Mathematical Notations

1	Introduction	1
1.1	The Ocean Near-Surface Layer in the Ocean–Atmosphere System	1
1.2	Basic Equations of Fluid Mechanics and Useful Approximations	4
1.2.1	Mathematical Notation and Governing Equations	4
1.2.2	Boundary-Layer Approximation	6
1.2.3	Low Rossby Number Approximation	8
1.2.4	Turbulence and Turbulent Kinetic Energy Budget	8
1.3	Boundary Conditions	10
1.3.1	Types of Surface Boundary Conditions	11
1.3.2	Bulk-Flux Formulation	13
1.4	Radiative Forcing	19
1.4.1	Definitions	19
1.4.2	Solar Constant and Insolation	20
1.4.3	Insolation Under Clear Skies	22
1.4.4	Insolation Under Cloudy Skies	23
1.4.5	Albedo of the Sea Surface	25
1.4.6	Attenuation of Solar Radiation in the Ocean	28
1.4.7	Longwave Radiation	32
1.5	Rain Forcing	32
1.5.1	Dynamics of Raindrops at the Air–Sea Interface	32
1.5.2	Partition Between Surface and Submerged Fractions of Freshwater Due to Rain	34
1.5.3	Volume Source of Freshwater Due to Rain	35
1.5.4	Rain-Induced Heat Flux	37
1.5.5	Surface Stress Due to Rain	38
1.6	Surface Waves	39
1.6.1	Potential Approximation	39
1.6.2	Linear Waves	42
1.6.3	Nonlinear Waves	43

1.6.4	Wave Breaking	44
1.6.5	Statistical Description of Surface Waves	46
1.6.6	Wave form Stress and Kinetic Energy Flux to Waves from Wind.....	49
1.7	Planetary Boundary Layers	51
1.7.1	Ekman Boundary Layer.....	52
1.7.2	Monin–Oboukhov Similarity Theory	56
1.7.3	Surface Mixed Layer	58
1.7.4	Barrier Layer and Compensated Layer	60
1.7.5	Modeling Mixing in the Upper Ocean	60
	References	63
2	Sea Surface Microlayer	71
2.1	Introduction	71
2.2	Phenomenology	74
2.2.1	Viscous Sublayer	74
2.2.2	Thermal Sublayer	75
2.2.3	Diffusion Sublayer	77
2.2.4	Sea Surface Microlayer Ecosystem	77
2.2.5	Surfactants and Surface Films	78
2.3	Physics of Aqueous Molecular Sublayers	81
2.3.1	Convective and Shear Instability	82
2.3.2	Microscale Wave Breaking	86
2.3.3	Wave Breaking and Whitecapping	87
2.3.4	Capillary Wave Effects	88
2.3.5	Chemical and Photochemical Reactions in the Sea Surface Microlayer	90
2.3.6	Natural and Anthropogenic Influences	90
2.3.7	Effects of Surface Films	91
2.4	Parameterization of Molecular Sublayers During Nighttime Conditions	98
2.4.1	Dimensional Analysis	98
2.4.2	Renewal Model	101
2.4.3	Boundary-Layer Model	112
2.5	Effect of Penetrating Solar Radiation	116
2.5.1	Model Equations	116
2.5.2	Renewal Time	120
2.5.3	Convective Instability of the Cool Skin During Daytime	120
2.5.4	Model Calculations	121
2.5.5	Comparison with Daytime and Nighttime Cool-Skin Field Data	123
2.6	Cool and Freshwater Skin of the Ocean during Rainfall	127
2.6.1	Effects of Rain on the Cool Skin	129
2.6.2	Freshwater Skin of the Ocean	131

