
Contents

1 Introduction to Oxidative Stress	1
Sources of Oxidative Stress.....	2
Mitochondria.....	2
Cellular Oxidases (NOX and XOR).....	3
Metal-Catalyzed Reactions	3
Myeloperoxidase (MPO)	3
NO Synthases (NOS)	4
Other Sources.....	4
Cellular Redox Status: Free Radicals and Oxidative Stress.	
What Are Oxidants? Various Oxygen Radicals.....	4
Singlet Oxygen ($^1\text{O}_2$).....	5
Superoxide Radical ($\bullet\text{O}_2^-/\text{HO}\bullet_2$)	5
Hydrogen Peroxide (H_2O_2)	6
Hydroxyl Radical ($\text{OH}\bullet$)	6
Peroxyl Radicals ($\text{ROO}\bullet$).....	6
Reactive Nitrogen Species (RNS).....	7
Physiological Markers of Oxidative Stress	7
8-Hydroxydeoxyguanosine	8
8-Nitroguanine	8
Protein Carbonyls.....	9
Inducible Nitric Oxide Synthase	9
Nitrotyrosine	9
Malondialdehydes	9
F2-Isoprostanes	9
Oxidative Products of Sugars.....	10
Redox Ratio (GSH/GSSG)	10
Nuclear Factor- κB	10
Cyclooxygenase-2.....	10
Glutathione S-Transferase-pi	11
Heme Oxygenase I.....	11
Physiological Significance of Oxidative Stress.....	11
References	14
2 Oxidative Stress in Pathogenesis	19
Neurodegenerative Diseases: Parkinson's	
and Alzheimer's Diseases.....	19
Role of Pathogenesis in AD and PD	20

Electrical and Biological Effects.....	22
Cascades Leading to Dopamine Cell Degeneration.....	23
Antioxidants Link in Neurodegenerative Disorders	23
Cardiovascular Diseases	25
Hypercholesterolemia and Atherosclerosis.....	25
Hypoxia and Stroke.....	27
ROS and Myocardial Infarction.....	28
Antioxidants and CVD.....	30
Reproductive Systems Disorders (Male and Female)	30
Male Reproduction.....	31
Female Reproduction	35
Role of Antioxidants	39
Autoimmune Diseases	40
HIV	40
Colitis	42
Rheumatoid Arthritis.....	43
References	45
Neurodegeneration Diseases.....	45
Cardiovascular Diseases	47
Male Reproduction.....	49
Female Reproductive System.....	50
Autoimmune Diseases	52
3 Oxidative Stress in Metabolic Disorders/Diseases.....	55
Diabetes	55
Major Mechanisms of Hyperglycemia-Induced Damage	56
Activation of NF- κ B	59
Activation of Stress Kinases (JNK/SAPK and p38 MAPK).....	59
Activation of Hexosamine Pathway	60
Obesity	61
Adipose Tissue/Adipocyte	62
Lipid Oxidation.....	62
Oxygen Overconsumption and Increased Metabolic ROS	63
Nutritional and Physiological Antioxidant Deficiency	63
Chronic Low-Grade Inflammation.....	64
Aging	65
Oxidation of Biomolecules	65
Depletion of Nutrients and Antioxidants	67
Cellular Senescence and Death.....	68
Inflammation	69
Organelle Dysfunction (Mitochondria).....	70
Autophagy.....	71
References	71

Oxidative Stress Mechanisms and their Modulation

Bansal, M.; Kaushal, N.

2014, XVIII, 167 p. 25 illus., 4 illus. in color., Hardcover

ISBN: 978-81-322-2031-2
