Part I Physiology

1	Introduction to Marine Pollution	3
1.1	Sources and Fate in the Environment	4
1.1.1	Metals	4
1.1.2	Organics	7
1.1.3	Contaminants of Emerging Concern (CECs)	14
1.1.4	Nutrients and Sewage	17
1.1.5	Carbon Dioxide, Climate Change and Ocean Acidification	20
1.1.6	Litter, Marine Debris	21
1.2	Measuring Effects on Biota	23
1.2.1	Hormesis	24
1.2.2	Mechanistic Approaches	24
1.2.3	Linked Responses – Metals	25
1.2.4	Field Studies	26
1.2.5	Oil	27
1.2.6	CECs	27
1.2.7	Nutrients	28
1.2.8	Climate Change	29
1.2.9	Marine Debris/Litter	32
1.2.10	Survival in Contaminated Environments	32
	References	33
2	Feeding and Digestion	37
2.1	Feeding	37
2.1.1	Crustaceans	37
2.1.2	Mollusks	42
2.1.3	Fishes	46
2.1.4	Other Taxa	49

2.2	Digestion and Assimilation	53
2.2.1	Crustaceans	54
2.2.2	Mollusks	56
2.2.3	Fishes	56
2.2.4	Other Taxa	57
2.3	Conclusions	59
	References	59
3	Respiration and Metabolism	65
3.1	Crustaceans	65
3.1.1	Metals	65
3.1.2	Organics	67
3.1.3	Hypoxia	70
3.1.4	Climate Change/Ocean Acidification	71
3.2	Mollusks	72
3.2.1	Metals	72
3.2.2	Organics	76
3.2.3	Contaminants of Emerging Concern	77
3.2.4	Hypoxia	77
3.2.5	Climate Change/Ocean Acidification	79
3.2.6	Polluted Environment	81
3.3	Fishes	82
3.3.1	Metals	82
3.3.2	Organics – Oil	82
3.3.3	Hypoxia	83
3.3.4	Contaminants of Emerging Concern	85
3.3.5	Polluted Environments	85
3.4	Other Taxa	86
3.4.1	Metals	86
3.4.2	Ocean Acidification	87
3.4.3	Hypoxia	88
3.4.4	Polluted Environments	89
3.5	Conclusions	89
	References	89
4	Osmoregulation and Excretion	97
4.1	Osmoregulation	97
4.1.1	Crustaceans	98
4.1.2	Mollusks	105
4.1.3	Fishes	105
4.1.4	Other Taxa	111
4.2	Excretion	111
4.2.1	Crustacea	112
4.2.2	Mollusks	115
4.2.3	Fishes	117
4.2.4	Other Taxa	119

4.3	Conclusions	120
	References	120

Part II Reproduction and Development

5	Reproduction	129
5.1	Endocrine Effects	129
5.1.1	Crustaceans	130
5.1.2	Mollusks	132
5.1.3	Fishes	133
5.1.4	Other Taxa	140
5.2	Gametogenesis and Fecundity	141
5.2.1	Crustaceans	142
5.2.2	Mollusks	145
5.2.3	Fishes	147
5.2.4	Other Taxa	152
5.3	Mating and Fertilization	153
5.3.1	Crustaceans	153
5.3.2	Mollusks	154
5.3.3	Fishes	154
5.3.4	Other Taxa	156
5.4	Conclusions	159
	References	160
6	Embryonic Development	169
6.1	Crustaceans	169
6.1.1	Metals	170
6.1.2	Organics	171
6.1.3	Acidification	174
6.1.4	Hypoxia	175
6.1.5	Polluted Environment	175
6.2	Fishes	176
6.2.1	Metals	176
6.2.2	Organics	179
6.2.3	CECs	190
6.2.4	Hypoxia	191
6.2.5	Climate/Ocean Acidification	191
6.2.6	Polluted Sites	192
6.3	Mollusks	193
6.3.1	Metals	193
6.3.2	Organics	194
6.3.3	Contaminants of Emerging Concern	195
6.3.4	Hypoxia	195
6.3.5	Climate and Ocean Acidification	197

