

Contents

1	Boundary Behavior of Univalent Harmonic Mappings	1
	Daoud Bshouty and Abdallah Lyzzaik	
2	Harmonic Univalent Mappings and Minimal Graphs	21
	Zach Boyd and Michael Dorff	
3	The Minimal Surfaces Over the Slanted Half-Planes, Vertical Strips and Single Slit	47
	Liulan Li, Saminathan Ponnusamy and Matti Vuorinen	
4	A Survey On Some Special Classes of Bazilevič Functions and Related Function Classes	63
	Pravati Sahoo and R. N. Mohapatra	
5	Uniqueness of Entire Functions Sharing Certain Values with Derivatives	89
	Indrajit Lahiri	
6	Differential Superordinations and Sandwich-Type Results	109
	Teodor Bulboacă, Nak Eun Cho and Pranay Goswami	
7	Starlikeness and Convexity of Certain Integral Transforms by using Duality Technique	147
	Satwanti Devi and A. Swaminathan	
8	Eneström–Kakeya Theorem and Some of Its Generalizations	171
	Robert B. Gardner and N. K. Govil	
9	Starlikeness, Convexity and Close-to-convexity of Harmonic Mappings	201
	Sumit Nagpal and V. Ravichandran	
10	On Generalized p-valent Non-Bazilevic Type Functions	215
	Khalida Inayat Noor	

11	Integral Mean Estimates for a Polynomial with Restricted Zeros . . .	227
	A. Liman and W. M. Shah	
12	Uniqueness Results of Meromorphic Functions Concerning Small Functions	235
	Xiao-Min Li, Kai-Mei Wang and Hong-Xun Yi	
13	Maximal Polynomial Ranges for a Domain of Intersection of Two Circular Disks	245
	Chinta Mani Pokhrel	

Current Topics in Pure and Computational Complex
Analysis

Joshi, S.; Dorff, M.; Lahiri, I. (Eds.)

2014, XI, 254 p. 25 illus., 20 illus. in color., Hardcover

ISBN: 978-81-322-2112-8

A product of Birkhäuser Basel
