

Contents

1 Mesenchymal Stem Cells for Cardiac Repair: Preclinical Models of Disease	1
Manuel Mazo, Miriam Araña, Beatriz Pelacho and Felipe Prosper	
2 Resident Cardiac Progenitor Cells	21
Ayelet Itzhaki-Alfia and Jonathan Leor	
3 Endothelial Progenitor Cells Derived from Cord or Peripheral Blood and Their Potential for Regenerative Therapies.....	37
Renate Hofer-Warbinek, Caterina Sturtzel, Karl-Heinz Preisegger and Erhard Hofer	
4 Adipose-derived Stromal/Stem Cells and Their Differentiation Potential into the Endothelial Lineage.....	53
Patrick C. Baer and Werner Luttmann	
5 Cardiac Cell Replacement Therapy With Pluripotent Stem Cell Derived Cardiomyocytes	71
Benjamin Krausgrill, Marcel Halbach and Jürgen Hescheler	
6 Biomaterials for Cardiac Tissue Engineering and Regeneration	83
Emil Ruvinov and Smadar Cohen	
7 Cell Therapy of Acute Myocardial Infarction and Ischemic Cardiomyopathy: From Experimental Findings to Clinical Trials	113
Stefan P. Janssens	
8 Clinical Gene and Stem Cell Therapy in Patients with Acute and Chronic Myocardial Ischemia	143
Jens Kastrup, Annette Ekblond, Mandana Haack-Sørensen, Anders B. Mathiasen and Abbas A. Qayyum	
Index	169

Adult and Pluripotent Stem Cells
Potential for Regenerative Medicine of the
Cardiovascular System

Hescheler, J.; Hofer, E. (Eds.)

2014, XII, 170 p. 24 illus., 22 illus. in color., Hardcover

ISBN: 978-94-017-8656-0
