

Contents

1	Why This Book Has Been Written: Purpose and Structure of the Book	1
1.1	The Book's Structure	4
	References	7
2	Controlling Complex Technical Systems: The Control Room Operator's Tasks in Process Industries	11
2.1	Setting the Scene	11
2.2	Defining the Term "Complex" in a Complex Technical System . . .	13
2.2.1	A Definition of a Complex Technical System	22
2.2.2	The Operator's Task in Handling Complex Technical Systems: Process Control	24
2.3	Clarifying the Term "Complex Tasks"	31
2.3.1	Complexity as "Multiple Components"	31
2.3.2	Complexity as Element Interactivity	33
2.3.3	A Definition of a Complex Task for This Book	34
2.4	Conditions for Knowledge and Skill Application: Routine, Non-routine/normal and Non-routine/abnormal Situations	35
	References	42
3	Required Knowledge and Skills to Control a Complex Technical System – Job Analysis Related to Training	49
3.1	Mental Models for Process Control	50
3.2	Knowledge and Skills for Routine Situations	55
3.2.1	Evaluation Possibilities	64
3.3	Knowledge and Skills for Non-routine/normal Situations	69
3.3.1	Evaluation Possibilities	75
3.4	Knowledge and Skills for Non-routine/abnormal Situations	79
3.4.1	Teamwork Skills for Collaborative Complex Problem Solving	83
3.4.2	Evaluation Possibilities	94

3.5	Final Remark	96
	References	96
4	Basic Learning Processes and Supportive Learning Mechanisms for Taskwork and Teamwork to Control Complex Systems	105
4.1	Components of the Learning Theory Perspective: Acquisition, Retention and Transfer	107
4.2	The Learning Objective: Becoming an Expert with “Lots of Experience”	109
4.3	Work Experience and Practice for Instance-Based Learning	111
4.4	Learning Mechanisms Which Support Instance-Based Learning for Novices	123
4.5	Instance-Based Learning for Learning Teamwork Skills	131
4.6	“Power Law of Forgetting” – Skill Decay due to Periods of Non-use	137
4.7	Learning Mechanism to Support Storage and Retrieval Strength	141
4.8	Transfer: Laws Relating to Similarity	143
	References	147
5	Training Design for Instance-Based Learning – The “Staged Process Control Readiness Training” (SPCRT)	155
5.1	Issues for Training Design Preparation	156
5.2	The First Stage of the Process Control Readiness Training – Making the Most of Practice – Training Design for Novices	164
5.2.1	Designing Practice to Support Skill Retention	173
5.3	The Second Stage of the Process Control Readiness Training	175
5.4	Final Remarks	186
	References	187
	Index	195

The Acquisition of Knowledge and Skills for Taskwork
and Teamwork to Control Complex Technical Systems
A Cognitive and Macroergonomics Perspective

Kluge, A.

2014, VIII, 196 p. 39 illus., Hardcover

ISBN: 978-94-007-5048-7
