

Contents

1	Introduction to Gap Junction	1
2	Historical and Topological Perspective of Connexins	3
3	Molecular Components and Nomenclature of Gap Junctions	5
4	General Cell Biology of Connexins	7
4.1	Synthesis, Maturation, and Transport to the Cell Membrane	7
4.2	Post-translational Modifications, Half-Life, and Degradation	8
5	Genomic Organization of Connexins	11
5.1	Cx32	11
5.2	Cx40	12
5.3	Cx43	13
5.4	Cx45	14
5.5	Cx26	14
5.6	Cx31	14
5.7	Cx30	15
5.8	Cx36, Cx39, and Cx57 Genes	15
6	Transcriptional Regulation of the Connexin Gene	17
6.1	Regulation by Ubiquitous Factors and Signal Transduction Pathways	17
6.1.1	Sp1 and Activator Protein 1 (AP-1)	17
6.1.2	Cyclic AMP	18
6.1.3	Retinoids	19
6.1.4	Wnt Pathway	20
6.2	Regulation by Tissue-Specific Factors	20
6.2.1	Homeodomain Transcription Factors	21
6.2.2	T-Box Transcription Factors (Tbx5, Tbx2, Tbx3)	21
6.2.3	GATA Family	22

6.2.4	HNF-1	22
6.2.5	Oestrogen	23
6.2.6	Thyroid Hormone.....	23
7	Epigenetic Regulation of Connexins.....	25
7.1	Histone Acetylation/Deacetylation	25
7.2	DNA Methylation	26
8	Translational Regulation of Connexins.....	27
8.1	Cap-Dependent and Cap-Independent Translation.....	27
8.2	MicroRNAs (miRNAs) and Translational Regulation.....	29
9	Interaction Partners of Connexin Proteins.....	33
9.1	Cytoskeleton Proteins	33
9.2	Junction Proteins.....	34
9.3	Enzymes.....	35
9.4	Other Proteins	37
10	Tissue Distribution of Connexins.....	39
10.1	Connexins in Vascular System.....	39
10.2	Connexins in the Heart.....	41
10.3	Connexins in the Nervous System	43
10.3.1	Neuronal Connexins.....	43
10.3.2	Glial Connexins.....	44
10.3.3	Gap Junctions Between the Glial Cell Types	46
10.3.4	Gap Junctions Between the Glial Cells and Neurons	46
10.3.5	Functions of Neuronal Connexins.....	47
10.3.6	Connexin Remodelling During Brain Pathologies.....	50
10.4	Connexins in the Skeletal System.....	52
10.5	Connexins in the Inner Ear	54
10.6	Connexins in the Endometrium	55
10.7	Connexins in the β Cells of Pancreas.....	56
11	Connexin Functions	59
11.1	Connexins as Growth Regulators.....	59
11.2	Connexins in Cell Migration.....	61
11.2.1	Channel-Dependent Role of Connexins in Cell Migration	62
11.2.2	Channel-Independent Role of Connexin in Cell Migration	63
11.3	Connexins and Gene Expression	64
11.4	Connexins in Shear Stress.....	64
11.5	Hemichannel-Dependent Functions of Connexins	65
11.5.1	Cell Cycle.....	66
11.5.2	Ischaemic Preconditioning.....	67
11.5.3	Mechano-transduction.....	68

12	Connexin Mutations and Disease	69
12.1	Cx43 and Oculodentodigital Dysplasia (ODDD)	69
12.2	Cx46, Cx50, and Cataract	71
12.3	Cx32, Cx47, and Myelin-Related Diseases	72
12.4	Cx26, Cx31, and Cx30 Genes and Skin Diseases and Hearing Malfunctions.....	73
12.5	Cx43, Cx37, Cx40, and Cardiovascular Disease	76
	Suggested Reading	77