6.4	Other Taxa	199
6.4.1	Echinoderms	199
6.4.2	Corals	204
6.4.3	Sea Turtles	204
6.4.4	Rotifers	205
6.4.5	Tunicates	205
6.5	Discussion and Conclusions	205
	References	206
7	Larval Development	215
7.1	Crustaceans	216
7.1.1	Metals	216
7.1.2	Organics	217
7.1.3	Contaminants of Emerging Concern	220
7.1.4	Hypoxia	221
7.1.5	Ocean Acidification/Climate Change	221
7.1.6	Polluted Environment	222
7.2	Mollusks	223
7.2.1	Metals	223
7.2.2	Organics	224
7.2.3	Contaminants of Emerging Concern	225
7.2.4	Hypoxia	226
7.2.5	Ocean Acidification/CO ₂	227
7.2.6	Polluted Environments	231
7.3	Fishes	232
7.3.1	Metals	232
7.3.2	Organics	233
7.3.3	Hypoxia	237
7.3.4	Ocean Acidification	237
7.3.5	Polluted Environments	238
7.4	Other Taxa	239
7.4.1	Metals	239
7.4.2	Organics	240
7.4.3	Hypoxia	243
7.4.4	Climate Change/Ocean Acidification	243
7.5	Conclusions/Discussion	245
	References	246
8	Developmental Processes Later in Life	253
8.1	Growth	253
8.1.1	Fishes	253
8.1.2	Mollusks	258
8.1.3	Crustaceans	259
8.1.4	Other Taxa	260
8.2	Regeneration and Molting	261
8.2.1	Crustaceans	261

8.2.2	Fishes.....	266
8.2.3	Other Taxa	267
8.3	Shell/Bone Formation.....	267
8.3.1	Crustacea	268
8.3.2	Mollusks	269
8.3.3	Fishes.....	273
8.3.4	Other Taxa	274
8.4	Carcinogenesis	280
8.4.1	Mollusks	280
8.4.2	Fishes.....	281
8.5	Smoltification.....	285
8.5.1	Metals	285
8.5.2	Pesticides and PCBs	286
8.5.3	Contaminants of Emerging Concern (CECs).....	287
8.5.4	Acidification	288
8.6	Conclusions.....	288
	References.....	289

Part III Behavior

9	Behavior	301
9.1	General Activity.....	301
9.1.1	Crustaceans	302
9.1.2	Mollusks	305
9.1.3	Fishes.....	306
9.1.4	Other Taxa	310
9.2	Burrowing Behavior.....	310
9.2.1	Crustaceans	311
9.2.2	Mollusks	312
9.2.3	Other Taxa	313
9.3	Feeding and Predator Avoidance	315
9.3.1	Crustaceans	315
9.3.2	Mollusks	318
9.3.3	Fishes.....	319
9.3.4	Other Taxa	324
9.4	Reproductive Behavior.....	325
9.4.1	Crustaceans	325
9.4.2	Mollusks	327
9.4.3	Fishes.....	327
9.5	Aggression.....	329
9.5.1	Crustaceans	329
9.5.2	Fishes.....	330
9.6	Social Behavior.....	331
9.6.1	Fishes.....	331
9.6.2	Other Taxa	332

9.7	Migration and Homing/Habitat Evaluation	333
9.7.1	Crustaceans	333
9.7.2	Fishes	334
9.7.3	Other Taxa	336
9.8	Neurotoxicology Underlying Behavior	337
9.8.1	Crustaceans	337
9.8.2	Fishes	338
9.8.3	Other Taxa	341
9.9	Discussion and Conclusions	341
	References	342

Part IV Dealing with Pollutants

10	Bioaccumulation/Storage/Detoxification	355
10.1	Metals	356
10.1.1	Bioaccumulation	356
10.1.2	Subcellular Disposition/Detoxification	365
10.2	Organic Contaminants	372
10.2.1	Accumulation of Halogenated Organics	372
10.2.2	Metabolism	380
10.3	Conclusions	386
	References	387
11	Tolerance	393
11.1	Metals	394
11.1.1	Fishes	394
11.1.2	Crustaceans	396
11.1.3	Mollusks	398
11.1.4	Other Taxa	399
11.2	Organics	401
11.2.1	Fishes	401
11.2.2	Crustaceans	408
11.2.3	Mollusks	409
11.2.4	Other Taxa	410
11.3	Hypoxia	410
11.3.1	Fishes	411
11.3.2	Crustaceans	413
11.3.3	Mollusks	414
11.3.4	Other Taxa	415
11.4	Climate Change/Ocean Acidification	416
11.4.1	Fishes	417
11.4.2	Crustaceans	418
11.4.3	Mollusks	418
11.4.4	Other Taxa	419

11.5 Costs of Tolerance..... 421

 11.5.1 Energy Costs..... 421

 11.5.2 Food web Costs..... 422

11.6 Discussion and Conclusions 425

References..... 426

Index..... 435

Physiological, Developmental and Behavioral Effects of
Marine Pollution
