Hormones.....	402
13.9	DAPG (2,4-Diacetylphloroglucinol).....	402
13.10	Avermectins	403
13.10.1	Mechanism of Action	403
13.11	Lectins.....	404
13.12	Endotoxins of <i>Bacillus thuringiensis</i> (Bt).....	406
13.13	Bio-fumigation.....	407
13.13.1	General Procedure of Bio-fumigation.....	409
	References.....	410

Horticultural Nematology

Ravichandra, N.G.

2014, XXV, 412 p. 98 illus., 81 illus. in color., Hardcover

ISBN: 978-81-322-1840-1