2.6.3	Surface Renewals Due to Rain Mixing	133
2.6.4	Buoyancy Effects in Molecular Sublayer Due to Rain	136
2.6.5	Rain Effects on Sea Surface Roughness	137
2.6.6	Flux of Kinetic Energy Carried by Rain	140
2.6.7	Combined Effect	141
2.6.8	Comparison with Data	143
2.6.9	Discussion	145
	References	146
3	Near-Surface Turbulence	153
3.1	Introduction	153
3.2	Free-Surface Turbulent Boundary Layer	154
3.2.1	Wave-Following Coordinate System	154
3.2.2	Wall-Layer Analogy	155
3.2.3	Deviations from the Wall-Layer Analogy in a Free-Surface Layer	157
3.2.4	Structure of the Upper Ocean Turbulent Boundary Layer Below Breaking Surface Waves	159
3.3	Observation of Near-Surface Turbulence	161
3.3.1	Observational Challenges	161
3.3.2	Wave-Following Versus Fixed Coordinate System	162
3.3.3	Disturbances from Surface Waves	162
3.3.4	Dynamics of a Free-Rising Instrument in the Near- Surface Layer of the Ocean	164
3.3.5	A Near-Surface Turbulence and Microstructure Sensor System	167
3.4	Wave-Enhanced Turbulence	180
3.4.1	Dimensional analysis	180
3.4.2	Craig and Banner (1994) Model of Wave-Enhanced Turbulence	182
3.4.3	Benilov and Ly (2002) Wave-Turbulent Model	193
3.4.4	Concluding Remarks on Wave-Enhanced Turbulence	200
3.5	Effects of Thermohaline Stratification	202
3.5.1	Formulation of the Monin–Oboukhov Theory for the Upper Ocean	203
3.5.2	Asymptotic regimes	205
3.5.3	Boundary-Layer Scaling of the Velocity and Dissipation Rate Profiles	208
3.6	Parameterization of Turbulent Mixing	210
3.6.1	Parameterization of Wave-Enhanced Mixing Coefficient	210
3.6.2	Richardson-Number Type Mixing Parameterization	212
3.6.3	Rotation Effects	218
3.6.4	Boundary-Layer Horizontal Pressure Gradients	218
	References	219

4	Fine Structure and Microstructure	225
4.1	Introduction	225
4.2	Near-Surface Thermohaline Structures	226
4.2.1	Diurnal Mixed Layer and Diurnal Thermocline	226
4.2.2	Examples of Near-Surface Structures Associated with Diurnal Cycle	228
4.2.3	Wave-Like Disturbances in the Diurnal Thermocline	230
4.2.4	Rain-Formed Mixed Layer and Halocline	232
4.2.5	Low-Salinity Patches Due to Convective Rains	233
4.2.6	Combined Effect of Diurnal and Freshwater Cycles on the Upper Ocean Structure	235
4.3	Surface-Intensified Jets	241
4.3.1	Slippery Near-Surface Layer of the Ocean Arising Due to Diurnal Warming	241
4.3.2	Self-Regulating State of the Diurnal Thermocline	243
4.3.3	Upper Velocity Limit for the Diurnal Jet	249
4.3.4	Upper Velocity Limit for the Rain-Formed Jet	250
4.4	Evolution of the Diurnal Mixed Layer and Diurnal Thermocline Under Low Wind Speed Conditions	250
4.5	Large Diurnal Warming Events	259
4.5.1	In Situ Data	259
4.5.2	Global Distribution of Large Diurnal Warming Events	261
4.5.3	Physics of Large Diurnal Warming Events	264
4.6	Modeling Large Diurnal Warming Events	266
4.6.1	Radiative–Convective Mixed Layer	266
4.6.2	Transition from Radiative–Convective to Wind Mixing Regime	272
4.6.3	A Rapid Increase in the SST When the Air is Warmer Than the Water and Low Wind Speed Conditions Persist	275
4.6.4	Parameterizations for the Diurnal SST Range	275
4.6.5	One-Dimensional Numerical Simulation of Diurnal Cycle ...	277
4.6.6	Three-Dimensional Numerical Simulation of Diurnal Cycle ...	280
4.7	Fine Structure of the Near-Surface Layer in the Polar Seas	282
	References	286
5	Spatially-Varying and Coherent Structures	291
5.1	Introduction	291
5.2	Self-Organization in Two-Dimensional Turbulence	293
5.3	Horizontal Mixing as a Nonlinear Diffusion Process	300
5.3.1	Horizontal Wave Number Statistics	301
5.3.2	Nonlinear Advection–Diffusion Model	302
5.3.3	Buoyancy Flux Through the Bottom of the Mixed Layer	303
5.3.4	Atmospheric Buoyancy Forcing	306
5.3.5	Equilibrium Subrange	307
5.3.6	Numerical Diagnostics of Nonlinear Diffusion Equation	309

