<b>1</b>	<b>MRI Perfusion-Weighted Imaging Analysis</b>	<b>1</b>
1.1	Perfusion Imaging	2
1.1.1	Indicator–Dilution Theory for DSC-MRI	3
1.1.2	MTT and CBV Calculation	6
1.1.3	DSC-MRI Time Series Analysis	8
1.2	Gamma-Variate Fitting	11
1.2.1	Linear Regression Method for Gamma-Variate Fitting	11
1.2.2	Nonlinear Regression Method for Gamma-Variate Fitting	13
1.2.3	Baseline Elimination for Gamma-Variate Fitting	16
1.2.4	Linear Method and Nonlinear Method for Gamma-Variate Fitting	18
1.3	AIF Selection	19
1.3.1	Robust Method for AIF Determination	20
1.3.2	Deconvolution Calculation and Residual Function Estimation	22
1.3.3	SVD Method for Deconvolution	24
1.3.4	L2 Norm Regularization for PWI Study	25
1.3.5	Piecewise Linear Method for Ridge Regression Parameter Estimation	26
1.3.6	CBF, MTT, CBV, Arrival Time, and T-max Maps	29
1.4	Dispersion Effects in DSC-MRI	32
1.4.1	Local Density Random Walk for Concentration Time Course	32
1.4.2	Convolution Method to Study Disperse Effect	33
1.5	Summary of the PWI Algorithm	33
	References	35
<b>2</b>	<b>First-Level fMRI Data Analysis for Activation Detection</b>	<b>39</b>
2.1	fMRI Experimental Design	40
2.1.1	Block Design	41
2.1.2	Random ER Design	42
2.1.3	Phase-Encoded Design	44

2.2	fMRI Data Preprocessing .....	46
2.2.1	fMRI Data Motion Correction .....	47
2.2.2	fMRI Time Series Normalization .....	48
2.3	Activation Detection: Model-Free and Model-Based Methods .....	49
2.3.1	Model-Free Method: Two Sample $t$ -test for Activation Detection .....	50
2.3.2	Correlation Analysis Method .....	51
2.4	Models for Hemodynamic Response Function and Drift .....	51
2.4.1	HRF Models for Activation Detection .....	52
2.4.2	Drift Models for Activation Detection .....	54
2.5	General Linear Model (GLM) for Activation Detection .....	55
2.5.1	Generalized Linear Model (GLM) for Activation Detection .....	55
2.5.2	Ordinary Least Square for Parameter Estimation in GLM ....	56
2.5.3	FOS to Solve the Inverse Problem .....	57
2.5.4	Weighted Least Squares Estimation .....	59
2.5.5	AR(1) Model .....	60
2.5.6	AR( $q$ ) Model .....	61
2.6	Hypothesis Test and Threshold Correction .....	62
2.6.1	Hypothesis Testing for the Activation Detection .....	62
2.6.2	Bonferroni and FDR/FWE Threshold Correction .....	65
2.6.3	Number of Independent Tests .....	67
2.6.4	Permutation/Random Test .....	68
2.7	Summary of Algorithm for First-Level fMRI Data Analysis .....	68
	References .....	70
<b>3</b>	<b>Second-Level fMRI Data Analysis Using Mixed Model .....</b>	<b>73</b>
3.1	Mixed Model for fMRI Data Analysis .....	74
3.1.1	Fixed and Random Effects in fMRI Analysis .....	75
3.1.2	Generalized Linear Mixed Model for fMRI Study .....	75
3.1.3	Mixed Model and Its Numerical Estimations .....	76
3.2	Numerical Analysis for Mixed-Effect Models .....	77
3.2.1	Two-Stage Model for the Second-Level fMRI Analysis .....	78
3.2.2	Maximum-Likelihood Method for Variance Estimation .....	79
3.2.3	Different Runs Combination .....	79
3.2.4	Group Comparison in the Mixed Model .....	81
3.3	Iterative Trust Region Method for ML Estimation .....	84
3.3.1	Levenberg–Marquardt (LM) Algorithm .....	84
3.3.2	LM Algorithm Implementation .....	85
3.3.3	T and Likelihood (LR) Tests for the Mixed Model .....	86
3.3.4	Modified EM Algorithm for Group Average .....	87
3.3.5	One Simulation Example for the Numerical Processing .....	87
3.3.6	Simulation to Combine 2 Runs .....	91
3.3.7	Combination of 100 Runs .....	92

3.4	Expectation Trust Region Algorithm for Second-Level fMRI Data Analysis .....	94
3.4.1	Average Runs Within Subject .....	94
3.4.2	Comparing fMRI Response Within Subject .....	96
3.4.3	Compare Group of Subjects .....	97
3.4.4	Numerical Implementation Details .....	99
3.4.5	Further Numerical Improvement: BFGS Method .....	101
3.4.6	Potential Applications and Further Development .....	102
3.5	Degree of Freedom (DF) Estimation .....	102
3.5.1	Estimation of DF for $T$ Distribution .....	103
3.5.2	ML Estimation of Mixture of $t$ Distributions for Mixed Model .....	104
3.5.3	Hessian Matrix Calculation for Trust Region Algorithm ....	105
3.5.4	Trust Region and Expectation Trust Region Algorithms for df Estimation .....	107
3.6	Future Directions for fMRI Data Analysis .....	108
3.7	Second-Level fMRI Data Processing Algorithm Summary .....	109
