<b>Generalized Elimination Inferences, Higher-Level Rules, and the Implications-as-Rules Interpretation of the Sequent Calculus . . . . .</b>	<b>1</b>
Peter Schroeder-Heister	
<b>Revisiting Zucker’s Work on the Correspondence Between Cut-Elimination and Normalisation . . . . .</b>	<b>31</b>
Christian Urban	
<b>Proofs, Reasoning and the Metamorphosis of Logic . . . . .</b>	<b>51</b>
Jean-Baptiste Joinet	
<b>Natural Deduction for Equality: The Missing Entity. . . . .</b>	<b>63</b>
Ruy J. G. B. de Queiroz and Anjolina G. de Oliveira	
<b>Paul Hertz’s Systems of Propositions As a Proof-Theoretical Conception of Logic . . . . .</b>	<b>93</b>
Javier Legris	
<b>On the Structure of Natural Deduction Derivations for “Generally”. . . . .</b>	<b>103</b>
Leonardo B. Vana, Paulo A. S. Veloso and Sheila R. M. Veloso	
<b>Type Theories from Barendregt’s Cube for Theorem Provers. . . . .</b>	<b>129</b>
Jonathan P. Seldin	
<b>What is Propositional Logic a Theory of, if Anything? . . . . .</b>	<b>145</b>
Oswaldo Chateaubriand	
<b>Categorical Semantics of Linear Logic for All . . . . .</b>	<b>181</b>
Valeria de Paiva	

<b>Assertions, Hypotheses, Conjectures, Expectations: Rough-Sets Semantics and Proof Theory . . . . .</b>	<b>193</b>
Gianluigi Bellin	
<b>Decomposition of Reduction. . . . .</b>	<b>243</b>
Ernst Zimmermann	
<b>An Approach to General Proof Theory and a Conjecture of a Kind of Completeness of Intuitionistic Logic Revisited. . . . .</b>	<b>269</b>
Dag Prawitz	

Advances in Natural Deduction

A Celebration of Dag Prawitz's Work

Pereira, L.C.; haeusler, e.; de Paiva, V. (Eds.)

2014, XVI, 279 p. 24 illus., Hardcover

ISBN: 978-94-007-7547-3