5.3.7	Relationship Between Vertical and Horizontal Mixing and Atmospheric Forcing Conditions.....	312
5.3.8	Implications for Horizontal Mixing Parameterization	313
5.4	Sharp Frontal Interfaces	316
5.4.1	Observations of Sharp Frontal Interfaces in the Western Pacific Warm Pool	317
5.4.2	Statistics of Sharp Frontal Interfaces in the Western Pacific Warm Pool	329
5.4.3	Internal Wave–Shear Flow Interaction as a Cause of Repeating Frontal Interfaces	333
5.4.4	Interaction of Sharp Fronts with Wind Stress	336
5.4.5	Parameterization for Cross-Frontal Exchange	346
5.4.6	Implications for the T–S Relationship in the Mixed Layer...	347
5.4.7	Observations of Sharp Frontal Interfaces in Mid-Latitudes and High Latitudes	347
5.5	Internal Waves in the Near-Surface Pycnocline.....	348
5.5.1	Large-Amplitude Internal Waves	348
5.5.2	Surface–Internal Wave Resonant Interactions.....	351
5.5.3	Kelvin–Helmholtz Instability of a Sheared Stratified Flow ...	353
5.6	Ramp-Like Structures	355
5.6.1	Phenomenology of Ramp-like Coherent Structures.....	355
5.6.2	Observation of Ramp-like Coherent Structures with Bow-Mounted Sensors	357
5.6.3	Skewness of temperature derivative.....	360
5.6.4	Vertical Profiles	362
5.6.5	Townsend’s Hypothesis and Ramp-Like Structures.....	364
5.6.6	Vorticity Waves in Shear Flows.....	366
5.7	Langmuir Circulations	369
5.7.1	Phenomenology.....	369
5.7.2	Concepts and Theories	372
5.7.3	Numerical Models of Langmuir Circulations	378
5.7.4	An Alternative Mechanism of Langmuir Circulation.....	380
5.8	Convection	381
5.8.1	Phenomenology.....	382
5.8.2	Penetrative Convection.....	384
5.8.3	Diurnal and Seasonal Cycle of Convection.....	386
5.9	Conclusions.....	388
	References	388
6	High Wind Speed Regime.....	397
6.1	Introduction.....	397
6.2	Air Bubbles in the Near-Surface Turbulent Boundary Layer.....	398
6.2.1	Active and Passive Phases in Bubble Life.....	398
6.2.2	Bubble Rise Velocity.....	398
6.2.3	Bubble Size Distribution Function.....	402

6.2.4	Bubble Dispersion and Diffusion	406
6.2.5	Buoyancy Effects in Bubble Plumes	409
6.3	Sea Spray Aerosol Production.....	411
6.3.1	Introduction	411
6.3.2	Mechanisms of Sea Spray Production.....	412
6.3.3	Sea Spray Source Function.....	414
6.3.4	Primary Aerosol Number Distributions.....	417
6.3.5	Parameterization of Sea Spray Aerosol Production Flux	418
6.4	Air-sea Exchange During High Wind Speeds	420
6.4.1	Effect of Spray on Air-Sea Exchanges	420
6.4.2	Dynamics of Suspension Flow	425
6.4.3	The Air-Sea Interface Under Hurricane Conditions	430
6.4.4	Direct disruption of the air-sea interface	431
6.4.5	The Air-Sea Momentum Exchange in Very Strong Winds ...	436
6.4.6	Problem of Parameterization of the Air-Sea Drag Coefficient in Hurricane Conditions	440
