

Contents

1	Introduction	1
2	General Characteristics of Concretes and Reinforced Concretes	11
2.1	Concrete Microstructure and Its Effect on Strength and Deformation Behavior	12
2.2	Concrete Strength and Stress-strain Behavior	14
2.3	Compressive Strength of Concretes	16
2.4	Concrete Grades and Types: Concrete Classification	18
2.5	Fracture Toughness Characteristics of Concretes	21
2.6	Compressive and Tensile Strength of Concrete Prisms	24
2.7	Classification and Mechanical Properties of Concrete Reinforcement	28
	References	34
3	Predominant Damages and Injuries in Reinforced Concrete Structures Arising During Use	35
3.1	Specification of the Effect of Environmental Factors on the Strength of Concrete	35
3.2	Mechanical Loading Effect on Concrete Damage and Fracture	36
3.3	Concrete Corrosive Softening and Injury	40
3.4	Gas Effect on Injury of Concretes	53
3.5	Biological Factors of Concrete Injury	55
3.6	Damaging the Concrete Reinforcement	56
3.7	Combined Effect of Mechanical Loading and Corrosive Environments on Injury and Fracture of Concrete and Reinforced Concrete Structures	59
	References	64
4	Implementation of Injection Technologies for the Renewal and Restoration of Serviceability of Concrete or Reinforced Concrete Structures	67
4.1	Characterization of Injection Technologies	67
4.2	Preparation of Structure for Injection	69

4.3	Cement or Cement/Polymer Suspensions Feeding into Cracks and Damages	72
4.4	Polymer Composition Injection into Cracks and Damages	75
4.5	Applications of Polyurethane Injection Materials	77
4.6	Equipment for Strengthening and Restoration of Concrete Structures Using Polyurethane Injection Materials	79
4.7	Process and Equipment for Strengthening and Restoration of Sewage Collectors and Water Conduits Using Injection Methods	84
4.8	Mobile Diagnostic and Restoration Complex	88
	References	92
5	Injection Materials: Technological, Mechanical, and Service Characteristics	97
5.1	Characterization of Injection Materials	97
5.2	Cement-based Injection Materials	98
5.3	Polymer Injection Materials	99
5.4	Advantages of Polyurethane Compositions and Elastomers Over Other Polymer Injection Materials	103
5.5	Characteristics of Fluent Polyurethane Compositions and Solid Elastomers	108
5.6	Polyepoxy, Polyacrylic, and Silicon-organic Injection Materials ..	112
	References	113
6	Serviceability Estimations for Elements of Building Structures	115
6.1	Models of Deformable Bodies with Thin Inclusions	116
6.2	Material Fracture Criteria in Fracture Mechanics	118
6.3	Strength of a Body with a Filled Crack	124
6.4	Strength Estimation for a Plate with a Filled Crack Using δ_C -criterion	133
6.5	Strengthening of Damaged Materials at Partial Filling of Defect	138
6.6	Crack Wedging Effect During Injection	141
6.7	Three-Dimensional Problems of Strengthening a Body with a Crack	143
6.8	Injection Effect on the Strength of a Body Containing a System of Coplanar Cracks	154
6.9	Limit Equilibrium in a Plate with Two Filled Cracks	159
6.10	Tension of a Plate with a Surface Crack	165
6.11	Renewal of Load-Carrying Capability for a Disk with a Central Crack Under Compressive Loading Along the Crack	167
6.12	Limit Equilibrium of Bodies with Voids and Cracks in the Void Surface	174
	References	183

7	Methods and Devices for Technical Diagnostics of Long-term Concrete Structures	185
7.1	Mechanical Tools and Methods of Technical Diagnostics	186
7.2	Physical Methods and Devices for Technical Diagnostics of Long-term Concrete Structures	193
7.3	Electrochemical Tools and Methods of Chemical Diagnostics	202
	References	205
8	Implementation of Injection Technologies in the Renewal and Restoration of Serviceability of Concrete and Reinforced Concrete Structures	207
8.1	Injection Renewal of Damaged Concrete and Reinforced Concrete Structures of Hydraulic Constructions, Cooling Towers, and Atomic Power Plants	208
8.2	Injection Renewal of Non-hydraulic Constructions, Tunnels, Bridges, and Historical Relics	215
	References	227
	Appendix	229

Injection Technologies for the Repair of Damaged
Concrete Structures

Panasyuk, V.; Marukha, V.; Sylovanyuk, V.

2014, XI, 230 p. 193 illus., Hardcover

ISBN: 978-94-007-7907-5
