

Contents

1	Introductory Background and Statement of the Problems	1
1.1	Introduction	1
1.2	Bangladesh: Agriculture, Flooding and Climate Change.	3
1.3	Climate Change and Flooding in Bangladesh	10
1.4	Agriculture and Food Security Vis-À-Vis Human Security in Bangladesh	11
1.5	Vulnerability and Adaptation to Climate Change.	13
1.6	Farmers' Crop Decisions	19
1.7	Bangladesh Government's Climate Change Strategy and Action Plan.	19
1.8	The Problems	20
1.8.1	Major Problems	21
1.9	Research Gaps	21
1.10	Research Questions	22
1.11	Proposed Research Objectives.	22
1.12	Structure of the Book.	23
	References	25
2	Research Methodology	35
2.1	Introduction	35
2.2	Research Design	36
2.3	Reasons for Choosing a Case Study Approach	39
2.4	Overview of Qualitative and Quantitative Paradigms: An Epistemological Debate.	41
2.4.1	Analytic Induction Versus Enumerative Induction.	42
2.4.2	Generalization Versus Extrapolation	43
2.4.3	Multi-method Research	43
2.4.4	Combining Approaches/Mixed Methods.	43
2.5	Sampling the Research Respondents	46
2.5.1	Sampling for Chinaduli Union	47
2.6	Structured Questionnaire Survey	47
2.6.1	Questionnaire Survey in the Study Area	48
2.6.2	Conducting a Questionnaire Survey in the Field	51

2.7	Participatory Rapid Appraisal	53
2.7.1	Rationale for Choosing Participatory Rapid Appraisal . . .	53
2.7.2	Advantages of PRA.	54
2.7.3	Disadvantages of PRA.	55
2.7.4	Summary: Spread and Characteristics of PRA	56
2.7.5	Differences Between RRA and PRA	57
2.8	Conducting PRA Sessions in the Case Study Area	60
2.9	Other Data/Information Collection Techniques	64
2.9.1	Literature Review	64
2.9.2	Group Discussion	64
2.9.3	Media/Newspaper Information	65
2.9.4	Discussion with Professional People: Some Observations and Findings	66
2.9.5	Secondary Data.	66
2.10	Recent Advancements in Vulnerability and Adaptation Assessment.	67
2.11	Ethical Issues	69
2.12	Data Analysis and Data Presentation	69
2.13	Research Limitation.	69
2.14	Summary	70
	References	70
3	Floods in Bangladesh: Nature, History, Research, Causes and Types	77
3.1	Introduction	77
3.2	Characteristics of Floods in Bangladesh.	78
3.3	Flood History and Research in Bangladesh.	79
3.3.1	Flood Action Plan.	83
3.3.2	National Water Policy	84
3.3.3	Flood Research in Bangladesh	85
3.4	Causes of Floods.	91
3.4.1	Unique Geographic Location of Bangladesh.	91
3.4.2	Flat Topography	92
3.4.3	High Cross Boundary Flow	92
3.4.4	Local Rainfall.	92
3.4.5	Human Intervention/Human Contribution to Drainage and Flood Problems	93
3.4.6	Siltation.	93
3.4.7	Unstable and Migratory Rivers.	93
3.4.8	Tidal Effect	94
3.4.9	Sea-Level Rise	94
3.4.10	Over: Land Storage.	94
3.4.11	Causes of 1988 and 1998 Floods	94

3.5	Flood Types in Bangladesh.	95
3.5.1	Flash Flood	95
3.5.2	River Flood	95
3.5.3	Storm Surges	96
3.6	Summary	96
	References	97
4	Household Information in the Case Study Area	101
4.1	Introduction	102
4.2	Demographic Characteristics of Households	102
4.3	Economic Activities.	103
4.4	Household Income.	104
4.4.1	Primary Income	104
4.4.2	Secondary Income.	105
4.4.3	Tertiary Income	106
4.5	Land Ownership Pattern.	106
4.6	Types of Agricultural Lands and Exposure to Normal Flooding	107
4.7	Respondents' House: Number, Types and Nature of Damage to Extreme Flooding	108
4.7.1	House Damage Related Loss	109
4.8	Household Livestock Loss due to Extreme Flooding	109
4.9	Occupational Loss at <i>Kharif 2</i> due to Extreme Flooding in 1988, 1995, 1998 and 2005.	112
4.9.1	Primary Occupational Loss	112
4.9.2	Secondary Occupational Loss.	114
4.9.3	Total Occupational Loss	115
4.10	Summary	116
	References	116
5	Crop Adjustment Processes to Extreme Floods	117
5.1	Introduction	117
5.2	Normal Crop-Flood Adjustments in Islampur	118
5.3	Crop Pattern and Crop Decisions in Islampur	120
5.3.1	Crop Flood Adjustments in the 1988 Flood	121
5.3.2	Crop Flood Adjustments in the 1995 Flood	122
5.3.3	Crop Flood Adjustments in the 1998 Flood	123
5.4	Summary	127
	References	128
6	Community-Based Vulnerability and Adaptation Assessment: Informing the Future by Understanding the Past	129
6.1	Introduction	129
6.2	Vulnerability and Adaptation Guidelines	131

6.2.1	Seven Steps of Climate Impact Assessment	131
6.2.2	Adopted Vulnerability and Adaptation Steps	132
6.3	The PRA Sessions	133
6.4	Assessment of Vulnerability	134
6.4.1	Discussion of the Issues.	134
6.5	Assessment of Adaptation.	139
6.5.1	Definition of Adaptation	139
6.5.2	Adaptation: Definition and Characteristics in the Context of the Case Study Area	140
6.5.3	Adaptation Measures	141
6.5.4	Types of Adaptation	142
6.5.5	Adaptation Assessment by Weighted Index	143
6.6	Summary	151
	References	152
7	Failure Effects of Autonomous Adaptation	155
7.1	Introduction	155
7.2	Autonomous Crop Adaptations in Response to Flooding	156
7.2.1	Hydrological Nature of Flooding and the Related Adjustments in Islampur	159
7.3	Land Distribution Pattern	161
7.3.1	Distribution Pattern of Household Current Owned Lands in 2006, 1998, 1995 and 1988.	161
7.4	The Failure Effects of Autonomous Crop Adaptation.	164
7.4.1	Seedling Cost	164
7.4.2	Fertilizer Cost.	166
7.4.3	Pesticides Costs	167
7.4.4	Land Preparation Cost	168
7.4.5	Total Labouring Cost.	170
7.4.6	Watering Cost	170
7.5	Failure Effect of Autonomous Crop Adaptation.	171
7.6	Household and Plant Damage in Chinaduli Union.	175
7.7	Consequences of the Failure Effects of Autonomous Adjustments.	175
7.8	Summary	178
	References	179
8	Conclusion and Recommendations	185
8.1	Introduction	185
8.2	Summary of Major Findings.	186
8.3	Rationale for Recommendations	189
8.4	Policy Implications and Recommendations	189
8.4.1	Prioritization of Vulnerability and Adaptation Issues.	192
8.4.2	The Failure Effects of Autonomous Crop Adaptation	193

Contents	xix
8.5 Conceptual Contribution of This Research	194
8.6 Recommendations for Future Research.	197
References	197
Appendix I	199
Appendix II	213
Glossary	215

Vulnerability and Adaptation to Climate Change in
Bangladesh

Processes, Assessment and Effects

Younus, M.A.F.

2014, XXIII, 216 p. 60 illus., 54 illus. in color., Hardcover

ISBN: 978-94-007-5493-5
