

Contents

1	Principle of Digestive Endoscopic Tunnel Technique	1
1.1	Principle of Digestive Endoscopic Tunnel Technique	1
1.2	Significance of Digestive Endoscopic Tunnel Technique	2
1.3	Disease-Centered Principles of Endoscopic Treatment	2
	References	3
2	Indications of Tunnel Technique	5
2.1	Indications	5
2.2	Relative Indications	5
2.3	Relative Contraindications	6
2.4	Absolute Contraindications	7
3	Endoscopic Ling Classification	
	of Esophageal Lumen	9
3.1	Ling Classification	10
3.2	Generalized Ling Classification	10
3.3	Significance of Ling Classification	10
	References	13
4	Techniques in Tunnel Establishment	15
4.1	Patient Positions	15
4.2	Location and Orientation of Tunnel Establishment	16
4.3	Incision and Sealing of the Entry of the Tunnel	19
	4.3.1 Longitudinal Incision	19
	4.3.2 Transverse Incision	20
	4.3.3 Arc Incision	22
4.4	Healing Process of the Entry Incision	23
4.5	Prevention of Infection	26
	4.5.1 Causes of Postoperative Infection	26
	4.5.2 Measures for Preventing Infection	26
	4.5.3 Administration of Prophylactic Antibiotics	27
	References	27

5	Process of Tunnel Establishment and Anatomic Marks Within the Tunnel	29
5.1	Process of Tunnel Establishment	29
5.1.1	Preoperative Preparation	29
5.1.2	Equipments	29
5.1.3	Procedure of Tunnel Technique	30
5.2	Anatomic Marks Within the Tunnel	31
5.2.1	Esophagus	32
5.2.2	Cardia	33
	References	36
6	Tunnel Technique for Digestive Mucosal Lesions	37
6.1	ESTD in Superficial Esophageal Neoplasms	40
6.1.1	Definition	40
6.1.2	Indications	40
6.1.3	Contraindications	40
6.1.4	Preoperative Preparation	41
6.1.5	Esophageal ESTD Procedures	41
6.1.6	Postoperative Treatment	45
6.1.7	Attentions	45
6.2	ESTD in Superficial Gastric Neoplasms	45
6.2.1	Definition	45
6.2.2	Indications	45
6.2.3	Contraindications	46
6.2.4	Preoperative Preparation	46
6.2.5	Patient Preparation	46
6.2.6	Preoperative Evaluation of the Lesion	46
6.2.7	Gastric ESTD Procedures	47
6.2.8	Postoperative Treatment	47
6.2.9	Attentions	47
6.3	ESTD in Superficial Colonic Neoplasms	47
	References	53
7	Tunnel Technique for Esophageal Achalasia	55
7.1	History, Indications and Procedure of POEM	55
7.1.1	History of POEM	55
7.1.2	Indications of POEM	57
7.1.3	Procedure of POEM	57
7.2	New Conceptions of Myotomy of Muscularis Propria	74
7.3	Effects of Ling Classification on POEM	76
7.3.1	Ling Classification in Patients with Esophageal Achalasia	76
7.3.2	Effects of Ling Classification on Complications of POEM	78
	References	81

8 Tunnel Technique for SMTs Originating from Muscularis Propria	83
8.1 Tunnel Technique for Esophageal SMTs Originating from Muscularis Propria.	83
8.1.1 Esophageal SMTs Originating from Muscularis Propria	83
8.1.2 Tunnel Technique for Resection of Esophageal SMTs from Muscularis Propria	85
8.1.3 Significance of Tunnel Technique for Esophageal SMTs from Muscularis Propria	88
8.2 Tunnel Technique for Cardiac SMTs Originating from Muscularis Propria.	89
8.2.1 Cardiac SMTs Originating from Muscularis Propria	89
8.2.2 Tunnel Technique for Resection of Cardiac SMTs from Muscularis Propria	90
8.3 Tunnel Technique for Gastric SMTs Originating from Muscularis Propria.	90
8.3.1 Gastric SMTs Originating from Muscularis Propria	90
8.3.2 Tunnel Technique for Resection of Gastric SMTs from Muscularis Propria	93
8.3.3 Significance of Tunnel Technique for Gastric SMTs from Muscularis Propria	95
